

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

State Street SPDR Bloomberg 7-10 Year U.S. Treasury Bond UCITS ETF

(the "Fund"), a sub-fund of SSGA SPDR ETFs Europe I plc (a UCITS authorised Exchange Traded Fund). This Fund is managed by State Street Global Advisors Europe Limited.

Share Class: State Street SPDR Bloomberg 7-10 Year U.S. Treasury Bond UCITS ETF (Acc) (ISIN IE000K22VCJ6)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to track the performance of the intermediate maturity U.S. Treasury bond market.

Investment Policy The Fund seeks to track the performance of the Bloomberg U.S. 7-10 Year Treasury Bond Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

The Fund invests primarily in securities included in the Index. These securities will only include bonds that have a maturity of between seven and up to (but not including) ten years remaining and must be fixed rate and rated investment grade (high quality) as defined by the Index methodology. Certain special issues, such as state and local government series bonds (SLGs), Treasury Inflation Protected Securities (TIPS) and Separate Trading of Registered Interest and Principal of Securities (STRIPS) are excluded.

As it may be difficult to purchase all securities in the Index efficiently, in seeking to track the performance of the Index, the Fund will use a stratified sampling strategy to build a representative portfolio. Consequently, the Fund will typically hold only a subset of the securities included in the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However,

shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund's maximum exposure to securities lending as a percentage of its Net Asset Value will not exceed 70%.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.

Index Source: The Index is the intellectual property of the Index provider. The Fund is not sponsored or endorsed by the Index provider. The Index provider does not provide any warranty or accept any liability in relation to any error relating to the Index, including any error in respect of the quality, accuracy or completeness of Index data, and does not guarantee that the Index will be in line with the described Index methodology. Please see the Prospectus for the full index disclaimer.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 4 as its return has experienced medium rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Concentration Risk: When the Fund focuses its investments in a particular way, the issues affecting the investments will have a greater effect than if the Fund was more diversified. This concentration may also limit the Fund's liquidity.

Duration / Interest Rate Risk: Changes in interest rates are likely to affect the value of debt instruments in which this Fund invests. A change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Index Tracking Risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Please refer to the Prospectus for full details about the risks associated with this Fund.
