## Fund Objective

The investment objective of State Street Institutional U.S. Government Money Market Fund is to seek to maximize current income, to the extent consistent with the preservation of capital and liquidity and the maintenance of a stable \$1.00 per share net asset value ("NAV").

## Investment Strategy

The Fund attempts to meet its investment objective by investing in Obligations issued or guaranteed as to principal and/or interest, as applicable, by the U.S. government or its agencies and instrumentalities, such as U.S. Treasury securities and securities issued by the Government National Mortgage Association ("GNMA"), which are backed by the full faith and credit of the United States; Obligations issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, and U.S. government-sponsored entities such as the Federal Home Loan Bank, which are not backed by the full faith and credit of the United States; and Repurchase agreements with respect to U.S. government securities. The Fund seeks to achieve its investment objective by investing substantially all of its investable assets in the U.S. Government Portfolio, which has substantially similar investment policies to the Fund. When the Fund invests in this "master-feeder" structure, the Fund's only investments are shares of the Portfolio, and it participates in the investment returns achieved by the Portfolio.

### Important Risk Information

State Street Global Advisors Funds Management, Inc. ("SSGA FM") serves as the investment adviser

to the Fund.

Bonds generally present less short-term risk and volatility than stocks, but contain interest rate risk (as interest rates rise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.

90-day Treasury bills are insured and guaranteed by the government. Treasury bills maintain a stable value if held to maturity, but returns are generally only slightly above the inflation rate. Investing involves risk including the risk of loss of principal.
