

SPDR[®] Dow Jones[®] International Real Estate ETF

Key Features

- The SPDR[®] Dow Jones[®] International Real Estate ETF seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Dow Jones[®] Global ex-U.S. Select Real Estate Securities IndexSM (the "Index")
- Seeks to provide exposure to the publicly traded real estate securities in non-U.S. developed and emerging markets

About This Benchmark

The Dow Jones Global ex-U.S. Select Real Estate Securities IndexSM is a float-adjusted market capitalization index designed to measure the performance of publicly traded real estate securities in countries excluding the United States. The Index's composition is reviewed quarterly. The Index is a measure of the types of global real estate securities that represent the ownership and operation of commercial or residential real estate. The Index includes equity Real Estate Investment Trusts ("REITs") and real estate operating companies that meet a defined criteria, as summarized in the Fund's prospectus. The Index is rebalanced quarterly effective after the close of trading on the third Friday in March, June, September and December. The reference date is the third Friday of February, May, August, and November.

Please see the section of the fund's prospectus entitled "The Fund's Principal Investment Strategy" for additional information regarding the Index.

Glossary

NAV The market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding.

Market Value Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days.

Gross Expense Ratio The fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

30 Day SEC Yield (Also known as Standardized Yield) An annualized yield that is calculated by dividing the net investment income earned by the fund over the most recent 30-day period by the current maximum offering price.

Index Dividend Yield The weighted average of the underlyings' indicated annual dividend divided by price, expressed as a percentage.

Price/Earnings Ratio FY1 The weighted harmonic average of current share price divided by the forecasted one year earnings

per share for each security in the fund. Negative and positive outliers are included in the calculation.

Price/Book Ratio The weighted harmonic average of closing market price divided by the most recent reported book value for each security in the fund's portfolio as calculated for the last twelve months.

Important Risk Information

Foreign (non-U.S.) Securities may be subject to greater political, economic, environmental, credit and information risks. Foreign securities may be subject to higher volatility than U.S. securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in **emerging markets**.

Real Estate Investment Trusts (REITs) investing may be subject to risks including, but not limited to, declines in the value of real estate, risks related to general economic conditions, changes in the value of the underlying property owned by the trust and defaults by borrowers.

Non-diversified fund may invest in a relatively small number of issuers, a decline in the market value may affect its value more than if it invested in a larger number of issuers. While the Fund is expected to operate as a diversified fund, it may become non-diversified for periods of time solely as a result of changes in the composition of its benchmark index. The Fund may not purchase securities of any issuer if, as a result, more than 5% of

the Fund's total assets would be invested in that issuer's securities; except as may be necessary to approximate the composition of its target index. This limitation does not apply to obligations of the U.S. government or its agencies or instrumentalities.

Passively managed funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.

While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of **market stress**.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.
