

State Street Global Index Plus Trust

Fund Objective

The State Street Global Index Plus Trust ("The Fund") seeks an investment return that modestly exceeds, before expenses, the performance of the MSCI World ex-Australia Index over the long term, with net dividends reinvested.

Investment Strategy

The Fund uses multiple strategies designed to take advantage of market inefficiencies and aims to produce more consistent investment performance over the long term while maintaining overall risk, style and size characteristics similar to those of the benchmark. Our process continuously ranks companies in the index, considering factors such as quality, valuation and investor sentiment.

The Fund will also exclude companies with material business activity in tobacco and controversial weapons, subject to materiality thresholds.¹

Past performance is not a reliable indicator of future performance. Performance returns for periods of less than one year are not annualised. The performance figures contained herein reflect Total Returns and are provided on a net and gross of fees basis. Performance figures are calculated using end-of-month exit prices except for the 'Since Inception' return which is calculated using NAV prices for the pre 1 January 2010 period, and end-of-month exit prices thereafter, assume the reinvestment of distributions and make no allowance for tax. Net performance figures are after management and transaction costs. Gross performance figures are before management costs but after transaction costs. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. The calculation method for the value added returns may show rounding differences.

Tracking Error (ex-Post)	Fund (Gross)
3 Years (% p.a.)	0.92
5 Years (% p.a.)	1.02
Since Inception (% p.a.)	0.80

Tracking error measures the volatility of the difference between the returns of a fund and its associated benchmark. A larger tracking error means that the fund's return has historically deviated from the benchmark significantly, a smaller tracking error means the fund's return has historically been closer to the benchmark. Tracking error is calculated gross of fees.

¹ The strategy used by the Fund relies on data from numerous external providers. This includes index data and sustainability data. There is a risk that inaccurate or incomplete data from an external provider will cause the Fund to fail to meet its objectives, either by reducing returns, or by exposure to unintended sustainability risks. Use of broad-based futures contracts may result in a small indirect economic exposure to securities that would otherwise be excluded from the Fund. Materiality thresholds are outlined in the Fund's Product Disclosure Statement and accompanying Information Booklet, available at www.statestreet.com/im. Issued by State Street Global Advisors, Australia Services Limited (AFSL Number 274900, ABN 16 108 671 441) ("SSGA, ASL"). Registered office: Level 14, 420 George Street, Sydney, NSW 2000, Australia.
