

## SPDR<sup>®</sup> Bloomberg Barclays 1-5 Year Gilt UCITS ETF (Dist)

ISIN IE00B6YX5K17

### Fund Objective

The objective of the Fund is to track the performance of the short-dated UK Government bond (Gilt) market.

### Index Description

The Bloomberg Barclays Sterling 1-5 Year Aggregate Gilts Bond Index measures the performance of the UK Government bond (Gilt) market and includes public obligations of the United Kingdom with a maturity between 1 and up to (but not including) 5 years. Using market capitalisation weighting and a standard rule-based inclusion methodology, the Index reflects the performance and characteristics of the Gilt market. Securities must be rated investment grade, as defined by the index methodology.

**Index Ticker** LF56TRGU

**Index Type** Total Return

**Number of Constituents** c.10

**Capital Risk: Investing involves risk including the risk of loss of capital.****Past performance is not a guarantee of future results.**

Past performance is not an indicator of future performance. The Gross of fees do not reflect and net of fees do reflect commissions and costs incurred on the issue and redemption, or purchases and sale, of units. If the performance is calculated on the basis of Gross/net asset values that are not denominated in the accounting currency of the collective investment scheme, its value may rise or fall as a result of currency fluctuations.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

† This measures the 12 month historical dividend pay-out per share divided by the NAV.

Calendar year inception performance returns will be partial for the year where the inception date for either the Fund in question or the historic performance-linked Fund (whichever is the earliest) falls within that period.

**For Professional Clients / Qualified Investors Use Only. Not for public distribution.**

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

**Marketing Communication**

SPDR ETFs may not be available or suitable for you. The information provided does not constitute investment advice as such term is defined under the Markets in Financial Instruments Directive (2014/65/EU) and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell any investment. It does not take into account any investor's or potential investor's particular investment objectives, strategies, tax status, risk appetite or investment horizon. If you require investment advice you should consult your tax and financial or other professional advisor.

This document does not constitute an offer or request to purchase shares in SPDR ETFs Europe I plc and SPDR ETFs Europe II plc.

**This document should be read in conjunction with its prospectus and Key Investor Information Document (KIID). All transactions should be based on the latest available prospectus and KIID which contains more information regarding the charges, expenses, where the funds are authorised for sale and risks involved in your investment.**

**Glossary:**

**Effective Convexity:** A measure of the curvature in the relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.

**Effective Duration:** A duration calculation for bonds that have embedded options. This measure of duration takes into account the fact that expected cash flows will fluctuate as interest rates change. Effective duration can be estimated using modified duration if a bond with embedded options behaves like an option-free bond.

**Yield to Maturity:** The total return anticipated on a bond if the bond is held until it matures. Yield to maturity is considered a long-term bond yield, but is expressed as an annual rate. In other words, it is the internal rate of return (IRR) of an investment in a bond if the investor holds the bond until maturity and if all payments are made as scheduled.

**Distribution Yield:** The Annual dividends per share (DPS) of the fund divided by the share price of the fund.

**Delta:** A measure of equity sensitivity showing the relationship between a percent change in stock price and corresponding expected percent change in convertible price; it is also known as price elasticity.

**TER:** Total Expense Ratio is a fee charged to the fund, as a percentage of the Net Asset Value, to cover costs associated with operation and management of the portfolio of assets.
