## What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	11 EUR	73 EUR
Annual cost impact*	0.1%	0.1% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.9% before costs and 5.7% after costs.
