

SPDR® S&P®/ASX 200 ESG ETF

Key Features

- Relatively Low Cost¹
- Tradability
- Transparency of Performance
- Diversification²

¹ Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

² Diversification does not protect against loss.

Fund Objective

The SPDR® S&P®/ASX 200 ESG ETF seeks to closely match, before fees and expenses, the returns of the S&P/ASX 200 ESG Index.

Index Description

The S&P/ASX 200 ESG Index is a broad-based, market-cap-weighted index that is designed to measure the performance of securities meeting sustainability criteria*, while maintaining similar overall industry group weights as the S&P/ASX 200 Index.

*Sustainability screening exclusions are subject to certain thresholds detailed in the Fund's PDS.

Fund Performance is the Total Return, representing the sum of the Growth (or Price) Return and Distribution Return.

Past Performance is not a reliable indicator of future performance.

Performance returns for periods of less than one year are not annualised and have been calculated based on changes in the net asset value of the Fund rather than the last quoted price. Performance is shown net of management fees and costs but does not reflect the brokerage fees or the bid/ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange. Distributions are assumed to be reinvested under the Dividend Reinvestment Program (DRP). Investment returns and principal value will fluctuate, so you may have a gain or loss when units are sold. Current performance may be higher or lower than that quoted.

The index returns reflect all items of income, gain and loss and the reinvestment of dividends (net of withholding tax) and other income. Index returns are unmanaged and do not reflect the deduction of any fees or expenses.

Characteristics

Number of Holdings	99
Dividend Yield	3.31%
Price/Earnings Ratio FY1	19.36
Price/Book	2.44
Est. 3-5 Year EPS Growth*	7.30%
Return on Equity	17.09%

*Projected characteristics are based upon estimates and reflect subjective judgments and assumptions. There can be no assurance that developments will transpire as forecasted and that the estimates are accurate.

Based on the underlying holdings of the fund. The actual earnings estimates for the underlying holdings are provided by FactSet Estimates and are used to calculate a mean 3-5 year EPS growth rate estimate.

Information Classification: General

State Street Global Advisors (SSGA) is now State Street Investment Management. Please go to statestreet.com/investment-management for more information.

Issued by State Street Global Advisors, Australia Services Limited (AFSL Number 274900, ABN 16 108 671 441) ("SSGA, ASL"). Registered office: Level 14, 420 George Street, Sydney, NSW 2000, Australia · Telephone: 612 9240-7600 · Web: www.ssga.com.

SSGA, ASL is the issuer of interests and the Responsible Entity for the ETFs which are Australian registered managed investment schemes quoted on the AQUA market of the ASX or listed on the ASX.

This material is general information only and does not take into account your individual objectives, financial situation or needs and you should consider whether it is appropriate for you. You should seek professional advice

and consider the product disclosure statement available at ssga.com/au, before deciding whether to acquire or continue to hold units in an ETF. The Target Market Determination is also available at ssga.com/au. This material should not be considered a solicitation to buy or sell a security. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETF's net asset value.

Investing involves risk including the risk of loss of principal. Diversification does not ensure a profit or guarantee against loss.

Equity securities may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions.

The returns on a portfolio of securities which exclude companies that do not meet the portfolio's sustainable strategy criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's sustainable strategy criteria may result in the portfolio investing in industry sectors

or securities which underperform the market as a whole.

Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

Characteristics presented are calculated using the month end market value of holdings, except for beta and standard deviation, if shown, which use month end return values. Averages reflect the market weight of securities in the portfolio. Market data, prices, and dividend estimates for characteristics calculations provided by FactSet Research Systems, Inc. All other portfolio data provided by SSGA. Characteristics and weights are as of the date indicated, are subject to change and should not be relied upon as current thereafter.
