

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

State Street SPDR S&P 400 U.S. Mid Cap Leaders UCITS ETF (the "Fund"), a

sub-fund of SSGA SPDR ETFs Europe I plc (a UCITS authorised Exchange Traded Fund). This Fund is managed by State Street Global Advisors Europe Limited.

Share Class: State Street SPDR S&P 400 U.S. Mid Cap Leaders UCITS ETF (Acc) (ISIN IE000Q4EBR54)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to track the U.S. equity market performance of mid cap equity securities.

Investment Policy The investment policy of the Fund is to track the performance of the S&P MidCap 400 Scored & Screened Leaders Index (the "Index") as closely as possible while seeking to minimise the tracking difference between the Fund's performance and that of the Index.

The Index measures the equity performance of the 400 mid cap companies in the U.S. equity market by market capitalisation, known as the S&P MidCap 400 Index (the "Standard Index"), while excluding companies based on certain ESG characteristics including their involvement in certain controversial business activities (including controversial weapons, small arms, military contracting, coal, thermal coal, oil sands, shale oil and gas, Arctic drilling, nuclear, tobacco, alcohol).

Thereafter the Index selects the top 50% of the float-adjusted market capitalization of each Global Industry Classification Standard (GICS) Industry Group within the Standard Index (minus the Exclusions), based on each company's S&P Global ESG Score which measures a company's performance on and management of material ESG risks, opportunities, and impacts informed by a combination of company disclosures, media and stakeholder analysis, modeling approaches, and in-depth company engagement.

At least 90% of the Fund's assets are invested in securities that are constituents of the Index. After the Exclusions are applied to the Standard Index, the Index universe is reduced by at least 20%.

The Fund will utilise a replication strategy which seeks to physically hold

all or close to all of the securities of the particular Index, with the approximate weightings as in that Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Fund does not currently engage in securities lending.

The Shares of the USD Class are issued in U.S. Dollar.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Index Tracking Risk: The Fund's return may not match the return of the Index. It is currently anticipated that the Fund will track the Index with a potential variation of up to 1% annually under normal market conditions. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Concentration Risk: When the Fund focuses its investments in a particular currency or region, the financial, economic, business, and other developments affecting issuers in that currency or region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a currency or region in which the Fund focuses its investments.

Screening Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria described in the Investment Policy and/or include incorrect/exclude correct constituents in the screening process. ESG scoring and screening is subject to inherent methodological limits. Any assessment of ESG criteria by an Index is based on the data provided by third parties. Such assessments are dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause incorrect assessment of an issuer's ESG performance. In particular there may be potential inconsistencies, inaccuracy or a lack of availability of required ESG data, particularly where this is issued by external data providers. These limitations may include but are not limited to issues relating to:

- Missing or incomplete data from companies (for example, relating to their capacity to manage their Sustainability Risks) which have been used as input for any scoring model;
- The quantity and quality of ESG data to be processed; and

Key Investor Information

- The identification of relevant factors for the ESG analysis.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be

hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates. Please refer to the Prospectus for full details about the risks associated with this Fund.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases, you may pay less — your financial advisor or distributor can confirm this. Entry and exit charges do not apply to investors buying or selling shares of the Fund on stock exchanges; however, such investors will transact at market prices and may be subject to broker fees and/or other charges. The ongoing charges figure shown is an estimate of the charges. It excludes:

- Portfolio transaction costs, except when the Fund pays an entry or exit charge when buying or selling units in another fund.
- For more information about charges, please refer to the Prospectus.
