Investment Objective and Policy

Investment Objective: The investment objective of the Fund is to track the performance of global equity securities in developed markets which historically have exhibited low volatility characteristics.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the 200 least volatile stocks within the STOXX Global 1800 Index. Index constituents are weighted relative to their realised historical volatility, with the least volatile stocks receiving a higher weighting in the Index. Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index.

Although the Index is generally well diversified, because of the market it reflects it may, depending on market conditions, contain constituents issued by the same body that may represent more than 10% of the Index. In order for the Fund to track the Index accurately, the Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations. These limits permit the Fund to hold positions in individual constituents of the Index issued by the same body of up to 20%.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the replication strategy as further described in the "**Investment Objectives and Policies – Index Tracking Funds**" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The equity securities in which the Fund invests will be primarily listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations. Details of the Fund's portfolio and the indicative net asset value per Share for the Fund are available on the Website daily.

Permitted Investments

Equities: The securities in which the Fund invests may include equities, or equity-related securities such as American Depositary Receipts (ADRs) or Global Depositary Receipts (GDRs). ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive.

Other Funds / Liquid Assets: The Fund may invest up to 10% of its net assets in other regulated open-ended funds (including Money Market Funds) where the objectives of such funds are consistent with the objective of the Fund and where such funds are authorised in member states of the EEA, United Kingdom, USA, Jersey, Guernsey or the Isle of Man and where such funds comply in all material respects with the provisions of the UCITS Regulations. The Fund may hold ancillary liquid assets such as deposits in accordance with the UCITS Regulations.

Derivatives: The Fund may, for efficient portfolio management purposes only, use financial derivative instruments ("**FDIs**"). Any use of FDIs by the Fund shall be limited to futures, forward foreign exchange contracts (including non-deliverable forwards) and warrants. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund; or the minimisation of tracking error, i.e. the risk that the Fund return varies from the Index return. FDIs are described in the "**Investment Objectives and Policies – Use of Financial Derivative Instruments**" section of the Prospectus.

Securities Lending

The Fund does not currently participate in a securities lending programme, though it is entitled to do so. The Fund also does not intend to engage in repurchase agreements and reverse repurchase agreements. **Should the Directors elect to change this policy in the future, due notification will be given to Shareholders and this Supplement will be updated accordingly.**

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "**Risk Information**" section of the Prospectus. In addition, the following risks are particularly relevant for the Fund.

Index Tracking Risk: The Fund's return may not match the return of the Index. It is currently anticipated that the Fund will track the Index with a potential variation of up to 1% annually under normal market conditions. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the

SPDR STOXX Global Low Volatility UCITS ETF

Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Derivatives Risk: The Fund may use FDIs for efficient portfolio management purposes as described in the derivatives section under Permitted Investments above. The Fund's use of FDIs involves risks different from, and possibly greater than, the risks associated with investing directly in securities.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk. Shareholders should refer to the "**Index Strategies and Sustainability Integration**" section of the Prospectus for further information.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors who want to take short, medium or long term exposure to the performance of the global developed equity markets and are prepared to accept the risks associated with an investment of this type and the expected high volatility of the Fund.

Subscriptions, Redemptions & Conversions

Investors may subscribe for or redeem Shares in the Fund on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges and in accordance with the provisions in the "**Purchase and Sale Information**" section of the Prospectus.

For subscriptions, consideration, in the form of cash must be received by the Settlement Deadline. For redemptions, a written redemption request signed by the Shareholder is required to be received by the Administrator by the Dealing Deadline on the relevant Dealing Day. In-kind dealing by Shareholders is not permitted.

Shareholders should refer to the terms of the "**Purchase and Sale Information**" section of the Prospectus for information on Share conversions.

Initial Offer Period

Shares in the following Share Classes of the Fund will be issued at the Dealing NAV:

SPDR STOXX Global Low Volatility UCITS ETF (ACC)
