What is this product?

Type

The Fund is an Irish Collective Asset-management Vehicle registered on 14 August 2015 under registration number C143488 and is authorised by the Central Bank of Ireland as a UCITS.

Term

The ICAV is an open ended Irish collective asset management vehicle incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws. This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The objective of the Sub-Fund is to track the performance of the investible local currency denominated, emerging markets sovereign bonds universe.

Investment policies The Sub-Fund is an index tracking fund (also known as a passively managed fund).

The Sub-Fund seeks to track the performance of the J.P. Morgan GBI-EM Global Diversified ESG Screened LC Index (the "Index") as closely as reasonably possible.

The Sub-Fund invests primarily in securities included in the Index. The Index measures the performance of bonds issued by emerging market governments and denominated in the local currency of the issuer. The Index applies ESG screening methodology to exclude issuers based on an assessment of their adherence to certain ESG criteria including but not limited to UNGC principles (international norms in relation to the environment human rights & communities, labour rights & supply chains, customers and governance) and exposure to controversial weapons and tobacco. The Index limits country exposure as defined in the Index methodology and redistributes the excess market value Index-wide on a pro-rata basis.

As it may be difficult to purchase all securities in the Index efficiently, in seeking to track the performance of the Index the Sub-Fund will

use a stratified sampling strategy to build a representative portfolio. Consequently, the Sub-Fund will typically hold only a subset of the securities included in the Index. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index that it believes closely reflect the risk and distribution characteristics of securities of the Index.

The Sub-Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manager the portfolio efficiently.

The Sub-Fund does not currently participate in a securities lending programme, though it is entitled to do so.

The class I GBP Shares are issued in Pound Sterling.

Shareholders may redeem shares in the Fund on any UK and US business day other than days on which the relevant financial markets are closed for business provided that a list of such closed market days will be published for the Fund on www.ssga.com.

Any income earned by the shares will be retained and reflected in an increase in the value of these shares.

Intended retail investor

This Fund is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risks

The risk category above shows how likely the fund is to lose money because of movements in the markets or because we are not able to pay you. The Fund's risk category is not guaranteed and may change in the future.

Performance scenarios

The figures shown include all the costs of the Fund other than the costs that you may need to pay to your advisor, distributor or other intermediary. The figures do not take into account your personal tax situation, which may also affect your return.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between July 2019 and May 2024.

Moderate: this type of scenario occurred for an investment between July 2016 and July 2021.

Favourable: this type of scenario occurred for an investment between December 2015 and December 2020.

What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 GBP is invested.

Example Investment 10,000 GBP	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	223 GBP	368 GBP
Annual cost impact*	2.2%	0.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.4% before costs and 2.7% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00% The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of costs are already included in the price. This includes the costs of distribution of your product.	0 GBP
