# State Street ACS Multi-Factor Global ESG Index Equity Fund

## (the "Fund")

A sub-fund of State Street Authorised Contractual Scheme, managed by State Street Unit Trust Management Limited (the "ACS Manager").  
**Unit Class: B2 Units (ISIN GB00BJRJFB86)**

### Objectives and Investment Policy

**Investment Objective** The Fund aims to track as closely as possible the performance of the MSCI World Select 5-Factor ESG Low Carbon Target Index (the "Benchmark Index") (or any other index which the ACS Manager determines from time to time tracks substantially the same market as the Benchmark Index).

The Fund seeks to minimise, as far as possible, the tracking difference between the Sub-fund's performance and that of the Benchmark Index.

The MSCI World Select 5-Factor ESG Low Carbon Target Index is based on MSCI World Index, its parent index, which includes large and mid-cap stock in developed market countries around the world. The index is designed to represent the performance of a strategy that seeks systematic integration of environmental, social and governance (ESG) norms and carbon exposure in factor investing, by seeking higher exposure to a combination of five style factors along with the improvement in the ESG profile and reduction in carbon exposure of the index relative to the Parent Index. Investors wishing to obtain more information about the Benchmark Index, including information on the underlying components and weightings can obtain this at: <https://www.msci.com/indexes>.

**Investment Policy** The Fund is an index tracking fund (also known as a passively managed fund). This means State Street Global Advisors Limited (the "Investment Manager") is attempting to track the performance of the Index.

The Investment Manager on behalf of the Fund and subject to the investment restrictions set out in the prospectus of the Fund, will

invest using a replication strategy such as to seek to physically hold all or close to all of the securities of the Benchmark Index with the approximate weightings in that Benchmark Index.

The Fund may use derivatives in order to manage the portfolio efficiently.

The Fund may lend up to 70% of the securities it owns.

Unitholders may redeem units Monday to Friday and being a day on which both the London Stock Exchange and New York Stock Exchange are open for trading.

**Index Source:** The funds or securities referred to herein are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The Prospectus contains a more detailed description of the limited relationship MSCI has with State Street Global Advisors Trust Company and any related funds, as well as additional disclaimers that apply to the MSCI indexes. The MSCI indexes are the exclusive property of MSCI and may not be reproduced or extracted and used for any other purpose without MSCI's consent. The MSCI indexes are provided without any warranties of any kind.

The units are accumulation units. Any income earned by the Fund will be retained and reflected in an increase in the value of the units

The Fund's units are issued in Pound Sterling.

Please refer to the Prospectus for more information.

### Risk and Reward Profile

**Risk Disclaimer** The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

**Why is this Fund in this category?** The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

**Derivatives Risk:** The Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities. Derivatives may be used to reduce risk to the Fund but this may not be effective and the Fund may still suffer a loss.

**ESG Risk:** If the Sub-fund invests in companies taking into account environmental, social and corporate governance (ESG) criteria then the performance of the Sub-fund may trail the returns of a portfolio of securities that includes companies that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Sub-fund's exposure to certain types of investments and may adversely impact the Sub-fund's performance.

**Index Tracking Risk:** The Fund's performance may not exactly track the Benchmark Index. This can result from factors which include, but are not limited to, transaction costs, differences in the weights held in individual securities to that of the Benchmark Index, subscriptions and redemptions, small amounts of cash not being invested in securities, the Funds being unable to trade in one or more markets, and efficient portfolio management techniques.

**Tax Status of the Fund Risk:** Non-UK tax authorities may not recognise the Fund as being tax transparent, resulting in adverse tax consequences for the investor. The Fund could be liable to taxation on its profits, unable to claim in full any tax relief and/or a

Unitholder may be called upon to indemnify the Fund if such Unitholder is not, or ceases to be, an Eligible Investor.

Please refer to the Prospectus for full details about the risks associated with this Fund.
