

State Street Australian Equities Index Trust

Fact Sheet

31 March 2024

Equity

Fund Objective

The State Street Australian Equities Index Trust ("the Fund") seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P/ASX 200 Accumulation Index.

Investment Strategy

The S&P/ASX 200 Index ("the Index") represents the 200 largest, and most liquid, publicly listed entities in the Australian equity market and is recognised as one of the leading domestic benchmarks. In managing the Fund, we typically employ a full replication indexing methodology. We will attempt to hold each stock in approximately the same weight as it appears in the Index. As a result, the Fund does not assume active sector or security risk exposures. The Fund is suitable for investors seeking capital growth over the long term and returns consistent with the broader Australian equity market.

Prior to 31 January 2013 the performance benchmark for the Fund was the S&P/ASX All Australian 200 Accumulation Index. Past performance is not a reliable indicator of future performance. Performance returns for periods of less than one year are not annualised. The performance figures contained herein reflect Total Returns and are provided on a net and gross of fees basis. Performance figures are calculated using end-of-month exit prices except for the 'Since Inception' return which is calculated using NAV prices for the pre 1 January 2010 period, and end-of-month exit prices thereafter, assume the reinvestment of distributions and make no allowance for tax. Net performance figures are after management and transaction costs. Gross performance figures are before management costs but after transaction costs. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. The calculation method for the value added returns may show rounding differences. Source: SSGA, as at 31 March 2024.

Tracking Error (ex-Post)

	Fund (Gross)
3 Years (% p.a.)	0.09
5 Years (% p.a.)	0.08
Since Inception (% p.a.)	0.17

Tracking error measures the volatility of the difference between the returns of a fund and its associated benchmark. A larger tracking error means that the fund's return has historically deviated from the benchmark significantly, a smaller tracking error means the fund's return has historically been closer to the benchmark. Tracking error is calculated gross of fees. Source: SSGA, as at 31 March 2024.
