

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

**SPDR MSCI World Financials UCITS ETF (the "Fund")**, a sub-fund of SSGA SPDR ETFs Europe II plc (a UCITS compliant Exchange Traded Fund). (ISIN IE00BYTRR970)

**Objectives and Investment Policy**

**Investment Objective** The objective of the Fund is to track the performance of companies in the financials sector, across developed markets globally.

**Investment Policy** The Fund seeks to track the performance of the MSCI World Financials 35/20 Capped Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

The Fund invests primarily in securities included in the Index. These securities include equity securities issued by companies globally, which have been classified as falling within the financials sector, in line with the Global Industry Classification Standard (GICS).

The Fund seeks to hold all the securities of the Index with the approximate weightings as in that Index. The Fund will use a replication strategy to create a near mirror-image of the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund may lend up to 40% of the securities it owns.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on [www.ssga.com](http://www.ssga.com)); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Fund's shares are issued in U.S. Dollars.

Please refer to the Prospectus for more information.

**Index Source:** The funds or securities referred to herein are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The prospectus and supplement contains a more detailed description of the limited relationship MSCI has with State Street Bank and Trust Company, through SSGA, and related funds, as well as additional disclaimers that apply to the MSCI indexes. The MSCI indexes are the exclusive property of MSCI and may not be reproduced or extracted and used for any other purpose without MSCI's consent. The MSCI indexes are provided without any warranties of any kind.

**Risk and Reward Profile**

**Risk Disclaimer** The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

**Why is this Fund in this category?** The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

**Concentration Risk:** When the Fund focuses its investments in a particular way, the issues affecting the investments will have a greater effect than if the Fund was more diversified. This concentration may also limit the Fund's liquidity.

**Index Tracking Risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

**Liquidity Risk & ETF Liquidity Risk:** Lack of a ready market or resale restrictions may limit the Fund's ability to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount and may affect the ability to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices materially different to the last available NAV.

Please refer to the Prospectus for full details about the risks associated with this Fund.
