

**Fund Objective**

The investment objective of the State Street Equity 500 Index Fund is to replicate as closely as possible, before expenses, the performance of the Standard & Poor's 500 Index.

**Process**

The Fund seeks to achieve its investment objective by investing substantially all of its investable assets in a corresponding portfolio of the State Street Equity 500 Index Portfolio (the "S&P Master Fund") that has the same investment objective as and investment policies that are substantially similar to those of the Fund. Under normal market conditions, at least 80% of its total assets will be invested (either on its own or as a part of a master/feeder structure) in stocks in the S&P® Index in proportion to their weighting in the S&P 500® Index. The Fund is not managed according to traditional methods of "active" investment management, which involve the buying and selling of securities based upon economic, financial and market analysis and investment judgment. Instead, the Fund utilizes a "passive" or "indexing" investment approach, attempting to replicate the investment performance of its benchmark through automated statistical analytic procedures.

**Performance vs Benchmark**

NAV Performance shown for the periods prior to the inception of Class I shares on September 17, 2014 reflects the historical performance of the fund's Administrative Shares adjusted to reflect the higher expenses of Class I shares, estimated for their first year of operations, including applicable 12b-1 fees.

<sup>^</sup>The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until April 30, 2023, separately with respect to each of the Fund and the Portfolio, (i) to waive up to the full amount of the advisory fee payable by the Fund or the Portfolio, and/or (ii) to reimburse the Fund or the Portfolio to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, interest, taxes, extraordinary expenses, and distribution, shareholder servicing, and sub-transfer agency fees) exceed 0.02% of the Fund's or the Portfolio's average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to April 30, 2023 except with approval of the Fund/Portfolio's Board of Trustees.

The Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.

**Derivative investments** may involve risks such as potential illiquidity of the markets and additional risk of loss of principal.

Investments in **mid-sized companies** may involve greater risks than those in larger, better known companies, but may be less volatile than investments in smaller companies.

Companies with **large market capitalizations** go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

**Equity securities** may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions.

The Fund invests by **sampling** the index, holding a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.
