Monthly Thematic NextGen Trends ETF Review

Flows

- \$3.1 billion of outflows in May, representing a 2% decrease in assets and the first month of outflows after eighteen consecutive months of positive flows
- Only Intelligent Infrastructure had net inflows (+\$17 million), representing a 2% increase relative to its asset base
- Over the past three months, NextGen Trends ETFs saw \$1.9 billion of inflows – the lowest 3-month value since the November 2019 – January 2020 period
- The 12-month figure is \$70.3 billion, or 214% organic growth over the period

Performance

- The average return on NextGen Trends ETFs in May was -1%, underperforming the S&P 500® by 2%
- Intelligent Infrastructure posted the strongest returns (+1%) last month, followed by Future Security (+1%)
- Overall, 32% of all NextGen Trends ETFs outperformed the S&P 500® last month
- Year to date, the average fund has underperformed the S&P 500® by 7%, with only 20% of all funds outperforming

Fund Spotlight

The SPDR® S&P Kensho Intelligent Structures ETF (SIMS) has grown its assets by 5.8x since the US election, while seeing its average traded value spike by 5.1x compared to previous 6 months.

With technological advancements and shifts toward sustainable solutions, the definition of infrastructure keeps evolving. Innovative technology is essential to meet changing needs, from electric vehicle charging stations and energy-efficient buildings, to digitally connected water systems.

President Biden's more than \$2 trillion of infrastructure plan, including modernizing of transportation systems, building infrastructure for electric vehicles and improving our drinking water systems, may increase demand for products and services related to intelligent and connected infrastructure.

Investors looking to position for potential higher infrastructure spending with a focus on smart infrastructure may want to consider SPDR® S&P Kensho Intelligent Structures ETF.

Source: ssga.com. Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit www.ssga.com for most recent month-end performance. Performance returns for periods of less than one year are not annualized. Performance is shown net of fees. The gross expense ratio is the fund's total annual operating expenses ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

The market price used to calculate the Market Value return is the midpoint between the highest bid and the lowest offer on the exchange on which the shares of the Fund are listed for trading, as of the time that the Fund's NAV is calculated. If you trade your shares at another time, your return may differ. ^As of 03/24/2021 Gross Expense Ratio was reduced for LOWC, SPYX and EFAF to 0.20%

Glossary

Beta Volatility measure of the percentage price change of the security given a one percent change in a representative market index. The beta value is generated by a risk model and determined by comparing the price movements of the security and the representative market index. A beta below 1 can indicate an investment with lower volatility than the market.

Brent Crude Spot Price (Used in Macro Sensitivity) Current spot price in current pipeline export quality Brent blend as supplied at Sullom Voe.

Correlation measures the historical tendency of two investments to move together. Investors often combine investments with low correlations to diversify portfolios.

Earnings Per Share Earnings per share (EPS) is the monetary value of earnings per outstanding share of common stock for a company.

EPS Growth Rate The Compounded Annual Growth Rate (CAGR) of the operating Earnings per Share (EPS) over the specified time period.

Estimated 3–5 EPS Growth (%) The estimated 3–5 year EPS growth is based on the underlying holdings of the index. The earnings estimates for the underlying holdings are provided by FactSet and are used to calculate a compounded annual growth rate for earnings per share over the next 3–5 years. These analysts estimates are forecasts of the firms' potential ability to increase earnings per share over a full market cycle, and not a measure of expected stock or index price performance. The 3–5 year EPS estimate for an index is a market cap weighted average of the underlying firms' figures.

EV to Sales Enterprise value-to-sales is a financial valuation measure that compares the enterprise value (EV) of a company to its annual sales.

EV Enterprise value is a measure of a company's total value, often used as a more comprehensive alternative to equity market capitalization. EV includes in its calculation the market capitalization of a company but also short-term and long-term debt as well as any cash on the company's balance sheet.

LT Debt to Equity Ratio is a financial ratio indication the relative proportion of long-term debt and shareholders' equity. A high LT debt to equity ratio generally means that a company has been aggressive in financing its business with debt.

Macro Sensitivity to Economic Variables This is measured as the beta of returns relative to a particular variable. Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to a particular variable.

Next Gen Trends Classification leveraging applicable portions of New Economies framework developed by S&P Kensho and grouped into 12 thematic categories based on their fund objective: Broad Innovation: Innovation throughout the economy, Clean Energy: Renewables or firms with low carbon footprints, Cloud Computing: Cloud storage and cloud based software, Democratized Banking: Digital payments and encrypted banking technology, Final Frontiers: Space and deep sea exploration, Future Communications: 5G networks, streaming media and videogames, Future Security: Cybersecurity and drone technology, Human evolution: Advanced medicines and health care solutions, Intelligent Infrastructure: Smart cities, power grids, and water technology, New Consumer: e-Commerce and gig economy, Robotics & AI: Robotics & AI as well as advanced manufacturing, Smart Mobility: Ride sharing and autonomous vehicles.

Glossary

Percentage of Foreign Firm Assets This figure represents the weighted average of the amount of the underlying foreign firm assets as a percent of total geographic segment firm assets.

Percentage of Foreign Firm Sales This figure represents the weighted average of the amount of the underlying foreign firm sales as a percent of total geographic segment firm sales.

Price to Earnings Ratio (P/E) The ratio of the price of a stock and the firm's earnings per share. A low P/E translates into a value stock. A high P/E is more indicative of a growth stock.

Return on Equity (ROE) This measures the rate of return on the ownership interest (shareholders' equity) of the common stock owners. It measures a firm's efficiency at generating profits from every unit of shareholders' equity. ROE shows how well a company uses investment funds to generate earnings growth.

US 10 Year Yield (Used in Macro Sensitivity) The rate is comprised of Generic United States on-the-run government 10 Year Treasuries. The yield quoted is yield to maturity and on a pre-tax basis.

US Dollar Spot Index (Used in Macro Sensitivity) The Dollar Spot Index tracks the performance of a basket of ten leading global currencies versus the US Dollar. Each currency in the basket and their weight is determined annually based on their share of international trade and FX liquidity.

Important Disclosures

This communication is not intended to be an investment recommendation or investment advice and should not be relied upon as such.

Investing involves risk including the risk of loss of principal.

The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent.

Concentrated investments in a particular sector or industry (technology sector and industrials sector) tend to be more volatile than the overall market and increases risk that events negatively affecting such sectors or industries could reduce returns, potentially causing the value of the Fund's shares to decrease.

Non-diversified funds that focus on a relatively small number of securities tend to be more volatile than diversified funds and the market as a whole.

Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets.

Multi-cap Investments include exposure to all market caps, including small and medium capitalization ("cap") stocks that generally have a higher risk of business failure, lesser liquidity and greater volatility in market price. As a consequence, small and medium cap stocks have a greater possibility of price decline or loss as compared to large cap stocks. This may cause the Fund not to meet its investment objective.

No fossil fuel reserve ownership may have an adverse effect on a company's profitability and, in turn, the returns of the fund.

Technology companies, including cyber security companies, can be significantly affected by obsolescence of existing technology, limited product lines, competition for financial resources, qualified personnel, new market entrants or impairment of patent and intellectual property rights that can adversely affect profit margins.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Equity securities may fluctuate in value in response to the activities of individual companies and general market and economic conditions.

Index-based funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.
