31 December 2024

**Share Class**

[I GBP] Institutional Investors

**Fund Objective**

The objective of the Fund is to track the performance of global emerging market equities.

**Investment Strategy**

The investment policy of the Fund is to track the performance of the MSCI Emerging Markets ESG Screened Choice Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global emerging market equities. Securities are weighted by market capitalization after screening out securities based on an assessment of their adherence to ESG criteria.

**Past performance is not a reliable indicator of future performance.****Investing involves risk including the risk of loss of capital.**

The performance figures contained herein are provided on a gross and net of fees basis. Gross of fees do not reflect the deduction of advisory or other fees which could reduce the return. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in the currency stated in the Fund Facts.

The index returns are unmanaged and do not reflect the deduction of any fees or expenses.

Performance returns for periods of less than one year are not annualised for the year where the inception date for either the Fund in question or the historic performance-linked Fund (whichever is the earliest) falls within that period.

The calculation method for value added returns may show rounding differences.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

Previous to 28 May 2021, the Fund was known as State Street Global Emerging Markets Index Equity Fund, tracking the MSCI Emerging Markets.

Previous to 1 January 2023, the Fund was known as State Street Global Emerging Markets ESG Screened Index Equity Fund.

Previous to 1 June 2024, this Fund's Benchmark was the MSCI EM EX UNGC AND CW CUST INDEX.

The R-Factor summary reflects certain sustainability characteristics only, and does not reflect the fund's performance. Certain instruments such as cash & derivatives are excluded. Sustainability analytics data is reported on a one month lag relative to the monthly performance reporting period. Please see Important Information section for more information and definitions of the sustainability Metrics presented. The stocks mentioned are not necessarily holdings invested in by SSGA. References to specific company stocks should not be construed as recommendations or investment advice. The statements and opinions are subject to change at any time, based on market and other conditions.

## Climate Metrics

Climate Metrics	Fund
Carbon Intensity (Direct + Indirect)	353.15
Weighted Average Carbon Intensity (Direct + Indirect)	264.97
Total Reserves Carbon Emissions	618.57
Scope 1 + 2 Carbon Emissions	6434009.02
TCFD Total Carbon Emissions**	85,556.15*
TCFD Carbon Footprint	101.28
TCFD Carbon Intensity	219.46
TCFD Weighted Average Carbon Intensity (WACI)	225.47
Brown Revenue %	3.46
Green Revenue %	10.11

See "Glossary" for detailed calculation notes such as missing data treatment, data lag and exclusions. Source: State Street Global Advisors, S&P Trucost, FactSet, Task Force on Climate-related Financial Disclosures (TCFD). The results are estimates based on assumptions and analysis made by State Street Global Advisors. They are not intended to represent actual results of any offering. Actual results may differ.\* The TCFD Total Carbon Emission metric allocates emissions to investors based on an equity ownership approach. In the case of commingled funds, the results represent the environmental responsibility of the entire fund's assets under management. For individual unitholder's responsibility, an apportioned responsibility can be calculated based on the individual holding percentage. \*\* The metric is not used to compare portfolios and benchmarks because the data is not normalised.

## Stewardship Profile

As of 31 Dec 2024

## Stewardship Profile

Q3 2024

<b>Number of Meetings Voted</b>	424
<b>Number of Countries</b>	16
<b>Management Proposals</b>	2,470
Votes "For"	83.12%
Votes "Against"	16.88%
<b>Shareholder Proposals</b>	158
With Management	91.77%
Against Management	8.23%

Figures are based on State Street Global Advisors' general approach to voting at the companies held by the Fund at quarter end. This information is not a substitute for a proxy voting report, which can be requested through your relationship manager. State Street Global Advisors votes its clients' proxies where the client has delegated proxy voting authority to it, and State Street Global Advisors votes these proxies and engages with companies in the manner that we believe will most likely protect and promote the long-term economic value of client investments, as described in our Global Proxy Voting and Engagement Policy.

The Sustainability information presented above intend to provide transparency to investors around sustainability characteristics of the fund. Presenting this information should not be construed as a representation of the fund's current or future investment objective, nor should it be viewed as an indicator of the fund manager's current or future investment decision-making.

For information regarding the fund's SFDR category, investors are encouraged to review the fund's [prospectus/KIID].

Investors should not evaluate an investment in the fund based solely on the information above, rather investors should consider other factors, including the fund's overall investment objective and risk profile. Investors are encouraged to review the fund's [<https://www.ssga.com/fund-finder?tab=documents>] for more information regarding the fund.

The third-party information above has been obtained from sources believed to be reliable as of the date indicated, but its accuracy is not guaranteed. SSGA is not liable for investment decisions based on this information and it should not be relied on as such. There is no representation or warranty as to the current accuracy, reliability or completeness of this information

**R-Factor** R-Factor is a sustainability score developed by State Street Global Advisors that leverages multiple data sources and aligns them to the widely accepted, transparent Sustainability Accounting Standards Board Materiality Framework for over 12,000 publicly listed companies. SSGA uses R-Factor as a quantitative input to a variety of investment solutions and as a metric in relevant reports and factsheets.

**R-Factor Scores** are comparable across industries. The R-Factor scores are designed to be based on issues that are material to a company's industry and regulatory region. A uniform grading scale allows for interpretation of the final company level score to allow for comparison across companies.

**The R-Factor scoring** process is based on the framework published by the Sustainability Accounting Standards Board ("SASB"). The SASB framework attempts to identify sustainability risks that are financially material to the issuer-based on its industry classification. The R-Factor scores are determined using only those metrics from the sustainability data providers that specifically address sustainability risks identified by the SASB framework as being financially material to the issuer-based on its industry classification.

The returns on a portfolio of securities which exclude companies that do not meet the portfolio's specified sustainable investing criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's sustainable investing criteria may result in the portfolio investing in industry sectors or securities which underperform the market as a whole.

**R-Factor Profile** Within each industry group, issuers are classified into five distinct sustainability performance groups based on which percentile their R-Factor scores fall into. A company is classified in one of the five sustainability performance classes (Laggard - 10% of universe, Underperformer - 20% of universe, Average Performer - 40% of universe, Outperformer - 20% of universe or Leader - 10% of universe) by comparing the company's R-Factor score against a band. R-Factor scores are normally distributed using normalized ratings on a 0-100 rating scale.

Discrepancy between the number of holdings in the R-Factor Summary versus the number of holdings in the regular reporting package may arise as the R-Factor Summary is counted based on number of issuers rather than number of holdings in the portfolio.

**Green Revenue %:** Percentage of revenues from green or low-carbon technology products/business, as classified by FTSE LCE system

**Brown Revenue (%):** Percentage of revenues from "brown" sectors, extractive sectors as classified by S&P Trucost

**TCFD Weighted Average Carbon Intensity** - Portfolio's exposure to carbon-intensive companies, expressed in tonnes CO<sub>2</sub>e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).

**TCFD Total Carbon Emissions** - The absolute greenhouse gas emissions associated with a portfolio, expressed in tonnes CO<sub>2</sub>e. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

**TCFD Carbon Footprint** - Total carbon emissions for a portfolio normalized by the market value of the portfolio, expressed in tonnes CO<sub>2</sub>e / \$M invested. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

**TCFD Carbon Intensity** - Volume of carbon emissions per million dollars of revenue (carbon efficiency of a portfolio), expressed in tonnes CO<sub>2</sub>e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

#### Gender Diversity

We are currently using FactSet's own "People" dataset to disclose the number of women on the board, for each company in the Fund's portfolio.

Data and metrics have been sourced as follows from the following contributors as of the date of this report, and are subject to their disclosures below. All other data has been sourced by SSGA.

**Trucost Sections** Carbon Intensity (Direct+Indirect), Weighted Average Carbon Intensity (Direct+Indirect), Total Carbon Emissions, Carbon Footprint.
