

SPDR® Gold Shares ETF Capital Markets Perspective

2840 HK

March 2019

With more than US\$ 32bn of in assets¹, SPDR® Gold Shares is the largest Gold ETF in the World. It is also the first ETF domiciled in the United States to have been cross-listed on the Stock Exchange of Hong Kong (SEHK). Listed in Hong Kong Dollars, SPDR® Gold Shares (2840 HK) has been trading since July 2008. More than ten years later, 2840 HK is one of the most traded ETFs on the SEHK and its liquidity offers can compel potential benefits for investors.

On-exchange Liquidity

2840 HK is the most traded Gold ETF on the SEHK

with HK\$ 3.8bn of turnover over the last 12 months.¹ In March 2019, 2840 HK had a turnover of HK\$ 394m, more than 12 times the turnover of the Hong Kong Dollars listing of Value Gold ETF (3081 HK). Across all available Gold ETF listings on the SEHK, 2840 HK represented more than 92% of the total turnover in March 2019.²

Important Risk Information

Investing involves risk including the risk of loss of principal. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. Commodities and commodity-index linked securities may be affected by changes in overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities. Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs. There can be no assurance that the active trading market for GLD shares will be maintained.
