

# State Street EUR Liquidity Standard VNAV Fund

## Supplement No. 6

(A sub-fund of State Street Liquidity public limited company (the “Company”) an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations and the MMF Regulations).

**This Supplement (the “Supplement”) forms part of the Prospectus dated 30 October 2019, as amended from time to time (the “Prospectus”) in relation to the Company. This Supplement should be read together with the Prospectus and Key Investor Information Document (“KIID”).** It contains information relating to State Street EUR Liquidity Standard VNAV Fund (the “Fund”).

**A Fund which invests a significant amount of its NAV in money market instruments may be considered by investors as an alternative to investing in a regular deposit account. An investment in the Fund is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The Fund is not a guaranteed investment and the principal invested in the Fund is capable of fluctuation. The risk of loss of the principal invested in the Fund is borne by the investor. The Company may not rely on external support for guaranteeing the liquidity of the Fund. The value of Shares may go down as well as up and investors may not get back any of the amount invested.**

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus. Prospective investors should review the entire Supplement, Prospectus and relevant KIID carefully. If you have any questions, you should consult your stockbroker or financial adviser. Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund. The Company and the Board listed in the “Management and Administration” section of the Prospectus, accept responsibility for the information contained in this Supplement.

## Investment Objective and Policy

**Investment Objective:** The objective of the Fund is to provide a return in excess of Euro money market rates, preserve capital and maintain a reasonable level of liquidity.

**Investment Policy:** The Investment Manager, on behalf of the Fund, combines a relative value approach (i.e. where an asset’s value is determined by taking into account the value of similar assets, looking for those that are “mispriced” relative to each other and aiming at exploiting such pricing discrepancies for the benefit of the Fund) to investing with credit quality analysis (as described in the “Credit Quality Assessment” section of the Prospectus) to identify securities that it believes will provide the greatest stability of capital and the highest probability of repayment, consistent with the Fund’s investment objective.

Investments will be purchased with the intention that they will be held until maturity, although the Investment Manager may, in its sole discretion, not hold investments to maturity.

## Permitted Investments

In order to achieve its investment objective, the Fund invests in a range of investment grade fixed and adjustable rate money market instruments which are transferable securities and primarily denominated in Euro.

The Fund has sought and received a derogation from the Central Bank in accordance with section 2.9 of the “Investment Restrictions” section of the Prospectus and accordingly may invest up to 100% of its NAV in securities issued or guaranteed by the issuers set out in that section.

The Fund may invest in:

- government securities;
- securities issued or guaranteed by Supranational Organisations;
- deposits;
- certificates of deposit;
- commercial paper;
- notes (including floating rate and medium term notes) and bonds (fixed or floating rate) issued by corporate issuers;

- asset backed commercial paper;
- when-issued government securities (i.e. securities which are traded on a price or yield basis prior to actual issuance); and
- any other money market instrument which is a transferable security that the Investment Manager deems to be of comparable credit quality and consistent with the Fund’s investment objectives and which falls within the categories specified in article 9 of the MMF Regulations.

The structured notes in which the Fund may invest must be freely transferable and comply with the UCITS Regulations for investment in such securities. The Fund will not invest in leveraged structured notes.

The Fund may also invest up to 10% of its assets in aggregate in CIS provided that they are Money Market Funds.

## Investment Restrictions

The WAM of the investments held by the Fund will be 6 months or less and the WAL of the investments held by the Fund will be 12 months or less. All investments held by the Fund will have a residual maturity of up to and including 2 years. At least 7.5% of the Fund’s assets will be daily maturing and at least 15% of the Fund’s assets will be weekly maturing (provided that money market instruments or units or shares in Money Market Funds may be included in the weekly maturing assets, up to 7.5%, provided they are able to be redeemed and settled within five Business Days). As such, the Fund is classified as a Standard MMF and its investment objective is designed to comply with that classification. Accordingly, the Fund may hold investments that the Investment Manager has assessed as having a credit quality consistent with the investment restrictions of a Standard VNAV MMF.

The Fund does not currently use FDIs and will not be leveraged.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the “Investment Restrictions and Limits” section of the Prospectus.

## Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund does not engage in the Securities Lending Programme. The Fund may engage in repurchase agreements and reverse repurchase agreements in accordance with the requirements of the “**Financial Derivative Instruments**” section of the Prospectus. It does not engage in total return swaps. The Fund’s exposure to repurchase and reverse repurchase agreements is as set out below (as a percentage of NAV).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	10%	100%

## Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. The following are the principal risks of investing in the Fund:

**Credit Risk:** Credit risk is the risk that an issuer, guarantor or liquidity provider of a fixed-income security held by the Fund may be unable or unwilling, or may be perceived as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honour its obligations. This can result in a decrease in the value of the security held.

**Interest Rate Risk:** Securities held by the Fund may decline in value because of fluctuations in market interest rates. Debt securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than debt securities with shorter durations. Changes in governmental policy, including changes in central bank monetary policy, could cause interest rates to rise rapidly, or cause investors to expect a rapid rise in interest rates. This could lead to heightened levels of interest rate volatility and liquidity risks for the fixed income markets generally and could have a substantial and immediate effect on the values of the Fund’s investments.

**Liquidity Risk:** Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund’s holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

**VNAV MMF Valuation Risk:** In certain circumstances, a portion of a VNAV MMF’s assets may be valued by the Company at fair value using prices provided by a pricing service or, alternatively, broker-dealer(s), other market intermediaries or based on such other information as the Company may in its discretion consider appropriate and not using market quotations. Portfolio holdings that are valued using techniques other than market quotations may be subject to greater fluctuation and there can be no assurance that such prices will accurately reflect the price the Fund would receive upon sale of a security and to the extent a VNAV MMF sells a security at a price lower than the price it has

been using to value the security, its NAV will be adversely affected.

## Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short or medium term horizon who want to maintain a high level of liquidity, preserve capital and receive a return in line with Euro money market rates and are prepared to accept the risks associated with an investment of this type.

## Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch Shares Classes on each Dealing Day at the relevant Dealing Price. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to the “**Shares**” section of the Prospectus for further information.

## Redemption limits

The Fund may employ liquidity management procedures in accordance with the conditions set forth in the “**Redemption**” section of the Prospectus.
