More information about the type of ESG characteristics, ESG strategy, investment process and type of approach in the Prospectus.

Investment Objective

The Fund invests primarily in securities included in the Index. The Index aims to reflect the performance characteristics of a subset of equity securities with in the MSCI World Index (Parent Index), which are selected and weighted to reduce the weighted average greenhouse gas intensity by 30% compared to the underlying investment universe and reduce the weighted average greenhouse gas (GHG) intensity by 7% on an annualized basis. The Parent Index measures the performance of large and mid

capitalisation stocks across developed market countries. The Index excludes companies involved in controversial weapons businesses, very severe ESG controversies (red flag), very severe and severe environmental controversies (red and orange flag), tobacco manufacturing and companies assessed as having misalignment with the United Nations Global Compact Principles. Additionally, the Index methodology excludes securities of companies which derive a certain percentage of their revenues from the manufacture of shale oil and gas, arctic oil & gas, oil sands, nuclear weapons and thermal coal mining.
