

State Street Target Retirement Fund - Class K

SSFOX

Fact Sheet
Multi-Asset

As of 09/30/2025

Fund Objective

The investment objective of the State Street Target Retirement Fund is to seek current income and, secondarily, capital growth.

Process

SSGA Funds Management, Inc., ("SSGA FM" or the "Adviser"), the investment adviser to the Fund, manages the Target Retirement Fund using a proprietary asset allocation strategy. The Fund is a "fund of funds" that invests in a combination of mutual funds and ETFs sponsored by the Adviser or its affiliates (the "Underlying Funds"). The Underlying Funds may invest in a wide variety of asset classes, including equity and fixed-income securities of issuers anywhere in the world, including emerging markets investments, and including, among others, high yield, commodity, and real estate investments. The Underlying Funds may invest in obligations of domestic U.S. issuers, non-U.S. issuers, or both. Over time, the allocation to asset classes and funds change according to a predetermined "glide path". (The glide path represents the shifting of asset classes over time and does not apply to the Target Retirement Fund.) Each Fund's asset allocation will become more conservative as it approaches its target retirement date.

Key Features

- Seeks to manage key risks that investors face over time, which include shortfall, longevity, volatility and inflation.
- Ensures a disciplined approach to asset allocation with strategic forecasts and rebalancing.
- Creates diversified portfolios for participants with exposure to a broad range of cost-effective equity and fixed income asset classes.

Risk Management

State Street Investment Management measures and adjusts each Fund's risk exposure over time given the Fund's target retirement date. State Street Investment Management monitors the overall

risk of the Fund, in order to avoid unintended risk related to the Funds' target retirement date or other investment time horizon. State Street Investment Management attempts to manage risk by, among other things, monitoring asset allocation closely, maintaining diversification, and performing on-going investment reviews.

About The Primary Benchmark

The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate pass-throughs), ABS and CMBS (agency and non-agency).

About The Secondary Benchmark

The State Street Target Retirement Composite Index consists of several different indexes, and is designed to provide exposure to a variety of asset classes.

State Street Target Retirement Funds Glide Path

Investments become more conservative over time

An investment in a Target Retirement Fund is not guaranteed at any time, including on or after the target date.

Assumptions and forecasts used by State Street Investment Management in developing the Portfolio's asset allocation glide path may not be in line with future capital market returns and participant savings activities, which could result in losses near, at or after the target date year or could result in the Portfolio not providing adequate income at and through retirement. Refer to last page for index definitions.

Prior to August 24, 2021, all Bloomberg fixed income indices were known as Bloomberg Barclays fixed income indices.

Past performance is not a reliable indicator of future performance. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit www.statestreet.com/im for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. An annualized yield that is calculated by dividing the investment income earned by the fund less expenses over the most recent 30-day period by the current maximum offering price that does not take into account expense ratio subsidizations. The gross expense ratio is the fund's total annual operating expenses ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

1 Primary Benchmark is Bloomberg U.S. Aggregate Bond Index.

2 Secondary Benchmark is State Street Target Retirement Composite Index.

*The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until April 30, 2026 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, interest, taxes, extraordinary expenses, and distribution, shareholder servicing, and sub-transfer agency fees) exceed 0.09% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to April 30, 2026 except with approval of the Fund's Board of Trustees.

*The subsidized yield reflects the yield calculation with expense limitations currently in effect. Without the limitation returns would have been lower.

Asset Allocation is a method of diversification which positions assets among major investment categories. Asset Allocation may be used in an effort to manage risk and enhance returns. It does not, however, guarantee a profit or protect against loss.

Assumptions and forecasts used by SSGA FM in developing the Fund's asset allocation glide path may not be in line with future capital market returns and participant savings activities, which could result in losses near, at or after the target date year or could result in the Fund not providing adequate income at and through retirement.

SSGA Target Date Funds are designed for investors expecting to retire around the year indicated in each fund's name. When choosing a Fund, investors should consider whether they anticipate retiring significantly earlier or later than age 65, even if such investors retire on or near a fund's approximate target date. There may be other considerations relevant to Target Date Fund selection and investors should select the fund that best meets their individual circumstances and investment goals. The funds' asset allocation strategy becomes increasingly conservative as it approaches the target date and beyond. The investment risks of each Target Date Fund change over time as its asset allocation changes.

Equity securities may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions.

Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

Derivative investments may involve risks such as potential illiquidity of the markets and additional risk of loss of principal.

The value of the **debt securities** may increase or decrease as a result of the following: market fluctuations, increases in interest rates, inability of issuers to repay principal and interest or illiquidity in the debt securities markets; the risk of low rates of return due to reinvestment of securities during periods of falling interest rates or repayment by issuers with higher coupon or interest rates; and/or the risk of low income due to falling interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. This may result in a reduction in income from debt securities income. Investments in asset backed and mortgage backed securities are subject to prepayment risk which can limit the potential for gain during a declining interest rate environment and increases the potential for loss in a rising interest rate environment.

The Fund's investments are subject to

changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.
