

SPDR[®] S&P Kensho Clean Power ETF

CNRG

Fund Inception Date

10/22/2018

CUSIP

78468R655

Key Features

- The SPDR S&P Kensho Clean Power ETF seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the S&P Kensho Clean Power Index (the "Index")
- Seeks to track an index utilizing artificial intelligence and a quantitative weighting methodology to capture companies whose products and services are driving innovation behind the clean energy sector, which includes the areas of solar, wind, geothermal, and hydroelectric power

About This Benchmark

The S&P Kensho Clean Power Index (the "Index") is comprised of U.S.-listed equity securities (including depositary receipts) of companies domiciled across developed and emerging markets worldwide which are included in the Clean Power sector as determined by a classification standard produced by S&P Dow Jones Indices LLC (the "Index Provider"). The Index is designed to capture companies whose products and services are driving innovation behind clean power.

Total Return	Cumulative		Annualized			Since Fund Inception
	QTD	YTD	1 Year	3 Year	5 Year	
NAV (%)	47.36	60.54	89.59	N/A	N/A	60.68

Index (%)	47.50	59.99	89.13	34.92	N/A	60.95
		(%)				(%)
Gross Expense Ratio		0.45	30 Day SEC Yield			0.84

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit ssga.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

Prior to 06/25/2019, the SPDR S&P Kensho Clean Power ETF was known as the SPDR Kensho Clean Power ETF. Prior to 06/25/2019, the ticker for CNRG was XKCP.

Important Risk Information:

Clean power companies may be highly dependent upon government subsidies, contracts with government entities, and the successful development of new and proprietary technologies. Clean power companies may be affected by competition from new and existing market entrants, obsolescence of technology, short product cycles, changes in exchange rates, imposition of import controls, and depletion of resources. In addition, seasonal weather conditions, fluctuations in supply of and demand for clean energy products or services, and international political events may cause fluctuations in the performance of clean power companies and the prices of their securities. Risks associated with fluctuations in energy prices and supply and demand of alternative energy fuels, energy conservation, the success of exploration projects and tax and other government regulations can significantly affect clean power companies.

When the **Fund focuses its investments** in a particular industry or sector, financial, economic, business, and other developments affecting issuers in that industry, market, or economic sector will have a greater effect on the Fund than if it had not done so.

Index-based funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Totals may not equal 100 due to rounding.

Definitions: NAV - The market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Market Value** - Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days. **Gross Expense Ratio** - The fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus. **30 Day SEC Yield** - (Also known as Standardized Yield) An annualized yield that is calculated by dividing the net investment income earned by the fund over the most recent 30-day period by the current maximum offering price. **Est. 3-5 Year EPS Growth** - Based on the underlying holdings of the fund. The actual earnings estimates for the underlying holdings are provided by FactSet, First Call, I/B/E/S Consensus, and Reuters and are used to calculate a mean 3-5 year EPS growth rate estimate. **Index Dividend Yield** - The weighted average of the underlyings' indicated annual dividend divided by price, expressed as a percentage. **Price/Earnings Ratio FY1** - The weighted harmonic average of current share price divided by the forecasted one year earnings per share for each security in the fund. Negative and positive outliers are included in the calculation. **Price/Book Ratio** - The weighted harmonic average of closing market price divided by the most recent reported book value for each security in the fund's portfolio as calculated for the last twelve months.
