What is this product?

Type

This Fund is an open-ended public limited company (société anonyme) with variable capital (société d'investissement à capital variable or SICAV).

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.
This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

The objective of the Fund is to generate capital growth over the long term through investment in global equity securities.

Investment policies The investment policy of the Fund is to invest in companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues, and are better positioned for the physical risks posed by climate change while screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anti-corruption and controversial weapons.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Sustainable Climate Equity Strategy as further described in the "Investment Strategies" section of the Prospectus.

The performance of the Fund will be measured against the MSCI World Index.

The securities in the portfolio are selected primarily from the securities in the index. Non-index securities may be held in the portfolio. The investment strategy uses defined risk parameters that mean the fund's weighting to countries, sectors and securities relative to the respective index will be limited. This is likely to limit the extent to which the Fund can outperform the MSCI World Index.

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

The Shares of the GBP Hedged Class are issued in Pound Sterling.

Any income earned by the Fund will be paid to shareholders in respect of the shares.

Intended retail investor

This Fund is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 GBP is invested.
