[I] Institutional Investors

Fund Objective

The objective of the Fund is to track the performance of global developed equity markets.

Investment Strategy

The investment policy of the Fund is to track the performance of the MSCI World ESG Universal Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anti-corruption and controversial weapons.

The Investment Manager seeks to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global developed equity market securities, reweighting from free-float market cap weights using certain Environmental, Social and Governance (ESG) metrics to tilt the index towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile.

Past performance is not a guarantee of future results.**Investing involves risk including the risk of loss of capital.**

The performance figures contained herein are provided on a gross and net of fees basis. Gross of fees do not reflect the deduction of advisory or other fees which could reduce the return. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in the currency stated in the Fund Facts. Calendar year inception performance returns will be partial for the year where the inception date for either the Fund in question or the historic performance-linked Fund (whichever is the earliest) falls within that period. This fund has a new inception date of 28 September 2015 due to a merger from the French domiciled SSgA World SRI Index Equity Fund. The performance table and graph shows historical data beginning from 31 March 2005.

The calculation method for value added returns may show rounding differences.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

Please note that this Fund was previously known as the State Street World SRI Index Equity Fund.

Prior to 05 October 2017, this Fund tracked the MSCI World Index.
