

SPDR® MSCI ACWI Low Carbon Target ETF

ISIN US78463X1946

Fund Objective

The SPDR® MSCI ACWI Low Carbon Target ETF seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the MSCI ACWI Low Carbon Target Index.

About This Benchmark

The MSCI ACWI Low Carbon Target Index is designed to address two dimensions of carbon exposure – carbon emissions and fossil fuel reserves. By overweighting companies with low carbon emissions relative to sales and per dollar of market capitalization, the Index aims to reflect a lower carbon exposure than that of the broad market.

Characteristics are subject to change.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. The performance data does not take account of the commissions and costs incurred on the issue and redemption, or purchases and sale, of units. Visit [ssga.com](https://www.ssga.com) for most recent month-end performance.

Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

The performance is calculated in USD, its value may rise or fall as a result of currency fluctuations.

Definitions: **NAV** - The market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Market Value** - Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days. **Gross Expense Ratio** - The fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus. **Dividend Yield** - The sum of the most recent 12 dividends within the past 365 days divided by Net Asset Value per share, expressed as a percentage. **Average Price/Book Ratio** - The weighted harmonic average of closing market price divided by the most recent reported book value for each security in the fund's portfolio as calculated for the last twelve months.

Key/Investment Risk Disclosures:

Capital at risk. Investing involves risk including the risk of loss of principal.

Equity securities may fluctuate in value in response to the activities of individual companies and general market and economic conditions.

Foreign Securities may be subject to greater political, economic, environmental, credit and information risks. Foreign securities may be subject to higher volatility than U.S. securities, due to varying degrees of regulation and limited liquidity.

Non-diversified funds that focus on a relatively small number of securities tend to be more volatile than diversified funds and the market as a whole.

Passively managed funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.
