

State Street ETF Model Portfolios

A Partnership to
Achieve Your Goals

Build Your Good Life

You want to put your money to work to build the life you and your family have dreamed of. To succeed, you need to address an array of financial issues.

A Financial Plan May Have Many Components

retirement planning—cash flow management—**budgeting and spending**—setting priorities—**college planning**—short-term savings—**financial protection and insurance**—family money discussions—**debt management**—home and real estate—**workplace benefits**—goal-setting—**implementing financial plans**—investment planning—**tax management**—investment management—**philanthropy and gifting**—financial coaching and education—**legacy and inheritance**

Your financial advisor helps navigate this complicated world by drawing on a range of expert resources, so he or she can focus on their most important role: working in partnership with you to help you achieve your goals. For example, your financial advisor may recommend investing in a model portfolio built by highly sophisticated managers. Partnering with those managers gives you access to the resources and expertise of some of the world's leading investment teams.

What Is a Model Portfolio?

An asset allocation model portfolio is a globally diversified investment approach that targets a particular balance of return and risk. Models are designed to address a variety of unique investor needs and have the potential to:

Diversify your investments in an easy-to-use and easy-to-understand package

Reduce investment management costs and taxes by using low-cost, tax-efficient exchange-traded funds (ETFs)

Benefit from access to institutional investment management and expertise not commonly available to individual investors

Advisors Look to Models for a Range of Considerations

Sector / Industry Diversification	Rebalancing	Security Concentration	Asset Allocation	Geopolitical Risk
Volatility	Valuation Analysis	Domestic Policy Changes	Security Selection	Putting New Money to Work
Investment Due Diligence	Geographic Diversification	Investment Tax Management	Interest Rate Risk	Credit Risk

Through model portfolios, your advisor can offer you access to the teams that manage the assets of some of the largest, most discerning investors in the world. Their resources and expertise can help you build toward the future you envision — whether that means preparing for retirement, planning for college, supporting kids or aging parents, preparing a financial legacy, donating to cherished causes or traveling the world.

State Street ETF Model Portfolios

Time-Tested

Established in 1982, the **45+** member Investment Solutions Group (ISG) at State Street Global Advisors builds and manages the State Street ETF Model Portfolios. This same team manages money for large institutions around the world, including **pension funds, central banks, sovereign wealth funds and endowments**.

Efficient

ETFs have **low expenses** and tend to be highly **tax-efficient** — qualities that help keep overall costs low so you can take home more of your returns.

Disciplined

The managers of the State Street ETF Model Portfolios employ a rigorous process and invest each portfolio's assets in a distinct mix of ETFs. The resulting portfolios provide **global diversification** based on their target balance of risk and return. The model portfolios undergo **ongoing risk evaluation** and offer a **track record** of performance, in some cases dating back more than 10 years.

State Street Global Advisors by the Numbers

Important Risk Information

All asset allocation scenarios are for hypothetical purposes only and are not intended to represent a specific asset allocation strategy or recommend a particular allocation. Each investor's situation is unique and asset allocation decisions should be based on an investor's risk tolerance, time horizon and financial situation.

Information represented in this piece does not constitute legal, tax, or investment advice. Investors should consult their legal, tax, and financial advisors before making any financial decisions. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs' net asset value. Brokerage commissions and ETF expenses will reduce returns. Diversification does not ensure a profit or guarantee against loss. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. Asset allocation is a method of diversification which positions assets among major investment

categories. Asset Allocation may be used in an effort to manage risk and enhance returns. It does not, however, guarantee a profit or protect against loss. The models presented herein have different investment objectives, costs and expenses. The performance of each model will necessarily depend on the ability of their respective managers to select portfolio investments. These differences, among others, may result in significant disparity in the model's portfolio assets and performance.
