

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

State Street GBP Liquidity LVNAV Fund (the "Fund"), a sub-fund of State Street Liquidity Plc. This Fund is managed by State Street Global Advisors Europe Limited.

Share Class: Institutional (ISIN IE0003410440)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to maintain a high level of liquidity, preserve capital and provide a return in line with Pound Sterling money market rates.

Investment Policy In order to achieve its investment objective, the Fund invests in a range of investment grade fixed and adjustable rate money market instruments which are transferable securities and primarily denominated in Pound Sterling. These instruments pay a rate of interest to the Fund. This rate of interest is the Fund's only source of return.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. These environmental and social characteristics are detailed in the SFDR Annex of the Fund's Supplement. and include investment in issuers deemed to perform better in relation to financially material ESG challenges, avoidance of issuers deemed non-compliant with the Investment Manager's ESG criteria such as violations of UN Global Compact Principles or involvement in controversial weapons and exclusion of issuers involved in thermal coal, arctic drilling, oil and tar sands, as well as severe ESG controversies.

When selecting investments, the Investment Manager and/or Sub-Investment Manager, will adopt a best in class approach to ESG considerations by seeking to invest the majority of the Fund's portfolio in securities that are classified as sustainable investments under article 2(17) of SFDR using the Investment Manager's proprietary assessment methodology and, for government and supra-national issuers, classified within the two highest categories of a third party ESG rating.

The specific list of applicable exclusions may evolve and may be amended from time to time at the Investment Manager's and/or Sub-Investment Manager's absolute discretion. Such change may be implemented without notice to the Shareholders if deemed aligned with the screen criteria referred to above.

The Fund invests in debt securities which are issued by governments, banks, corporations and other financial institutions. The Fund can only invest in securities which have the highest short-term credit ratings.

The investment manager conducts in-depth analysis on each investment which the Fund makes and chooses investments it believes can provide liquidity and a stable return until maturity.

The Fund is actively managed. The benchmark is used for performance comparison purposes only. The benchmark does not influence the fund's portfolio.

The Fund is classified as a Low-Volatility NAV Money Market Fund.

The Fund itself is also rated by one or more credit rating agencies (that is, companies that rate the ability of the issuers of debt securities to repay borrowed money). To maintain these highest credit ratings, the Fund's investments are tightly controlled and closely monitored by each agency. The rating is solicited and financed by the Fund.

The Class, Institutional Shares seek to maintain a stable Net Asset Value per share however this may not be guaranteed.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Shareholders may redeem shares on any business day other than days on which the relevant financial markets are closed for business in the United Kingdom; and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be paid to shareholders in respect of the shares.

The Fund's shares are issued in Pound Sterling.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 1 as its return has experienced relatively low rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Credit Risk: The value of debt securities that the Fund purchases may be impacted by the ability of the issuer of those securities to pay the amounts of interest and principal owed as they become due. An actual or perceived decline in creditworthiness of an issuer of debt securities held by the Fund may result in a decrease in the value of the relevant securities.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of the Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been enacted by Key Investor Information the European Commission and will apply from 1 January 2023, but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and **the Article 8 classification** indicated in the Supplement and on the Website are subject to change and may no longer apply.

Please refer to the Prospectus for full details about the risks associated with this Fund.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year	
Ongoing charge	0.15%

Charges taken from the Fund under certain specific conditions	
Performance fee	none

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the year ending December 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges please refer to the "Fees and Expenses" section of the Prospectus and the Fund Supplement.

Past Performance

Past performance is not a guide to future results.

The past performance shown here takes account of all charges and costs. The entry/exit charges are excluded from the calculation of past performance.

The Fund was launched in March 1997.
The Class Institutional Shares were launched in July 2001.

Past performance has been calculated in Pound Sterling and is expressed as a percentage change in the Fund's net asset value at each year end.
