State Street Europe Value Spotlight Fund (the "Fund"), a sub-fund of State Street Global Advisors Luxembourg SICAV. This Fund is managed by State Street Global Advisors Europe Limited.
Share Class: B (ISIN LU0892046151)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to generate capital growth over the long term through investment in European equity securities.

Investment Policy The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively to build a concentrated portfolio of 30-40 European equity securities. The performance of the Fund will be measured against the MSCI Europe Index.

The securities in the portfolio are selected without taking into account the securities in the index. The portfolio's weighting to securities will be set without taking into account the weightings of securities in the index.

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds;
- Liquid assets; and

- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

The Fund may lend up to 40% of the securities it owns.

The Shares of the EUR Class are issued in Euro.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

Shareholders may redeem shares on any Luxembourg, U.K and Ireland business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk

sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant derivative instruments associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Please refer to the Prospectus for full details about the risks associated with this Fund.
