## What is this product?

### Type

The Fund is an Irish Collective Asset-management Vehicle registered on 14 August 2015 under registration number C143488 and is authorised by the Central Bank of Ireland as a UCITS.

### Term

The ICAV is an open ended Irish collective asset management vehicle incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws. This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

### Objectives

The objective of the Fund is to provide a balance between capital growth and capital preservation through exposure to a broad range of asset classes.

**Investment policies** The Fund seeks to actively invest in a diversified portfolio built through investments in Underlying Funds managed by the Investment Manager, or its affiliates in accordance with the asset allocation specified by the Glidepath (as set out below) for investors with a projected retirement date on or about 2030.

The Fund is actively managed and is not managed in reference to any benchmark index.

The Fund will follow a Glidepath proprietary to the Investment Manager, to determine an appropriate asset allocation based on the number of years until the projected retirement date of a typical investor.

The Glidepath is a long term asset allocation strategy developed and maintained by the Investment Manager for investments by retirement plans. The Glidepath is made up of three phases the "Consolidation Phase", the "Preservation Phase" and the "Post Retirement Phase". As 2030 approaches and for a five year period thereafter, the asset allocation to Underlying Funds is adjusted so as to reduce risk in the portfolio, decreasing the allocation to Underlying

Funds which are aimed at capital growth and introducing an increasing allocation to corporate bonds, government bonds, index linked bonds (each of which may be either fixed or floating rate and will be of investment grade) and cash.

The Fund may also hold cash, in various currencies, for settlement, investment or hedging purposes.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

The Fund does not currently participate in a securities lending programme, though it is entitled to do so.

Shareholders may redeem shares on any business day in both United Kingdom and Ireland other than days on which markets that represent a major portion of Fund's investments are closed. A list of such closed market days will be published for the Fund on [www.ssga.com](http://www.ssga.com).

Any income earned by the shares will be retained and reflected in an increase in the value of these shares.

The Fund's shares are issued in Euro.

### What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

<b>Total Costs</b>	<b>251 EUR</b>	<b>684 EUR</b>
