

SPDR® S&P® World ex Australia Carbon Control (Hedged) Fund

Key Features

- Diversified Investment
- Relatively Low Cost¹
- Transparency of Performance
- Flexibility of Trading

¹ Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

Fund Objective

The SPDR S&P World ex Australia Carbon Control (Hedged) Fund seeks to closely track, before fees and expenses, the returns of the S&P Developed Ex-Australia LargeMidCap Carbon Control AUD Hedged Index.

Index Description

The S&P Developed Ex-Australia LargeMidCap Carbon Control AUD Hedged Index is designed to measure the return of the S&P Developed Ex-Australia LargeMidCap Carbon Control Index while hedging the Australian Dollar risk, but not the underlying equity market risk.

5 Year p.a.	5.31	5.49
Since Inception p.a.	8.66	9.04

Source: SSGA, as at 31 October 2022

Fund Performance is the Total Return, representing the sum of the Growth (or Price) Return and Distribution Return.

Past Performance is not a reliable indicator of future results.

Performance returns for periods of less than one year are not annualised and have been calculated based on changes in the net asset value of the Fund rather than the last quoted price. Performance is shown net of management fees and costs but does not reflect the brokerage fees or the bid/ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange. Distributions are assumed to be reinvested under the Dividend Reinvestment Program (DRP). Investment returns and principal value will fluctuate, so you may have a gain or loss when units are sold. Current performance may be higher or lower than that quoted.

Index returns reflect capital gains and losses, income, and the reinvestment of dividends. Index returns are unmanaged and do not reflect the deduction of any fees or expenses.

The Index reflects linked performance returns of both the S&P Developed ex Australia LargeMidCap AUD Hedged Index and the S&P Developed Ex-Australia LargeMidCap Carbon Control AUD Hedged Index. The index returns are reflective of the S&P Developed ex Australia LargeMidCap AUD Hedged Index from fund inception until 01/31/2022 and of the S&P Developed Ex-Australia LargeMidCap Carbon Control AUD Hedged Index effective 01/31/2022.

Information Classification: General

Issued by State Street Global Advisors, Australia Services Limited (AFSL Number 274900, ABN 16 108 671 441) ("SSGA, ASL"). Registered office: Level 14, 420 George Street, Sydney, NSW 2000, Australia · Telephone: 612 9240-7600 · Web: www.ssga.com.

SSGA, ASL is the issuer of interests and the Responsible Entity for the ETFs which are Australian registered managed investment schemes quoted on the AQUA market of the ASX or listed on the ASX.

This material is general information only and does not take into account your individual objectives, financial situation or needs and you should consider whether it is appropriate for you. You should seek professional advice and consider the product disclosure document and target market determination, available at www.ssga.com, before deciding whether to acquire or continue to hold units in an ETF. This material should not be considered a solicitation to buy or sell a security. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or

below the ETF's net asset value. ETFs typically invest by sampling an index, holding a range of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index. Investing involves risk including the risk of loss of principal. Diversification does not ensure a profit or guarantee against loss. Sector ETF products are also subject to sector risk and non-diversification risk, which generally results in greater price fluctuations than the overall market. Risks associated with equity investing include stock values which may fluctuate in response to the activities of individual companies and general market and economic conditions. Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations. Investments in mid-sized companies may involve greater risks than in those of larger, better known companies, but may be less volatile than investments in smaller companies.

Investing in foreign domiciled securities may involve risk of capital loss from unfavorable fluctuation in currency values, withholding taxes, from differences in generally accepted accounting principles or from economic or political instability in other nations. Currency Hedging involves taking offsetting positions intended to substantially offset currency losses on the hedged instrument. If the hedging position behaves differently than expected, the volatility of the strategy as a whole may increase and even exceed the volatility of the asset being hedged. There can be no assurance that the Fund's hedging strategies will be effective. The returns on a portfolio of securities which exclude companies that do not meet the portfolio's specified ESG criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's ESG criteria may result in the portfolio investing in industry sectors or securities which underperform the market as a whole. Characteristics presented are calculated using the month end market value of holdings, except for beta and standard deviation, if shown, which use month end return values. Averages reflect the market weight of securities in the portfolio. Market data, prices, and

dividend estimates for characteristics calculations provided by FactSet Research Systems, Inc. All other portfolio data provided by SSGA. Characteristics and weights are as of the date indicated, are subject to change and should not be relied upon as current thereafter.
