The SPDR® Bloomberg 1-3 Month T-Bill ETF seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the Bloomberg 1-3 Month U.S. Treasury Bill Index (the “Index”).

- Seeks to provide exposure to publicly issued U.S. Treasury Bills that have a remaining maturities between 1 and 3 months
- Short duration fixed income is less exposed to fluctuations in interest rates than longer duration securities
- Rebalanced on the last business day of the month

About This Benchmark

The Bloomberg 1-3 Month U.S. Treasury Bill Index (the “Index”) is designed to measure the performance of public obligations of the U.S. Treasury that have a remaining maturity of greater than or equal to 1 month and less than 3 months. The Index includes all publicly issued U.S. Treasury Bills that have a remaining maturity of less than 3 months and at least 1 month, and are rated investment-grade. In addition, the securities must be denominated in U.S. dollars and must have a fixed rate. The Index is market capitalization weighted, with securities held in the Federal Reserve System Open Market Account deducted from the total amount outstanding.

Past performance is not a reliable indicator of future performance. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit ssga.com for most recent month-end performance. Performance is shown net of fees. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income as applicable.

Prior to 10/31/2021, the SPDR Bloomberg 1-3 Month T-Bill ETF was known as the SPDR Bloomberg Barclays 1-3 Month T-Bill ETF.

Prior to 8/24/2021, the Bloomberg 1-3 Month U.S. Treasury Bill Index was known as the Bloomberg Barclays 1-3 Month U.S. Treasury Bill Index.

**ssga.com**

**Information Classification: General**

**State Street Global Advisors**
One Financial Center
Boston, MA 02210
1-866-787-2257

**Glossary**

**NAV** The market value of a mutual fund’s or ETFs total assets, minus liabilities, divided by the number of shares outstanding.

**Market Value** Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days.

**Gross Expense Ratio** The fund’s total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund’s most recent prospectus.

**30 Day SEC Yield** Also known as Standardized Yield. An annualized yield that is calculated by dividing the net investment income earned by the fund over the most recent 30-day period by the current maximum offering price.

**Index Average Yield to Worst** The lowest potential yield that can be received on a bond without the issuer actually defaulting. The YTW is calculated by making worst-case scenario assumptions on the issue by calculating the return that would be received if the issuer uses provisions, including prepayments. When aggregating YTW for a portfolio level statistic, the weighted average of the YTW and market value for each security is used.

**Option Adjusted Duration** An option-adjusted measure of a bond’s (or portfolio’s) sensitivity to changes in interest rates calculated as the average percentage change in a bond’s value (price plus accrued interest) under shifts of the Treasury curve +/-100 bps. Incorporates the effect of embedded options for corporate bonds and changes in prepayments for mortgage-backed securities.

**Option Adjusted Spread** A measurement of a fixed-income security rate and the risk-free rate of return, which is then adjusted to take into account an embedded option.

**Quality Breakdown** Bloomberg uses the "middle rating" of Moody’s, S&P, and Fitch to determine a security’s index classification. If only two of the agencies rate a security, then the most conservative (lowest) rating will be used. If only one rating agency rates a security, that one rating will be used. Where there are no security level ratings, an issuer rating may be used to determine index classification.

**Bloomberg Index breakdowns** are grouped into larger categories. For example, AAA+ and AAA are listed as Aaa; AA1, AA2, and AA3 are listed as Aa, etc.

**Important Risk Information**

Weights are as of the date indicated, are subject to change, and should not be relied upon as current thereafter.

Investing involves risk including the risk of loss of principal.
