Environmental, Social & Governance (ESG) Characteristics

More information about the type of ESG characteristics, ESG strategy, investment process and type of approach in the Prospectus.

Investment Strategy

The investment policy of the Sub-Fund is to track the performance of the J.P. Morgan EMBI Global Diversified ESG Screened HC Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Sub-Fund's performance and that of the Index. The Index measures the performance of publicly issued U.S. dollar-denominated fixed and floating-rate debt instruments issued by emerging market sovereign and quasi-sovereign entities. The Index applies ESG screening methodology to exclude issuers based on an assessment of their adherence to certain ESG criteria including but not limited to UNGC principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance) and exposure to controversial weapons, tobacco, thermal coal and oil sands extraction. The Index limits country exposure as defined in the Index

methodology and redistributes the excess market value Index-wide on a pro-rata basis.
