

Fund Objective

The Sub-Fund aims to outperform its benchmark index by an annualised 4% over the recommended five-year minimum investment timeframe.

Investment Policy

To seek to achieve the absolute return strategy throughout the market cycle, a tactical asset allocation strategy will be implemented exposing the sub-Fund to a wide range of asset classes and instruments across the geographical regions. The investment manager will use proprietary valuation models to select asset classes and design the portfolio.

Past performance is not a guarantee of future results.

Investing involves risk including the risk of loss of capital.

Performance returns for periods of less than one year are not annualised.

Returns are based on unit price and net of irrecoverable withholding tax.

The index returns are unmanaged and do not reflect the deduction of any fees or expenses. The index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in GBP. Please note the historic index returns for a number of benchmarks have been restated by FTSE. The historic benchmark index returns contained within this factsheet are the restated historic benchmark index returns. The fund's returns are unaffected by this restatement.

The calculation method for value added returns may show rounding differences.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

Any spreads disclosed are indicative only and are subject to the discretion of the investment manager, based on market conditions at the time of transaction.

Note: Rounding differences may occur as asset values are calculated to greater than one decimal place.

Market Regime Indicator (MRI) Evolution

Source: SSGA Investment Solutions Group, 31st December 2020.

The MRI is a proprietary advanced indicator that continuously monitors market conditions:

- Based on forward-looking public market data
- Combining factors that reflect the multi-asset and global nature of capital markets (equity/currency/bonds)
- Identifies 5 distinct market regimes within the market cycle

The data displayed is not indicative of the past or future performance of any SSGA product. The portion of results through 3/31/2011 represents a back-test of the MRI model, which means that those results were achieved by means of the retroactive application of the model which was developed with the benefit of hindsight. Data displayed beyond this date is not back tested, but is still generated by the model referenced. All data shown above does not represent the results of actual trading, and in fact, actual results could differ substantially, and there is the potential for loss as well as profit. The Market Regime Indicator (MRI) is a quantitative framework that attempts to identify the current market risk environment based on forward-looking market indicators. We believe the factors used, equity implied volatility, currency pairs implied volatility and bond spreads, are good indicators of the current risk environment as they are responsive to real-time market impacts and in theory should include all current and forward views of those markets. These factors are combined to create a single measure and used to identify one of five risk regimes: Euphoria, Low Risk, Normal, High Risk, and Crisis.

We recommend you read the MPF Key Features Document and Policy Document for full details about the Fund, including fees and risks. Please refer to the "General Risks Applicable to All Sub-Funds" and to the relevant "Sub-Fund Specific Risk Factors" sections of the "Key Features of Managed Pension Funds Limited" document, which is available at: <https://www.ssga.com/publications/firm/Key-Features-of-Managed-Pension-Funds-Limited.pdf>

Investing in the Managed Pension Fund is effected by means of an insurance policy written by Managed Pension Funds Limited, a member of the State Street group of companies. This document should not be construed as an invitation or inducement to engage in investment activity. The Managed Pension Fund is available to pension schemes (including overseas schemes) registered with HM Revenue and Customs for the purposes of Chapter 2 of Part IV of the Finance Act 2004. This document should therefore only be circulated to the Trustees of such schemes and their advisers who are deemed to be professional persons (this includes professional clients and eligible counter parties as defined by the Financial Conduct Authority). It should not be circulated to or relied upon by any other persons. In particular scheme members should consult with their employer or scheme trustee. Please note that neither State Street Global Advisors Limited or Managed Pension Funds Limited offer actuarial services and any investment service undertaken by those firms with an objective of matching projected pension fund liabilities does not include, or take responsibility for, the calculation of projected liabilities. Any illustrations exclude the impact of fees, and actual investment returns may differ from projected cashflows, these projected cashflows are not projections of any future benefit payable under a specific policy.

This document is for informational purposes only and is not an offer to sell or the solicitation of an offer to buy an interest in any funds and is not intended for public distribution. The Fund is a recognised scheme under Section 264 of the Financial Services and Markets Act 2000. The funds are not available to U.S. investors.

TER Max represents the fund's aggregate operating and management fees excluding transaction costs. Transaction costs are billed separately to the fund.
