

SPDR[®] Blackstone / GSO Senior Loan ETF

SRLN

Fund Inception Date

04/03/2013

CUSIP

78467V608

Key Features

- The SPDR Blackstone / GSO Senior Loan ETF seeks to provide current income consistent with the preservation of capital. In pursuing its investment objective, the Portfolio seeks to outperform the Markit iBoxx USD Liquid Leveraged Loan Index and the S&P/LSTA U.S. Leveraged Loan 100 Index by normally investing at least 80% of its net assets (plus any borrowings for investment purposes) in Senior Loans. For purposes of this 80% test, "Senior Loans" are first lien senior secured floating rate bank loans.

About The Primary Benchmark

The Markit iBoxx USD Leveraged Loan Index is comprised of about 100 of the most liquid, tradable leveraged loans, as identified by Markit's Loans Liquidity service.

About The Secondary Benchmark

The S&P/LSTA U.S. Leveraged Loan 100 Index is designed to reflect the largest facilities in the leveraged loan market. It mirrors the market-weighted performance of the largest institutional leveraged loans based upon market weightings, spreads, and interest payments.

Total Return	Cumulative		Annualized			
	QTD	YTD	1 Year	3 Year	5 Year	Since Fund Inception
NAV (%)	4.30	-0.65	1.52	3.04	3.35	2.70

	0.70				5.01	

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit ssga.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

†Primary Benchmark is Markit iBoxx USD Liquid Leveraged Loan Index. Inception date is 06/30/2006.

‡Secondary Benchmark is S&P/LSTA U.S. Leveraged Loan 100 Index. Inception date is 10/20/2008.

Important Risk Information:

Actively managed ETFs do not seek to replicate the performance of a specified index. These investments may have difficulty in liquidating an investment position without taking a significant discount from current market value, which can be a significant problem with certain lightly traded securities. The Fund is actively managed and may underperform its benchmarks. An investment in the fund is not appropriate for all investors and is not intended to be a complete investment program. Investing in the fund involves risks, including the risk that investors may receive little or no return on the investment or that investors may lose part or even all of the investment.

Investments in **Senior Loans** are subject to credit risk and general investment risk. Credit risk refers to the possibility that the borrower of a Senior Loan will be unable and/or unwilling to make timely interest payments and/or repay the principal on its obligation. Default in the payment of interest or principal on a Senior Loan will result in a reduction in the value of the Senior Loan and consequently a reduction in the value of the Portfolio's investments and a potential decrease in the net asset value ("NAV") of the Portfolio.

Bonds generally present less short-term risk and volatility than stocks, but contain interest rate risk (as interest rates rise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.

Investing in high yield fixed income securities, otherwise known as "**junk bonds**", is considered speculative and involves greater risk of loss of principal and interest than investing in investment grade fixed income securities. These Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Characteristics

Totals may not equal 100 due to rounding.

Definitions: NAV - The market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Market Value** - Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days. **Gross Expense Ratio** - The fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus. **30 Day SEC Yield** - (Also known as Standardized Yield) An annualized yield that is calculated by dividing the net investment income earned by the fund over the most recent 30-day period by the current maximum offering price. **Average Maturity in Years** - The market value-weighted average maturity of the bonds and loans in a portfolio, where maturity is defined as the stated final for bullet maturity bonds and loans. **Current 3 month LIBOR** - Current 3 month LIBOR (London Interbank Offered Rate) is the average interest rate estimated by leading banks in London that they would be charged if borrowing from other banks with a maturity of 3 months. **Percent of Loans in the Portfolio with LIBOR Floors** - The percentage of loans in the overall portfolio that contain a LIBOR Floor. A loan is issued with a LIBOR Floor to ensure the base rate does not fall below a set rate in a low or falling interest rate environment. This provides investors with protection against falling rates. **Weighted Average All in Rate** - The weighted average interest rate earned on each asset in the portfolio, expressed as a percentage. **Weighted Average Days to Reset** - The weighted average of the number of days until the floating coupon rates of each loan are reset to reflect the current LIBOR base rate on reset date. **Weighted Average LIBOR Floor** - The weighted average of the LIBOR base rate of each loan in the portfolio with a set floor. **Weighted Average Price** - The weighted average of each asset's market price relative to its face value or par value.
