

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

State Street Emerging Markets Select ESG Screened Equity

Fund (the "Fund"), a sub-fund of State Street Global Advisors Luxembourg SICAV. This Fund is managed by State Street Global Advisors Funds Management Limited.

Share Class: I Shares (ISIN LU0379088940)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

Investment Policy The investment policy of the Fund is to outperform the MSCI Emerging Markets Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term.

The investment policy will also involve screening out securities based on an assessment of their adherence to ESG criteria (i.e. international norms in relation to environmental protection, human rights, labour standards, anticorruption and controversial weapons).

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the "Investment Strategies" section of the Prospectus and also employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "ESG Screening" subsection of the "ESG Investing" section of the Prospectus.

The securities in the portfolio are selected primarily from the securities in the index. The Fund may invest in or gain exposure to securities registered in or trading in markets other than those included in the index. The investment strategy uses defined risk parameters that mean the fund's weighting to countries, sectors and securities relative to the respective index will be limited. This is likely to limit the extent to which the Fund can outperform the MSCI Emerging Markets Index.

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities. The Fund may invest in China A Shares both via Stock Connect and RQFII Quota; and
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

The Fund may lend up to 40% of the securities it owns.

The Fund's shares are issued in Euro.

Shareholders may redeem shares on any Luxembourg and UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or

limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant derivative instruments associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

People's Republic of China (PRC) Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty.
