

SPDR[®] Australian Sector, Yield & ESG ETFs

Product disclosure statement

Dated 24 July 2020

About this product disclosure statement

This product disclosure statement (PDS) was issued by State Street Global Advisors, Australia Services Limited and lodged with the Australian Securities & Investments Commission (ASIC) on 24 July 2020. Neither ASIC nor the Australian Securities Exchange (ASX) take any responsibility for the contents of this PDS.

The Funds

This PDS covers these Funds (together called “the Funds”):

Fund	Ticker	ARSN
SPDR® S&P/ASX Financials EX A-REIT Fund	OZF	149 870 020
SPDR® S&P/ASX 200 Resources Fund	OZR	149 870 002
SPDR® S&P/ASX Small Ordinaries Fund	SSO	149 869 992
SPDR® MSCI Australia Select High Dividend Yield Fund	SYI	145 353 591
SPDR® S&P/ASX 200 ESG Fund	E200	641 875 970

The offer

For investors

Each Fund is a registered managed investment scheme which is an exchange traded fund (ETF) admitted on the AQUA market of the ASX and able to be traded on [various exchanges]. Personal investors can buy and sell existing Units in the Funds in the same way as shares. See [How to invest](#) on page 29 for details.

For Stockbrokers

Stockbrokers who receive this PDS in Australia can apply to receive new Units in the Funds. The offer of new Units under this PDS is only available to Stockbrokers within Australia.

1. Features of the Funds

The SPDR Australian Sector, Yield and ESG ETFs are managed investments that track a market index. As they are admitted to trading status on the AQUA market of the ASX, you can buy and sell them as easily as other securities that trade on a securities exchange.

Investment type	ETFs: managed investments tracking a market index, quoted and traded on a securities exchange.								
Objective	To match the performance of each Fund's Index before fees and costs								
Key advantages	<p>Instant diversification. Access the growth potential of a diversified portfolio of Australian assets with a single transaction.</p> <p>Fast, flexible trading. Buy and sell Units in the Funds on a securities exchange.</p> <p>Cost-effective access. Index tracking funds generally have lower management costs than actively managed funds — and SPDR Australian Sector, Yield and ESG ETFs are designed for maximum cost-effectiveness.</p> <p>Transparency. Check each Fund's current market value any time during trading hours, or view their holdings and net asset value online.</p>								
Key risks	<p>All investing involves risks, which you should read and understand before you make an investment decision.</p> <p>Some key risks of these Funds include:</p> <p>Market risks. The market price of units in the Fund, and the value of underlying assets, will fluctuate.</p> <p>Trading risks. Trading in units on a securities exchange, and applications and redemption of Units may be suspended in certain circumstances.</p> <p>Derivative risks. Although generally the approach is physical replication of the Index, a Fund may use derivatives to manage liquidity, but not to intentionally gear the Fund. There may be counterparty and other risks.</p> <p>See 2. Risks on page 22 for more information.</p>								
How to invest	<p>Investors can buy and sell Units in the Funds directly through their stockbroker.</p> <p>Stockbrokers acting as principal can apply for new Units and redeem existing Units, helping ensure supply meets investor demand. The offer in this PDS to issue new Units is available only to Stockbrokers.</p> <p>Each Fund can generally be expected to trade close to its underlying net asset value per Unit. However, if the market is disrupted or applications and redemptions are suspended, the market price and net asset value per Unit may sometimes move further apart.</p>								
Minimum investment	<p>Investors buying Units on the ASX: \$500, except for the SPDR MSCI Australia Select High Dividend Yield Fund and SPDR S&P/ASX 200 ESG Fund, where amounts less than a marketable parcel can be traded.</p> <p>Stockbrokers may apply in multiples of the following numbers of Units:</p> <table border="1"> <tbody> <tr> <td>SPDR S&P/ASX 200 Financials EX A-REIT Fund (OZF)</td> <td>50,000</td> </tr> <tr> <td>SPDR S&P/ASX 200 Resources Fund (OZR)</td> <td>50,000</td> </tr> <tr> <td>SPDR S&P/ASX Small Ordinaries Fund (SSO)</td> <td>100,000</td> </tr> <tr> <td>SPDR MSCI Australia Select High Dividend Yield Fund (SYI)</td> <td>50,000</td> </tr> </tbody> </table>	SPDR S&P/ASX 200 Financials EX A-REIT Fund (OZF)	50,000	SPDR S&P/ASX 200 Resources Fund (OZR)	50,000	SPDR S&P/ASX Small Ordinaries Fund (SSO)	100,000	SPDR MSCI Australia Select High Dividend Yield Fund (SYI)	50,000
SPDR S&P/ASX 200 Financials EX A-REIT Fund (OZF)	50,000								
SPDR S&P/ASX 200 Resources Fund (OZR)	50,000								
SPDR S&P/ASX Small Ordinaries Fund (SSO)	100,000								
SPDR MSCI Australia Select High Dividend Yield Fund (SYI)	50,000								

	SPDR S&P/ASX 200 ESG Fund (E200)	25,000
Distributions	Generally, the Funds will make distributions to investors half-yearly, for the periods ending in June and December however, the SPDR MSCI Australia Select High Dividend Yield Fund and SPDR S&P/ASX 200 ESG Fund will also pay distributions for the periods ending March and September.	
Tracking your investment	<p>Investors can view detailed information about each Fund by:</p> <ol style="list-style-type: none"> 1. Visiting asx.com.au or your Stockbroker's website to view market prices of a Unit and trading information. 2. Visiting ssga.com/au for information including: <ul style="list-style-type: none"> The net asset value per Unit. The level of the underlying Index. The components of the Fund's portfolio. 3. Reading the annual statement sent to you after the end of the June distribution period. 	
Fees	Fees normally range between 0.13% and 0.50% per annum of net asset value. See Fees and costs on page 35 for detailed information about fees and other costs.	

SPDR S&P/ASX 200 Financials EX A-REIT Fund (OZF)

Short name in this product disclosure statement:	SPDR Financials
Stock selection methodology:	Physical replication of the index
Choose this fund to access the growth potential of:	Securities in the financial sector (except those that are classified as Real Estate Investment Trusts “REITs”) that are constituents of the S&P/ASX 200 Index.

Investment Objective

The Investment Objective of SPDR S&P/ASX 200 Financial EX A-REIT Fund is to match the performance of its Index before fees and other costs.

Although the Investment Manager uses a range of strategies to help the Fund track its Index accurately, there is no assurance that the Fund will meet its objective. Neither the return of capital nor the performance of the Fund is guaranteed. See [2](#). Risks on page 22 for more information.

Investment strategy

The Investment Manager uses a passive investment strategy, investing in a portfolio of securities designed to reflect the characteristics of the Fund’s Index. Those securities can include:

- Index constituents; and
- derivative contracts, including exchange traded futures contracts and options over Index constituents, used only in limited circumstances.

Small cash balances are maintained for operational purposes.

From time to time, the Investment Manager may cause the Fund to buy or sell derivative contracts (e.g. futures contracts and options over securities comprising the relevant Index) and other investments that do not form part of the Fund’s Index. This may occur where the Investment Manager believes that the Fund’s investment objective can better be achieved by doing so. For example, derivatives may be used to manage a Fund’s exposure to the market during distribution periods, or where direct investment in a particular security or securities is not possible or practical. Derivatives will only be used in limited circumstances and will not be used to gear the Fund. See Using derivatives on page 20.

The Fund will not participate in securities lending or short sell securities.

Between distribution dates, generally income derived from each Fund’s investments will be reinvested in the securities that comprise the relevant Index. After adjusting for the effect of any derivatives, the Investment Manager limits the exposure to cash for the Fund to 5% of the Fund’s net asset value, although in practice the exposure to cash for the Fund would rarely exceed 1% of the Fund’s net asset value.

The Index

The S&P/ASX 200 Financials-x-A-REIT Index is a subset of the S&P/ASX 200 index comprising shares in approximately 26 of the largest companies involved in the financial sector (except those that are classified as REITs). This includes companies involved in activities such as banking, mortgage finance, consumer finance, specialised finance, investment banking and brokerage, asset management and custody, corporate lending, insurance, and financial investment.

Further information on that Index, including its past performance, is available on our website under the index detail section for the Fund at [ssga.com/au](https://www.ssga.com/au) or at <https://us.spindices.com/indices/equity/sp-asx-200-financials-ex-a-reit#overview>

SPDR S&P/ASX 200 Resources Fund (OZR)

Short name in this product disclosure statement:	SPDR Resources
Stock selection methodology:	Physical replication of the index
Choose this fund to access the growth potential of:	Securities involved in the metals and mining industry and energy that are constituents of the S&P/ASX 200 Index.

Investment Objective

The Investment Objective of SPDR S&P/ASX 200 Resources Fund is to match the performance of its Index before fees and other costs.

Although the Investment Manager uses a range of strategies to help the Fund track its Index accurately, there is no assurance that the Fund will meet its objective. Neither the return of capital nor the performance of the Fund is guaranteed. See [2. Risks](#) on page 22 for more information.

Investment strategy

The Investment Manager uses a passive investment strategy, investing in a portfolio of securities designed to reflect the characteristics of the Fund's Index. Those securities can include:

- Index constituents; and
- derivative contracts, including exchange traded futures contracts and options over Index constituents, used only in limited circumstances.

Small cash balances are maintained for operational purposes.

From time to time, the Investment Manager may cause the Fund to buy or sell derivative contracts (e.g. futures contracts and options over securities comprising the relevant Index) and other investments that do not form part of the Fund's Index. This may occur where the Investment Manager believes that the Fund's investment objective can better be achieved by doing so. For example, derivatives may be used to manage the Fund's exposure to the market during distribution periods, or where direct investment in a particular security or securities is not possible or practical. Derivatives will only be used in limited circumstances and will not be used to gear the Fund. See [Using derivatives](#) on page 20.

The Fund will not participate in securities lending or short sell securities.

Between distribution dates, generally income derived from the Fund's investments will be reinvested in the securities that comprise the relevant Index. After adjusting for the effect of any derivatives, the Investment Manager limits the exposure to cash for the Fund to 5% of the Fund's net asset value, although in practice the exposure to cash for the Fund would rarely exceed 1% of the Fund's net asset value.

The Index

The S&P/ASX 200 Resources Index is a subset of the S&P/ASX 200 index comprising shares in approximately 38 of the largest companies involved in the metals and mining industry (broadly classified as aluminium, non-ferrous metal mining, salt and borate mining, phosphate rock mining, gold and precious metals, producers of iron and steel and related products) and energy (including oil and natural gas, steaming and coking coal, coal seam methane gas and uranium).

Further information on the Index, including its past performance, is available on our website under the index detail section for the Fund at [ssga.com/au](https://www.ssga.com/au) or at <https://us.spindices.com/indices/equity/sp-asx-200-resources#overview>

SPDR S&P/ASX Small Ordinaries Fund (SSO)

Short name in this product disclosure statement:	SPDR Small Ordinaries
Stock selection methodology:	Physical replication of the index
Choose this fund to access the growth potential of:	Securities in the S&P/ASX 300 Index, but excluding those in the S&P/ASX 100 Index

Investment Objective

The Investment Objective of SPDR S&P/ASX Small Ordinaries Fund is to match the performance of its Index before fees and other costs.

Although the Investment Manager uses a range of strategies to help the Fund track its Index accurately, there is no assurance that the Fund will meet its objective. Neither the return of capital nor the performance of the Fund is guaranteed. See [2. Risks](#) on page 22 for more information.

Investment strategy

The Investment Manager uses a passive investment strategy, investing in a portfolio of securities designed to reflect the characteristics of the Fund's Index. Those securities can include:

- Index constituents; and
- derivative contracts, including exchange traded futures contracts and options over Index constituents, used only in limited circumstances.

Small cash balances are maintained for operational purposes.

From time to time, the Investment Manager may cause the Fund to buy or sell derivative contracts (e.g. futures contracts and options over securities comprising the relevant Index) and other investments that do not form part of the Fund's Index. This may occur where the Investment Manager believes that the Fund's investment objective can better be achieved by doing so. For example, derivatives may be used to manage the Fund's exposure to the market during distribution periods, or where direct investment in a particular security or securities is not possible or practical. Derivatives will only be used in limited circumstances and will not be used to gear the Fund. See [Using derivatives](#) on page 20.

The Fund will not participate in securities lending or short sell securities.

Between distribution dates, generally income derived from each Fund's investments will be reinvested in the securities that comprise the relevant Index. After adjusting for the effect of any derivatives, the Investment Manager limits the exposure to cash for the Fund to 5% of the Fund's net asset value, although in practice the exposure to cash for a Fund would rarely exceed 1% of the Fund's net asset value.

The Index

The S&P/ASX Small Ordinaries Index is a subset of the S&P/ASX 300 Index comprising shares included in the S&P/ASX 300 Index but not included in the S&P/ASX 100 Index. As at the date of this PDS, the Index covers approximately 12% of the Australian equity market by capitalisation.

Further information on the Index, including its past performance, is available under the index detail section for the Fund at [ssga.com/au](https://www.ssga.com/au) or at <https://au.spindices.com/indices/equity/sp-asx-small-ordinaries>.

SPDR MSCI Australia Select High Dividend Yield Fund (SYI)

Short name in this product disclosure statement:	SPDR Yield
Stock selection methodology:	Physical replication of the index
Choose this fund to access the growth potential of:	Securities with an expected dividend yield that is greater than or equal to the expected average dividend yield of the MSCI Australia Investable Market Index are selected.

Investment Objective

The Investment Objective of SPDR MSCI Australia Select High Dividend Yield Fund is to provide investment returns (before fees and other costs), that closely correspond to the performance of the Index.

Although the Investment Manager uses a range of strategies to help the Fund track its Index accurately, there is no assurance that the Fund will meet its objective. Neither the return of capital nor the performance of the Fund is guaranteed. See [2. Risks](#) on page 22 for more information.

Investment strategy

The Investment Manager uses a passive investment strategy, investing in a portfolio of securities designed to reflect the characteristics of the Fund's Index. Those securities can include:

- Index constituents; and
- derivative contracts, including exchange traded futures contracts and options over Index constituents, used only in limited circumstances.

Small cash balances are maintained for operational purposes.

From time to time, the Investment Manager may cause the Fund to buy or sell derivative contracts (e.g. futures contracts and options over securities comprising the relevant Index) and other investments that do not form part of the Fund's Index. This may occur where the Investment Manager believes that the Fund's investment objective can better be achieved by doing so. For example, derivatives may be used to manage the Fund's exposure to the market during distribution periods, or where direct investment in a particular security or securities is not possible or practical. Derivatives will only be used in limited circumstances and will not be used to gear the Fund. See [Using derivatives](#) on page 20.

The Fund does not take part in securities lending or short sell securities.

Between distribution dates, generally income derived from the Fund's investments will be reinvested in the securities that comprise the relevant index. After adjusting for the effect of any derivatives, the Investment Manager limits the exposure to cash to 5% of the Fund's Net Asset Value, although in practice the exposure to cash would rarely exceed 1% of the Fund's Net Asset Value.

The Index

The Index is a rules-based customised index of listed Australian securities expected to have a higher than average dividend yield.

Normally, around 30–45 securities will be selected from the MSCI Australia Investable Market Index excluding REITs (the “**Parent Index**”) for inclusion in the Index. However, the number of securities may be more or less than this range. MSCI seeks to select securities that offer a dividend yield that is higher than or equal to the average of the Parent Index, but a higher than average yield is not forecast or guaranteed. In selecting the securities, MSCI also applies sustainability and persistency criteria:

- Sustainability — Only securities with reasonable dividend payout are eligible for inclusion in the Index
- Persistency — Only securities with a historical track record of consistent dividend payment are included in the Index

The chosen securities are then combined using their free float adjusted market capitalisation weights.

The Index will be rebalanced each six months in May and November. At the time of rebalance, individual stock weights are capped at 10%, while the aggregate of all stock positions above 5% is capped at 40%. This approach, which is known as MSCI’s 10/40 Index Methodology, forces a degree of diversification. The minimum weight of any security in the index at the time of rebalance will be 0.25%.

MSCI “buffer” rules are applied to existing Index constituents during each rebalancing period to minimise index turnover.

Although the components of the Index will change over time, at least in the near term the rules for the Index composition are likely to produce holdings dominated by banks and other securities with a large market capitalisation. However, this could change, as stocks will be selected based on their yield and the rules-based selection criteria, not based on their sector.

The Index will not include any listed property trusts.

The Index used for the Fund is a customised version of the MSCI High Dividend Yield Methodology. Customisation has been applied in order to increase diversification, and to reflect the relatively high distributions, by international standards, in the Australian market.

The Index rules are available at

https://www.msci.com/eqb/methodology/meth_docs/MSCI_Australia_Select_High_Dividend_Yield_Index_Nov2019.pdf.

Rebalancing

In the days leading up to a rebalancing of the Index in May or November in a year, the Responsible Entity and Investment Manager may be aware that there is about to be a change in the composition of the Index. If there is expected to be a turnover of the Fund’s portfolio of 10% or more, or if a stock with a weight of more than 5% is to enter or leave the portfolio, the Responsible Entity intends to make an announcement to ASX of that fact and release details of the particular stocks as soon as appropriate, taking into account both its continuous disclosure and confidentiality obligations.

SPDR S&P/ASX 200 ESG Fund (E200)

Short name in this product disclosure statement:	SPDR ESG
Stock selection methodology:	Physical replication of the index
Choose this fund to access the growth potential of:	Securities in the S&P/ASX 200 ESG Index, a subset of the S&P/ASX 200 Index which has applied negative screenings, including ESG scores, to exclude companies with specific business activities, poor ESG scores or disqualifying United Nations Global Compact (UNGC) scores.

Investment Objective

The Investment Objective of SPDR S&P/ASX 200 ESG Fund is to match the performance of its Index before fees and other costs.

Although the Investment Manager uses a range of strategies to help the Fund track its Index accurately, there is no assurance that the Fund will meet its objective. Neither the return of capital nor the performance of the Fund is guaranteed. See [2. Risks](#) on page 22 for more information.

Investment strategy

The Investment Manager uses a passive investment strategy, investing in a portfolio of securities designed to reflect the characteristics of the Fund's Index. Those securities can include:

- Index constituents; and
- derivative contracts, including exchange traded futures contracts and options over Index constituents, used only in limited circumstances.

Small cash balances are maintained for operational purposes.

From time to time, the Investment Manager may cause the Fund to buy or sell derivative contracts (e.g. futures contracts and options over securities comprising the relevant Index) and other investments that do not form part of the Fund's Index. This may occur where the Investment Manager believes that the Fund's investment objective can better be achieved by doing so. For example, derivatives may be used to manage the Fund's exposure to the market during distribution periods, or where direct investment in a particular security or securities is not possible or practical. Derivatives will only be used in limited circumstances and will not be used to gear the Fund. See [Using derivatives](#) on page 20.

The Fund will not participate in securities lending or short sell securities.

Between distribution dates, generally income derived from the Fund's investments will be reinvested in the securities that comprise the relevant Index. After adjusting for the effect of any derivatives, the Investment Manager limits the exposure to cash for the Fund to 5% of the Fund's net asset value, although in practice the exposure to cash for the Fund would rarely exceed 1% of the Fund's net asset value.

The Index

The S&P/ASX 200 ESG Index is constructed to provide a risk/return profile similar to that of the S&P/ASX 200 Index as well as maintaining similar overall industry group weights as the S&P/ASX 200 Index, while improving ESG characteristics. This is achieved by excluding, ranking and weighting companies within the S&P/ASX 200 Index.

Construction of the S&P/ASX 200 ESG Index:

As illustrated above, the Index excludes Tobacco, Controversial Weapons and low United Nations Global Compact (UNGC) score companies and the bottom 25% companies by S&P Dow Jones Indices (“S&P DJI”) ESG score in each global GICS® industry group. It ranks companies by S&P DJI ESG score and selects companies in decreasing order of S&P DJI ESG score, targeting 75% in each S&P/ASX 200 GICS Industry group. The Index constituents are weighted by float adjusted market capitalization.

S&P DJI will modify the index eligibility rules to exclude companies that generate 5% or more of their revenue from thermal coal, specifically thermal coal extraction and power generation. This change will be implemented in conjunction with an extraordinary rebalancing which will take effect prior to the market open on Monday, September 21, 2020.

The public announcement from S&P DJ related to this change is available at:

https://us.spindices.com/documents/indexnews/announcements/20200612-1163359/1163359_spegthermalcoalconsultationresults6-12-2020.pdf?force_download=true

The S&P DJI ESG Scores are based on data gathered through its Corporate Sustainability Assessment (CSA). The CSA is recognised as one of the most advanced ESG scoring methodologies, as it draws upon 20 years of experience analysing sustainability’s impact on a company’s long-term value creation.

A company's CSA score is derived from using either company-provided data, publicly available information, or a combination thereof.

The Media & Stakeholder Analysis (MSA) forms an integral part of the Corporate Sustainability Assessment. MSA enables S&P DJI to monitor companies' sustainability performance on an ongoing basis, by assessing current controversies with potentially negative reputational or financial impacts.

Rebalancing: The index generally rebalances annually effective after the close of the last business day in April. The rebalancing reference date is the last trading day of March. In certain circumstances, the index may be rebalanced at other times throughout the year, for example, after the MSA has identified the potential impact of controversial company activities on the composition of the index.

Further information on the Index, including its past performance, is available on our website under the index detail section for the Fund at [ssga.com/au](https://www.ssga.com/au) or at <https://www.spglobal.com/spdji/en/indices/equity/sp-asx-200-esg-index>

Additional Information that applies to all the Funds

Using derivatives

Sometimes, the Investment Manager may use derivatives, such as exchange traded futures contracts and options, to ensure a Fund has enough exposure to its Index and Index constituents. For example, the Investment Manager may use derivatives to:

- Manage a Fund's exposure to the market during distributions.
- Gain exposure when a direct investment in a particular security, or securities, or market is not possible or practical.

Derivatives are only used in limited circumstances and are not used to gear a Fund. See the information in relation to each Fund set out above in relation to the use of derivatives for each Fund.

Rebalancing when an Index changes

Generally, any security removed from a Fund's Index will be sold by the Fund on the same day it is removed from the Index. On occasion, market conditions or other circumstances may result in a Fund continuing to hold securities beyond the date they have been removed from a Fund's Index.

Changing a Fund's Investment Objective or Index

Although there are no plans to change any of the Fund's Investment Objectives or strategies, the Responsible Entity does have the right to do so. Before deciding on a change to a Fund's Investment Objective or strategy, the Responsible Entity will ask the Investment Manager for its recommendations.

There are no plans to change any of the Funds' Indices. However, the Responsible Entity can do so if it becomes necessary — for example, if the Index provider substantially changes the Index or stops providing it. If that happens, the Responsible Entity may:

- Replace the Index with a similar index, minimising the impact on investors
- Announce the change to the ASX
- Take any other steps required by law or the ASX Rules.

Information about Value and Performance

Each trading day, SSGA will publish for each Fund on its website at [ssga.com/au](https://www.ssga.com/au) the net asset value of the Fund, the net asset value per Unit, the level of the Index, and the Index Basket for applications and redemptions. See Section 8 The Application and Redemption Facilities on page 56.

The following will also be available in respect of each Fund on the website at [ssga.com/au](https://www.ssga.com/au) :

- information about distributions as soon as possible after they are declared or paid;
- information describing the Fund's historical performance from the date the Fund's Units are first quoted on the ASX (when available);
- a copy of the latest PDS; and
- copies of annual reports and financial statements.

- Copies of announcements made to the ASX via the ASX Company Announcements Platform (including continuous disclosure notices and distribution information) are available under the company announcements section at asx.com.au.

We will send you annual tax statements and periodic distribution statements for each Fund in which you are a Unitholder.

Information relating to past performance is not a reliable indicator of future performance. The performance of a Fund is not guaranteed and can be volatile, particularly in the short term. Distributions from a Fund may not match distributions from the underlying securities in the Fund's Index. See Distributions may vary on page 29 of this PDS.

The value of Units in each Fund can fall as well as rise. You can obtain information on the current performance of a Fund by contacting SSGA or visiting the website ssga.com/au.

Ethical and Environmental Considerations

Each Fund's investment selections are based on the rules and criteria of the Fund's Index. As a result, decisions on the selection, retention or realisation of investments in each Fund are primarily based on its Index constituents and the Responsible Entity does not take into account labour standards, environmental, social or ethical considerations when making those decisions. The underlying index the SPDR ESG Fund tracks has had ESG screens applied, as discussed above, which allows that Fund to seek its investment returns with an ethical focus.

Also, as part of one of the largest asset managers in the world, we represent near-permanent capital and are potentially able to influence change in respect of socially responsible and sustainable business practices through engagement with investee companies or by using our, not insignificant, proxy voting power.

2. Risks

All investing involves risk and many factors can affect the performance of any investment. Here is a summary below of some of the major risks you should be aware of before investing in a SPDR Australian ETF.

General risks of investing

All investing involves risk. Generally, higher risk or volatility is incurred where there are higher expected returns. In an investment context, risk can be thought of as the likelihood that an individual's investment needs will not be met.

As with most investing, it is not guaranteed that you will earn a positive return from investing in a Fund. You may receive back less than you invested and there is no guarantee that you will receive any income. The value of your investment in a Fund can go up or down with the value of the assets of the Fund, and the value of any security quoted on a securities exchange is affected by market forces. The investment risks may result in loss of income, principal invested and possible delays in payment.

While there are many factors that may impact on the performance of any investment, the summary below sets out some of the major risks that an investor should be aware of when subscribing for units in a Fund.

Market risk

Market risk is the risk that the value of a Fund's investment portfolio may fall as a result of changes in market prices. The Funds invest in securities listed in the Australian market. Market risk is influenced by economic, technological, political and legal conditions and market sentiment, all of which can and do change.

The impact of COVID-19, and other infectious disease outbreaks that may arise in the future, could adversely affect the economies of many nations, individual issuers and capital markets in ways that cannot be foreseen. The risk of further spreading of COVID-19 has led to significant uncertainty and volatility in the financial markets and disruption to the global economy, the consequences of which are currently unpredictable. Certain of the Funds' investments are likely to have exposure to businesses that, as a result of COVID-19, experience a slowdown or temporary suspension in business activities. These factors, as well as any restrictive measures instituted in order to prevent or control a pandemic, could have a material and adverse effect on the Funds' investments and the Funds' investment objectives.

Concentration risk

When a Fund's investment portfolio is heavily weighted in one sector there is a 'concentration risk' as the Fund will be more affected by the performance of that sector than a fund that is more diversified.

Company risk

Changes in the financial condition of a company or other issuer, changes in specific market, economic, political, regulatory, geopolitical, and other conditions that affect a particular type of investment or issuer, and changes in general market, economic, political, regulatory, geopolitical and other conditions can adversely affect the price of an investment.

Derivatives risk

The investment strategy of the Funds allow for limited use of derivatives, such as exchange-traded futures and options. Derivatives are not used to leverage the assets of the Funds. Investing in derivatives may involve risks including:

- the inability to close out exchange traded futures contracts, forward contracts or options caused by an illiquid secondary market, and
- an imperfect correlation between price movements of the exchange traded futures contracts, forward contracts or options with price or currency movements of the subject portfolio securities or index.

Compared to conventional securities, derivatives can be more sensitive to changes in interest rates or to sudden fluctuations in market prices and therefore a Fund's losses may be greater if it invests in derivatives than if it invests only in conventional securities. Derivatives are also subject to credit risk because a Fund could lose money when a contracting party is unable to meet its contractual obligations in a timely manner or negative perceptions of a contracting party's ability to meet its obligations cause the derivative to decline in value.

In order to reduce risk, the Investment Manager has implemented an internal control framework governing the usage of futures contracts, forward contracts, options and other derivatives, which is subject to regular review and monitoring by the Investment Manager.

Industry risk

Industry risk is the risk that a particular industry may perform poorly. Given the manner in which the Indices are formulated, some of the Funds will not be diversified across industries.

Distributions may vary

The ability of the Funds to pay distributions depends on, among other things, the dividends and distributions declared and paid by the companies whose securities are held by the Funds. There can be no assurance that such securities will pay dividends or other distributions.

Distributions may also be impacted by gains or losses from the sale of securities.

Effect of applications on distributions

There is no assurance that the yield on a Fund's Units will be same as the yield on the securities in the Funds underlying Index. In particular, issuing Units in a Fund during a distribution period might reduce distributions per Unit, while redemptions might increase them. However, this should not impact on the overall performance of your Units.

Failure to meet investment objective

There is no assurance that the Funds will meet their respective investment objectives. For the Funds, neither the return of capital nor the performance is guaranteed.

While the Investment Manager seeks to track the performance of the relevant Index for the Funds as closely as possible, a Fund's return may not match or achieve a high degree of correlation with the return of the Index due to operating expenses, transaction costs, cash flows, regulatory requirements and operational inefficiencies.

Furthermore, the Funds should not be expected to track the performance of their relevant Index precisely due to risks outlined such as derivatives, trading and liquidity risks which may have a bearing on the composition of a Fund relative to its Index.

Regulatory and tax risks

The Funds and their investors may be adversely affected by future changes in applicable laws, including tax laws and government policy. Unitholders should consider the tax issues dealt with in the section headed **6. Tax and your** investment on page 40 of this PDS. For Stockbrokers, information about tax is in the section headed **9 Taxation** on page 66 of this PDS.

This is particularly important for Unitholders holding their Units on revenue account (other than as trading stock) as there are potentially adverse tax implications for Unitholders redeeming Units in the Fund.

Unitholders should seek tax advice on their particular circumstances.

Trading risks

Trading market in the Units

Although Units in each Fund are quoted on securities exchanges, there can be no assurance that there will be a liquid trading market for the Units in each Fund at any one time. Also a Fund may not be able to trade certain securities in its Index at a particular time due to restrictions in place.

At least one Market Maker has been appointed by the Responsible Entity in relation to each Fund to provide reasonable bids within a defined spread and for minimum volumes to facilitate trading in the Units for each Fund, but there is no guarantee that the Market Maker will be able to maintain liquidity. The Market Maker's terms of appointment may limit or exclude its liability or recourse to it by investors. Investors should be aware that the Market Maker will retain for its own account any trading profits and bear any losses which may be generated by its market making activities.

Trading in Units on securities exchanges may be suspended

Investors are not able to purchase or sell Units in a Fund on a securities exchange during any period when the exchange suspends trading of Units in the Fund such as during market disruptions. The application and redemption facility for Stockbrokers in a Fund is also likely to be suspended by the Responsible Entity if the trading of Units in the Fund is suspended: see section 8.7 Liquidity and suspension of redemptions on page 61.

Units may trade at a discount or premium to net asset value

The issue price and withdrawal amount for the Funds (based on the net asset value per Unit of the Fund) may differ from the trading price of a Unit in the Funds on a securities exchange at any particular time. It cannot be predicted whether Units will trade below, at, or above the net asset value per Unit.

Trading prices are dependent on a number of factors, including investor confidence and the level of supply and demand for Units in a Fund. Losses may be incurred, or profits reduced, if Units are purchased at a time when the market price is at a premium to the net asset value per Unit or sold at a time when the market price is at a discount to the net asset value per Unit. The application and redemption facility is designed to reduce the likelihood of Units in a Fund trading at a significant discount or premium to the relevant Net Asset Value per Unit. If the application or redemption facility for a Fund is closed on a particular day, the trading price might diverge further from the net asset value per Unit.

If Units in a Fund are trading at a discount to the Net Asset Value per Unit at a particular time, this may encourage Unitholders of a Fund who are Stockbrokers to redeem Units and, by doing so, reduce the size of a Fund.

Fluctuations of Net Asset Value, Share Premiums and Discounts risk

The net asset value of Units in a Fund will generally fluctuate with changes in the market value of a Fund's securities holdings. The market prices of Units will generally fluctuate in accordance with changes in a Fund's net asset value and supply and demand for Units on the exchange. It cannot be predicted whether Units will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Units will be closely related to, but not identical

to, the same forces influencing the securities of an Index trading individually or in the aggregate at any point in time.

The market prices of Units may deviate significantly from the net asset value per Unit during periods of market volatility. However, given that Units can be created and redeemed in creation units (unlike interests in many closed-end funds, which frequently trade at appreciable discounts from and sometimes at a premium to their net asset value), it is unlikely that large discounts or premiums to the net asset value of the Units should be sustained over long periods.

While the creation and redemption feature is designed to make it likely that Units normally will trade close to a Fund's net asset value, disruptions to creations and redemptions or market volatility may result in trading prices that differ significantly from a Fund's net asset value. If an investor purchases Units at a time when the market price is at a premium to the net asset value of the Units or sells at a time when the market price is at a discount to the net asset value of the Units, then the investor may sustain losses.

During volatile markets, the liquidity of the underlying securities in the market may be affected and a Market Maker may widen the bid-ask spreads of the Fund to reflect the spreads of the underlying securities and the increased cost of transactions. This could result in higher or lower trading prices to the net asset value. There is potential for greater price volatility near market open and market close potentially resulting in wider bid-ask spreads, and investors may want to consider avoiding trading at these times. To guard against a sudden spike or dip in price, investors should consider placing a limit order for a better control in price execution as opposed to an at market order that would instruct execution as quickly as possible without price constraints.

Liquidity risk

Liquidity Risk exists when particular investments are difficult to purchase or sell. If the Funds invest in illiquid securities or securities that become illiquid, they can reduce their returns because the Funds may be unable to sell the illiquid securities at an advantageous time or price, or may not be able to sell the securities at all. Additionally, the market for certain investments may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. In such cases, the Funds may be unable to achieve their desired level of exposure to a certain market sector and may not achieve a high degree of correlation with their Index.

Operational risk

The operation of the Funds requires the Responsible Entity, Investment Manager, Administrator and Custodian and other service providers to implement sophisticated systems and procedures. Some of these systems and procedures are specific to the operation of ETFs. Inadequacies with these systems or procedures, or the people operating them, could lead to a problem with the operation of the Funds and result in a decrease in value of Units. The Responsible Entity, Investment Manager and Administrator and Custodian have systems in place designed to minimise these risks, such as compliance and disaster recovery plans.

Other fund risks

To be admitted to trading status on the ASX, the Units in the Funds need to meet the relevant requirements of the AQUA Rules. There is no assurance that the Funds will continue to meet those requirements, which can also be changed by the ASX. The Responsible Entity may elect, in accordance with the Constitution governing the Fund and applicable law, to terminate the Funds for any reason, including if Units cease to be quoted.

Passive strategy/index risk

The Funds are managed with a passive investment strategy, attempting to track the performance of an Index. This differs from actively-managed funds, which typically seek to outperform an index. As a result, each Fund may hold constituent securities of the Index regardless of the current or projected performance of a specific security or a particular industry or market sector. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause each Fund's return to be lower than if the Funds employed an active strategy.

The Funds may not meet their investment objectives.

Index - risks of a change

If there is a significant change regarding an Index, such as if the Index provider substantially changes the Index for a Fund or stops providing it, or the Index licence agreement is terminated or the Index provider changes the rules used to calculate the Index, the Responsible Entity may need to try to find another index for the relevant Fund with similar guidelines, minimizing the impact on investors. If the Responsible Entity considers that no appropriate alternative index for the relevant Fund is available, the Responsible Entity will consider winding up the relevant Fund.

Also, in certain circumstances SSGA ASL may retire or may be removed as the Responsible Entity of a Fund. If SSGA ASL is replaced, it is possible that the new Responsible Entity could change a Fund's Index.

Application and redemption procedures – settlement risks

Applications and redemptions may not be covered by the National Guarantee Fund (NGF). In very general terms, the NGF guarantees the obligations of Stockbrokers trading on ASX. This means that there will be no claim against the NGF by the Fund in the event of a Stockbroker's default under an application or redemption.

The Funds are therefore exposed to some risk if a Stockbroker fails to comply with its settlement obligations under the application and redemption facility.

Fund specific risks

In addition to the risks set out above, there are a number of additional risks specific to investing in each particular Fund.

SPDR S&P/ASX 200 Financials EX A-REIT Fund

The securities of a relatively small number of financial services companies represent a relatively large percentage of the S&P/ASX 200 Financials x-A-REIT Index, meaning that fluctuations in the performance of the securities of a few companies in the Index may negatively impact the performance of the Fund as a whole, to a greater extent than if the Fund's assets were invested with exposure to a broader number of securities.

Companies in the financial services industry can be significantly affected by regulatory changes, changes in interest rates and the cost of capital, the rate of debt defaults, and price competition.

SPDR S&P/ASX 200 Resources Fund

Commodity Price Risk

Changes in the prices of commodities can affect the value of securities included in the Index for SPDR Resources. The value of some resources securities may rise or fall in response to a rise or fall in commodity prices.

The value of resources securities can also be influenced by investors' expectations in relation to commodity price movements as investors attempt to anticipate future changes in commodity prices.

If there is a decrease in the level of demand for raw material, the price of securities included in the Index for SPDR Resources may decrease.

The securities of a relatively small number of Resources companies represent a relatively large percentage of the S&P/ASX 200 Resources Index, meaning that fluctuations in the performance of the securities of a few companies in the Index may negatively impact the performance of the Fund as a whole, to a greater extent than if the Fund's assets were invested with exposure to a broader number of securities.

US Dollar Risk

Raw materials are commonly priced in US dollars. Changes in the US dollar to Australian dollar exchange rate can impact on the value of securities included in the Index for SPDR Resources. For example, a stronger Australian dollar may detrimentally affect the Australian dollar revenue that companies in the Index receive for products they sell internationally.

SPDR S&P/ASX Small Ordinaries Fund

While the intention is for the Investment Manager to follow a replication strategy, a sampling strategy may be employed whereby the Fund holds a high proportion but not all securities in the Index, representing the risk/return characteristics of the Index, or at different weights than those represented in the Index due to factors such as liquidity risk. This approach may lead to the fund performance deviating from the index.

Small sized companies may be more volatile, and are more likely than large and mid capitalisation companies to have relatively limited product lines, markets or financial resources, or depend on a few key employees. Returns on investments in securities of small companies could trail the returns on investments in securities of larger companies.

SPDR MSCI Australia Select High Dividend Yield Fund

Non-Diversification Risk

Non-diversification risk is the risk that the Fund may invest a larger percentage of its assets in securities of a few companies than that of a diversified fund. As a result, the Fund's performance may be disproportionately impacted by the performance of relatively few securities. For the Fund, the non-diversification risk of the underlying index is mitigated by adopting the MSCI's 10/40 Index Methodology as described in section 2.2 where maximum holding weights are applied to individual and group of individual securities. Please refer to www.msci.com for further details on how this methodology works.

Concentration Risk

Concentration risk is the risk that assets of the Fund are highly concentrated in a sector or group of sectors. To the extent that it concentrates its assets in a single sector or group of sectors, the Fund will be subject to the risk that economic, political or specific conditions that have a negative impact on that sector or group of sectors will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors.

While the Index is constructed to have an expected dividend yield that is greater than the parent index, no assurances can be made that this will be achieved in all conditions, and in particularly over shorter periods.

SPDR S&P/ASX 200 ESG Fund**ESG Investing Risk**

The Fund's incorporation of environmental, social and governance (“ESG”) considerations in its investment process, through tracking the Index for this Fund, may cause it to make different investments than funds that have a similar investment universe and/or investment style but that do not incorporate such considerations in their strategy or investment processes. Under certain economic conditions, this could cause the Fund's investment performance to be worse than similar funds that do not incorporate such considerations in their investment strategies or processes. In applying ESG criteria to its investment decisions, the Fund may forgo higher performing investments than it would invest in absent the application of the ESG investing criteria in the Index.

3. How to invest

You can buy and sell Units in a SPDR Australian ETF on a securities exchange just as quickly and easily as ASX listed securities, then track and manage your investment in the same convenient location as your Australian shareholdings.

Investing in a Fund

You can buy and sell Units in SPDR Australian Sector, Yield and ESG ETFs on a securities exchange in the same way as other securities, using the stockbroker or financial adviser of your choice. To invest in a Fund, consult your stock broker or financial adviser.

SPDR Australian Sector, Yield and ESG ETFs are quoted and admitted to trading status on the AQUA market of the ASX.

Settling transactions and registering ownership

ETF Units are transferred between buyers and sellers under the ASX Clear Operating Rules and ASX Settlement Operating Rules. Holding statements and registers are maintained in the same way as any other listed entity. For SPDR Australian ETF investors, that means you can manage and track your Units in the same way as other securities traded on a securities exchange.

Investors can choose to hold Units in the Funds either:

- on the ASX's CHESS system, usually through a stockbroker or financial adviser (your CHESS sponsor), or
- on the issuer-sponsored sub-register for the Fund.

Distributions

The Funds will make distributions to investors half-yearly, for the periods ending in June, and December, with SPDR Yield and SPDR ESG also paying distributions for the periods ending March and September.

Calculating distributions

Generally, the distributable income of a Fund for a distribution period ending on 30 June is the balance of the taxable income of the Fund for the financial year together with any additional amounts the Responsible Entity considers appropriate (excluding the gains allocated to redeeming Unitholders of the Fund as discussed below), less the amounts distributed in respect of the Fund in the previous distribution periods in the financial year.

A Fund's distributable income for each period other than on 30 June is generally the Responsible Entity's estimate of the taxable income of the Fund less so much of the taxable income of the Fund for the period attributable to the disposal of or dealing with the assets of the Fund, or such lesser amount as the Responsible Entity determines.

Distributions can be affected by Units issued or redeemed during the distribution period. The Funds' distributions per Unit may be diluted if new parcels of Units are issued during the distribution period. Conversely, redemptions during this period may increase distributions per Unit.

Distributions on redemption

The Fund's Constitutions set out rules for allocating a Fund's capital gains to Unitholders redeeming Units. This is because a Fund may realise capital gains if it disposes of assets to fund the redemption, or transfers Index Parcels to redeeming Unitholders.

Receiving and reinvesting distributions

Unitholders in the Funds generally receive their distributions within 10 business days after the distribution period has ended. In any case, under the Constitutions of the Funds distributions for all of the Funds must be paid within 60 days after the end of the relevant distribution period for SPDR Financials, SPDR Resources and SPDR Small Ordinaries and within 2 months after the end of the relevant distribution period for SPDR Yield and SPDR ESG.

As a Unitholder in a Fund, you can choose to:

- Reinvest your distributions in extra Units in a Fund, under the distribution reinvestment plan set up for each Fund by the Responsible Entity. To choose this option, complete the distribution reinvestment plan form, available from linkmarketservices.com.au. US and certain other foreign residents may not be eligible to take part in the plan.
- Receive distributions as a funds transfer to a nominated account. To choose this option, make sure you have given us your account details before the end of the distribution period. If we do not receive your account details before that time, we will automatically reinvest your distributions under the distribution reinvestment plan or, if you are a US resident, pay them by cheque.

For more information

View your Funds distribution reinvestment plan and download distribution election forms: linkmarketservices.com.au

View a detailed distribution history for the Fund online: ssga.com/au.

Find out more about the allocation of capital gains on redemption in Section 6, 8.6 and 9.

Managing your investment

We make it easy to track investment transactions, fund performance and key financial data, with up-to-date information available online 24 hours a day. Here are three different ways to track and manage your investment.

1. Track your investment

You can track current market prices and market depth for the Funds on the securities exchange on which they are traded, in the same way as for other securities traded on the exchanges. You can also view important information about the Funds in the company announcements released to the ASX and published on the ASX website. They include:

- Information about the total number of Units on issue for the Funds, released within 5 business days of the end of each month.
- Announcements made to the ASX through the ASX market announcements platform, including continuous disclosure notices and distribution information.
- Financial reports with key financial data and performance information.

To get started, contact your stockbroker or financial adviser, log on to their website, or visit asx.com.au.

2. Visit our website

You can find detailed information about the Fund at ssga.com/au, updated every ASX Business Day. Visit our website for:

Information for investors

- The Funds' net asset value.
- The net asset value per Unit, calculated after the close of trading then updated on the next ASX Business Day.
- Data on the Funds' Indices.
- The Funds' portfolio of investments, and their assets.
- Information about distributions, published as soon as possible after they are determined or paid.
- The Funds' historical performance.
- The latest PDS
- Annual reports and financial statements.

Information for Stockbrokers

- Information about the components of Index Parcels to be delivered or received in respect of creations or redemptions of Units.

3. Check your annual statement

We will also send you a detailed annual tax statement and distribution statements (if required) for your investment in the Funds, helping you track fund distributions and manage your tax obligations.

Using performance information

While we are committed to providing complete and up-to-date performance information, remember that past performance isn't a reliable indicator of future performance and the performance of the Funds isn't guaranteed. Fund performances can be volatile, particularly in the short term, and the value of Units in the Funds can rise and fall, so please consider the risks before you invest.

Realising your investment

Investors can sell their Units in the Funds on a securities exchange in the same way as other securities traded on the exchange. There is also a facility that allows Stockbrokers to make withdrawals from the Funds by redeeming Units. In exceptional circumstances, other Unitholders may also be allowed to redeem Units. See [Applications and redemptions](#) on page 49 for more information.

4. Who manages your investment?

With well over three decades of global investment experience \$4.39 Tn in funds under management,¹ The State Street Global Advisors group offers you global access and a disciplined process to unlock the world's potential.

When you invest in a SPDR Australian ETF, your investment is managed and administered by members of the State Street Group, one of the world's leading providers of investment research and management services. With a heritage reaching back to 1792, the State Street Group holds and manages money for millions of people worldwide, with responsibility for 10% of the world's financial assets.² So you can be confident that your investments are in expert hands. The information below outlines the key contracts in place to manage the operation of the Funds.

The Investment Manager

State Street Global Advisors is the asset management arm of State Street Corporation. The Australian affiliate of the State Street Global Advisors group, SSGA is the Investment Manager for the Funds. As at 31 March 2020, SSGA had \$186.6 bn of funds under management.

The Investment Manager is responsible for managing and promoting each Fund. It promotes each Fund's Units and ensures its assets are managed in line with each Fund's Investment Objectives and strategy. It also has other duties, set out in the Investment Manager Alliance Deed between SSGA and the Responsible Entity.

The Responsible Entity

The Responsible Entity for the Funds is SSGA ASL, a wholly owned subsidiary of SSGA. Its duties are set out in the Corporations Act and each Fund's Constitution.

SSGA ASL operates 16 funds quoted and traded on the Australian Securities Exchange providing exposure to domestic and global equities and domestic fixed income with a total market capitalisation of \$6 billion³.

Key / material contracts

Under the Fund Constitutions, the Responsible Entity may engage related companies from the State Street Group to help administer and manage each Fund and pay them fees for their services. However, it must do so on terms that would be reasonable if the two companies were not related and were dealing at arm's length, or on terms that are more favourable to the Funds, not the service provider.

Currently, the Responsible Entity uses the following service providers.

¹ As at 31 March 2020.

² State Street and McKinsey Global Institute, Global Capital Markets, 31 March 2020.

³ Australian Securities Exchange Monthly Funds Update June 2020

Administrator and Custodian

State Street Australia Limited (SSAL) is the Administrator and Custodian for the Funds, providing custodial and accounting administration services and acting as the nominee for investors as they apply for Units. SSAL has appointed State Street Bank and Trust Company as sub-custodian, who may in turn appoint other sub-custodians. Either party can terminate the agreement, by giving 30 days' notice in writing.

If there are any conflicts of interest with other group entities such as the Administrator and Custodian, the Responsible Entity manages them by:

- documenting dealings as if they were between unrelated parties,
- ensuring that pricing reflects standard market rates, and
- negotiating dealings with separate teams within the State Street group on an arms' length basis.

These arrangements are consistent with the requirements to avoid, control or disclose conflicts set out in ASIC Regulatory Guide 181, *Licensing: Managing conflicts of interest*. We hold regular reviews of any conflicts and report the results to the Compliance Committee and the Responsible Entity's board of directors.

In addition, the sub-custodian, State Street Bank and Trust Company, holds any cash balances of the Funds on deposit. The sub-custodian is an Authorised Deposit-taking Institution.

Registrar

Link Market Services Limited maintains each Fund's register of Unitholders under a Registry Deed.

The term of the Registry Deed expired on 1 April 2020, but the deed has automatically renewed for a further one year term as the required 90 days' notice of termination was not given by either party before the end of the relevant term. As at the date of this document, neither party has provided such notice.

Index providers

The Funds have contracts with the issuers of the Indices used in tracking the performance of the Funds.

The contracts can be terminated by the issuers if:

- the Investment Manager breaches the licence agreement,
- the law changes so the issuers are unable to licence the Indices, or
- the Investment Manager damages the issuers' reputation or goodwill.

Investment Manager Alliance Deed

Under the Investment Manager Alliance Deed, the Investment Manager is appointed by the Responsible Entity to undertake, for the Fund, promotional and distribution activities and investment management services. The Investment Manager can request the Responsible Entity to retire if the Responsible Entity considers its retirement is appropriate, having regard to its duties under the Fund's Constitution, the Corporations Act or other relevant law, and the retirement follows the procedures set out in the Corporations Act.

The Investment Manager Alliance Deed also gives the Responsible Entity the power to cancel the Investment Manager Alliance Deed if the Investment Manager:

- becomes insolvent,
- sells or transfers one of its main businesses or undertakings (except when all parties involved give it written approval to sell it to a related body corporate for corporate restructuring),
- ceases to carry on business as an investment manager or promoter,
- ceases to be a member of the State Street Group, or
- either:
 - (i) breaches any material provision of the Investment Manager Alliance Deed, or

- (ii) fails to observe or perform any material representation, warranty or undertaking given by it under the deed that results or is likely to result in the Responsible Entity breaching its legal duty as Responsible Entity, and fails to remedy the breach within a reasonable time after being requested to do so by the Responsible Entity.

If the Responsible Entity terminates the Investment Manager Alliance Deed, the Investment Manager must pay all of the Responsible Entity's costs and expenses that it does not recover from each Fund.

5. Fees and other costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the fund or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) website (www.moneysmart.gov.au) has a managed investment fee calculator to help check out different fee options.

Fees and costs

This section lists the fees and other costs you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from Fund assets as a whole. Read it carefully to understand how they could impact your investment, then read **6. Tax and your investment** on page 40 to understand the potential tax implications.

Type of fee or cost	Amount	How and when paid
Fees when money moves in or out of a Fund		
Establishment fee The fee to open your investment	None	Not applicable
Contribution fee The fee on each amount contributed to your investment	None See Additional explanation of fees and costs below for information about Transaction costs .	Not applicable
Withdrawal fee The fee on each amount you take out of your investment	None See Additional explanation of fees and costs below for information about Transaction costs .	Not applicable
Exit fee The fee to close your investment	None	Not applicable
Management costs¹		
The fees and costs for managing your investment		
Responsible Entity fee	0.01%p.a. of net asset value of each Fund	These fees are calculated daily and paid out of the relevant Fund monthly in arrears to the Responsible Entity.

Type of fee or cost	Amount	How and when paid
Investment management fee	<ul style="list-style-type: none"> • SPDR S&P/ASX Small Ordinaries Fund — Investment management fee capped at 0.49% per annum of net asset value. • SPDR S&P/ASX 200 Resources Fund — Investment management fee capped at 0.39% per annum of net asset value. • SPDR S&P/ASX 200 Financials EX A-REIT Fund — Investment management fee capped at 0.39% per annum of net asset value. • SPDR MSCI Australia Select High Dividend Yield Fund — Investment management fee capped at 0.35% per annum of net asset value. • SPDR S&P/ASX 200 ESG Fund — Investment management fee capped at 0.12% per annum of net asset value. 	The investment management fees are calculated and accrued daily and paid out of the relevant Fund to SSGA monthly in arrears. SSGA will pay the normal operating fees and expenses ² of each Fund out of the Investment Management Fee for that Fund.
Reimbursable expenses	The Responsible Entity may recover from each Fund extraordinary expenses that were not contemplated by the Responsible Entity at the date of this PDS. All normal operating expenses relating to a Fund, including the fees of the custodian, registrar, administrator and advisers, are payable by SSGA.	Payable from the assets of the relevant Fund as incurred by the Responsible Entity or SSGA (as applicable).
Indirect costs	There are no indirect costs	Not applicable
Services fee		
Investment switching fee The fee for changing investment options	Not applicable	Not applicable

¹ See **Management Costs** in **Additional explanation of fees and costs** below. In some cases, these fees may be negotiated with wholesale clients: see **Differential fees** in the **Additional explanation of fees and costs** section.

² “Operating fees and expenses” for each Fund are defined in the Investment Manager Alliance Deed for each Fund. They include all fees and other costs which are taken into account in calculating the indirect cost ratio for the Fund, excluding the Investment Manager’s fee and including the administration, custodial (except custodian’s transaction costs), registrar and licence fees.

Additional explanation of fees and costs

Unless otherwise stated, all fees and costs for each Fund specified in this PDS (including in the worked example below) are GST inclusive, net of any input tax credits (including reduced input tax credits) available to the Fund. However, any GST that the Responsible Entity has to pay will be recovered from the Fund.

Management Costs

As at the date of this PDS, Management Costs will be capped at:

- 0.40% pa of net asset value for SPDR Financials
- 0.40% pa of net asset value for SPDR Resources
- 0.50% pa of net asset value for SPDR Small Ordinaries
- 0.35% pa of net asset value for SPDR Yield
- 0.13% pa of net asset value for SPDR ESG.

The Management Costs cap for each Fund:

- Includes the Responsible Entity's fee and the Investment Manager's fee, which covers the Funds normal operating fees and expenses.
- Includes GST (taking into account input tax credits, including reduced input tax credits).
- Does not include any extraordinary expenses that the Responsible Entity has not foreseen at the date of this PDS, such as Investor meetings or any litigation.
- Does not include transactional fees such as ordinary brokerage and transactional fees charged by custodians for settling trades, and any interest or other charges on overdrafts.

If a Fund's cap is exceeded because of unanticipated expenses, we will notify Unitholders.

Brokerage and adviser fees

Investors buying and selling Units on a securities exchange will generally pay broking fees and commissions, set by their stockbroker or financial adviser.

Differential fees

The Responsible Entity may agree with investors who are wholesale clients (as defined in the *Corporations Act*) to rebate some of the management costs for a Fund on case-by-case basis. Please contact SSGA for more information.

Transaction Fees (Stockbrokers only)

Under the Constitution for each Fund, the Responsible Entity is permitted to charge a Transaction Fee in connection with applications and redemptions of Units (typically only by Stockbrokers acting as principal). The purpose of the Transaction Fee is to ensure that continuing investors do not bear the costs incurred in connection with application and redemptions of Units. The Transaction Fee for a Fund can be an amount up to the Responsible Entity's estimate of the cost of processing an application or redemption, including brokerage, any custodian or sub-custodian fees, expenses and taxes. As at the date of this PDS, the following fees apply to each application for and redemption of Units in a Fund:

- **SPDR Financials:** \$400
- **SPDR Resources:** \$540
- **SPDR Small Ordinaries:** \$2,830
- **SPDR Yield:** \$560
- **SPDR ESG:** \$ 1,600

The fee will be added to the amount payable by a Stockbroker applicant for Units in a Fund, and deducted from the amount payable to a redeemer of Units in a Fund. It is currently a separate flat dollar fee for each Fund applying regardless of the number of Units applied for or redeemed. Transaction fees are GST inclusive. Transaction fees will be retained as an asset of the relevant Fund. In charging the Transaction Fees, none of the Responsible Entity, SSGA or any of their related bodies corporate receives any financial benefit.

The Responsible Entity may vary the application and redemption fees and will make any changes available on its website.

Transactional and operational costs

Transactional and operational costs (as defined in the Corporations Regulations) are all costs of transacting investments for the Funds, such as brokerage, bid-offer spread, settlement costs including custody costs, clearing costs and stamp duty on investment transactions. Transactional and operational costs incurred in effecting applications into and redemptions from a Fund are recovered from the applying or redeeming Stockbroker (see above) however, other transactional and operational costs may be incurred at other times to adjust a Fund's portfolio and these costs will be deducted from the assets of the Fund and reflected in the Unit price. The amount of such costs will depend on the frequency and volume of day-to-day trading. For the year ended 30 June 2020, total costs of the Funds are shown in the table below. Updated details will be posted on our website annually. The estimated transactional and operational costs may differ over time depending on the conditions of financial markets and the circumstances of the relevant Fund and are updated annually on our website ssga.com/au.

Fund	Management Costs (% per annum of net asset value)	Net transactional and operational costs* (% p.a. of net asset value)	Transaction costs recovery** (% of application or redemption) For the year to 30 June 2020
SPDR Financials	0.40	0.00	0.01
SPDR Resources	0.40	0.01	0.00
SPDR Small Ordinaries	0.50	0.07	0.00
SPDR Yield	0.35	0.08	0.01
SPDR ESG	0.13	***	***

* The net transactional and operational costs and Transactional costs recovery figures are disclosed rounded to 2 decimal places and those shown as nil were less than 0.01%. These are estimated amounts for the year to 30 June 2020, and may differ going forward with conditions of financial markets and the circumstances of the relevant Fund.

**The Transaction costs recovery represents an amount charged to applying and redeeming Stockbrokers, as a % of the value of the application or redemption, that is intended to compensate the Fund for the estimated transactional and operational costs incurred when assets are acquired and disposed of by the Funds to reflect the application or redemption.

*** As the SPDR ESG Fund is newly established, at the date of this PDS no figures are available for it.

Increases or changes to fees

Under the Constitutions, the Responsible Entity is entitled to charge a fee up to 1.0% pa of the net asset value of a Fund. The Responsible Entity can't increase its fee beyond this maximum without amending the Constitution, which would require a special resolution of Unitholders in the Fund. The Constitutions also allow for the Responsible Entity to recover expenses in relation to the proper performance of its duties, and there is no specific cap in the Constitutions on recovery of expenses (including the Investment Manager's fees). The Responsible Entity has no current plans to increase fees and would provide Unitholders with 30 days' notice before doing so.

The Transaction Fee can be an amount up to the Responsible Entity's estimate of the total costs incurred in connection with processing the application or redemption (as relevant), including any fees charged by a custodian or sub-custodian. There is no cap specified. Subject to the Corporations Act, the Responsible Entity can deem the Transaction Fee to be a lesser amount.

If the Responsible Entity decides to increase a Fund's cap or a fee, or decides to recover normal operating expenses from a Fund, it will give Unitholders no less than 30 days' notice in an announcement to the ASX, as well as meeting any other disclosure requirements set out in the *Corporations Act* or ASX Rules. The Responsible Entity's maximum fee for each Fund doesn't include GST. If it has to pay GST, then it is able to recover the cost from the relevant Funds assets.

Example of annual fees and costs

This table gives an example of how the fees and costs for this product can affect your investment over a one-year period. You should use this table to compare this product with other managed investment products. Of the 5 Funds described in this PDS, the Fund with the highest fee is shown in this example. The other Funds have lower fees.

Example: SPDR Small Ordinaries		Balance of \$50,000 with a contribution of \$5,000 during year
Contribution fee	Nil	For every additional \$5,000 you put in you won't be charged a contribution fee.
PLUS Management costs	0.50% pa	And, for every \$50,000 you have in the SPDR Small Ordinaries you will be charged \$250 each year.
EQUALS Cost of fund		For the SPDR Small Ordinaries, if you put \$5,000 into the Fund during the year and your balance in the Fund was \$50,000, then for that year you would be charged fees of: \$250* What it costs you will depend on the Fund you choose and the fees you negotiate with your financial adviser or your service provider.

* Additional fees may apply. Please refer to the above explanation of "Transaction Fees" and "Brokerage and Adviser Fees". The above example assumes that Management Costs were calculated on a balance of \$50,000. It does not take account of Management Costs that would be charged on the additional \$5,000 contributed during the year.

6. Tax and your investment

Australian tax law is complex and constantly changing, and everyone's situation is different. So, it's important to seek advice from a qualified tax professional before you invest.

This section provides general information on tax for investors holding Units in a Fund. It is a guide only, not professional tax advice. You should seek your own independent tax advice, specific to your own circumstances, before you invest.

Keeping up with tax changes

The tax information below is based on tax laws at the time this PDS was issued. Remember that the Australian tax system is in a continuing state of reform — and this is likely to increase in future.

You should closely monitor these reforms and seek your own professional advice about how an investment in a Fund could affect your tax position.

Taxation of the Funds

SPDR Financials, SPDR Resources, SPDR Small Ordinaries and SPDR Yield have elected to opt in to the Attribution Managed Investment Trust ("AMIT") regime. The Responsible Entity intends to opt SPDR ESG into the AMIT regime for its first financial year of operation.

The Responsible Entity does not expect the Funds to be subject to tax on the income of the Funds as it is intended that all taxable income of the Funds will be 'attributed' to unitholders in each income year. Instead, Unitholders pay tax on the taxable amounts attributed to them.

Other features of the AMIT regime include:

- the Funds will be deemed to be a 'fixed trust' for taxation law purposes;
- Unitholders can rely on specific legislative provisions in making year-on-year adjustments to reflect under or over; and
- the Funds' income will be attributed to investors. This attribution must be on a 'fair and reasonable' basis taking account of the Unitholder's entitlements to the Funds' income and/or capital, which must be clearly defined in the Funds' constitution.

Cost base adjustments

The cost base of the Unitholder's units in the Funds will generally be the amount the Unitholder paid for the units (including incidental costs of acquisitions and disposals). However, changes to the cost base will be required to be calculated by each of the Unitholders of the Funds on an annual basis. Where the Funds qualify as AMITs, broadly, the cost base will increase where the Funds attribute an amount of assessable income (including grossed up capital gains) or non-assessable non-exempt income and the cost base will decrease for amounts of cash distribution to which a Unitholder becomes entitled to or tax offsets attributed to the Unitholder by the Responsible Entity.

A reasonable estimate of the AMIT cost base net amount will be provided to Unitholders as part of the Attribution MIT Member Annual (AMMA) statement.

Where a Unitholder's cost base is reduced to nil, further reductions in the cost base will give rise to a capital gain for the Unitholder.

Capital account treatment

Eligible MITs may choose to treat gains and losses as capital gains and losses on certain eligible assets (shares, units and real property interest). The Funds have made this election.

Taxation of Australian resident unitholders

Distributions

Unitholders are liable for tax on the amount of taxable income which the Funds attribute to them in accordance with the AMIT regime. This will be advised to Unitholders via the AMMA statement. Unitholders must include this amount as assessable income for each financial year ending 30 June they are invested in the Fund, even if they receive the distributions in a different year, or reinvest it in more of a Fund's Units.

A Unitholder's share of taxable income may include non-cash distributions, such as foreign income tax offsets ("FITOs"). Depending on the Unitholder's circumstances, they may be able to claim a tax offset for these amounts against Australian income tax payable on foreign income. A Unitholder's entitlement to FITOs will be limited to the extent that the FITO does not relate to an amount included in assessable income, or to the extent the investors do not have sufficient overall foreign source income to utilise all of the FITOs relevant to a particular year of income. The excess FITOs cannot be carried forward to a future income year.

Other distribution components

Fund distributions may include components that are treated differently for tax purposes. For example, as well as dividends, a Fund may distribute:

- any other non-assessable income component (previously known as tax deferred components)
- a capital gains tax (CGT) gross up component (previously known as CGT concession components), and
- a net capital gain.

Other non-assessable income component

Any other non-assessable income component is generally a distribution above any net taxable income (except any CGT gross up component). For capital gains tax purposes, other non-assessable distributions usually reduce the cost base of the Units in that Fund, affecting your capital gain or loss when you dispose of them. When the amounts are greater than the cost base of the Units the excess will be treated as a capital gain.

CGT gross up components

The CGT gross up component of a distribution is essentially the capital gains tax discount claimed by a Fund when it disposes of capital assets.

Realised capital gains

Unitholders should include their realised capital gains in their tax statement with other capital gains and losses. Capital gains distributed by the Fund may benefit from the capital gains tax discount for assets held by the Fund for at least 12 months: see [Disposal of Units](#) for a general description of the capital gains tax discount.

Units held on revenue account

If you hold your Units on revenue account (for example, as part of a securities trading business or a business of investing for profit), distributions from the Fund including capital gains, other non-assessable amounts and CGT gross up amounts may be fully taxable as ordinary income, depending on your circumstances.

Disposal of Units

Redeeming or transferring Units in a Fund is considered a disposal for tax purposes. The tax consequences will depend on your circumstances.

If you hold Units on capital account, any profit you make by disposing of them will be subject to capital gains tax. If you make a capital loss, you can only use it to offset against capital gains made in the current or a future tax year. Discount capital gains must be grossed up to nominal gains, before being offset against capital losses.

Resident Individuals, trusts or complying superannuation entities may receive a discount on the capital gain on Units they have held for at least 12 months. The discount is one half for individuals and trusts (conditions apply), and one third for complying superannuation entities if certain conditions are met. However, the discount may not apply if:

- a Unitholder (and associates) holds 10% or more of the issued Units in the Fund;
- a Fund has less than 300 beneficiaries; and
- other requirements are met.

Unitholders in this situation should seek their own advice.

Companies are not eligible for the capital gains tax discount. If you hold your Units in a Fund on revenue account (for example, as part of a securities trading business or a business investing for profit), any profits may be taxed as ordinary income and you do not get a CGT discount concession.

Receipts of non-assessable income amounts (including amounts previously known as tax deferred amounts) may reduce the cost base of a member's holding in a Fund for CGT purposes. Under the AMIT regime, AMIT cost base adjustments may increase or decrease the cost base of a member's holding for CGT purposes.

Annual tax statements

Unitholders should expect to receive an AMMA statement from the Funds within 3 months after the end of each financial year. The statement will show the cash distributed, the amount and character of the determined member component attributable to each Unitholder, and a reasonable estimate of any adjustments to the Unitholder's cost base of their units.

Applications and redemptions

Applications in each Fund are limited to Stockbrokers, while redemptions are generally limited to Stockbrokers who are also Qualifying Australian Residents. The tax consequences of applications and redemptions are summarised in Section 9.

Taxation of non-resident Unitholders

Australian tax will be withheld from Australian-sourced income (excluding franked dividends) and gains distributions paid to non-resident Fund Unitholders. Withholding tax will not generally apply when the distribution comprises franked dividends, foreign-sourced income or net capital gains on assets that do not constitute taxable Australian property. Usually, taxable Australian property will only include the business assets of permanent Australian establishments, Australian real property, and non-portfolio interests in entities that hold mostly Australian real property, and the option or right to acquire any of the abovementioned CGT assets. The amounts withheld will depend on the type of income and the country of residence of the particular unitholder.

If you are a non-resident Unitholder who holds your Units on capital account, not as part of a business carried on in Australia, you should not have to pay Australian tax on capital gains realised when you dispose of your Units. However, if you hold your Units on revenue account, depending on your circumstances, you may need to pay tax in Australia on any gains you make on disposal – you should seek your own tax advice on this.

Tax File Numbers and Australian Business Numbers

You do not need to quote a Tax File Number (TFN) when you apply for Units in a Fund. However, if you do not, tax will be deducted from your income distributions at the highest marginal tax rate plus Medicare levy unless an exception applies.

Investors who hold Units in a Fund as part of a business may quote their Australian Business Number (ABN) instead of their TFN.

FATCA

The United States of America (US) and Australia have entered into an intergovernmental agreement which was signed on 28 April 2014 (Australian IGA). The Australian IGA implemented the US Foreign Account Tax Compliance Act (FATCA) which is designed to detect U.S. taxpayers who use accounts with offshore financial institutions to conceal income and assets from the Internal Revenue.

The Responsible Entity may conduct due diligence on investors to comply with the Funds' obligations under the Australian IGA. This means that you may need to give us certain information, certifications and documentation in relation to your personal and tax status for the purposes of FATCA, including at the time you apply for the issue of Units and if requested by the Responsible Entity, at any time after they have been issued.

We are obliged under the Australia IGA to report information in respect of certain Reportable Accounts and their Units. Reportable Accounts under the Australian IGA include:

- US citizens or US tax residents;
- certain types of US entities; and
- certain types of non-US entities that are controlled by one or more US citizens or US tax residents.

We will also report information on any payments we make from the Fund to 'Non-participating Financial Institutions', as defined in the Australian IGA.

If you do not provide the requested information, certifications and/or documentation, we may be required to report information about you and your Unit holding to the ATO. The Responsible Entity will attempt to take all reasonable steps to comply with its FATCA obligations and to avoid the imposition of withholding tax, however this outcome is not guaranteed.

You should consult with you tax advisers on how our due diligence and reporting obligations under the Australian IGA may affect you.

OECD Common Reporting Standard

Australia has implemented the Organisation for Economic Co-operation and Development Common Reporting Standard (the "CRS") for the automatic exchange of information which is a single global standard for the collection and reporting of information by Financial Institutions (as defined for CRS purposes) on non-resident account holders and certain accounts held by non-residents. The CRS applies in Australia from 1 July 2017. The Responsible Entity will be responsible for complying with the requirements of the CRS and may use your personal information and request further information from you for this purpose.

Accordingly, by acquiring units in the Funds, you agree to provide the Responsible Entity with certain personal identification, tax residency and related information in order to enable it to comply with its obligations in connection with FATCA and CRS, including in the future if there are any change in circumstances relating to such information. If you do not provide the requested information, certifications and/or documentation, the Responsible Entity may be required to report information about you and your Unit holding to the ATO.

GST

GST is not applicable to the issue or redemption of units, nor is it applicable to any distributions paid to Investors.

The Responsible Entity and other suppliers will generally charge each Fund GST in relation to operating fees and other amounts charged for expenses, goods or services. Currently, a Fund can only claim back a reduced input tax credit for GST on most expenses, of between 55% and 75% of the GST charged. The remaining GST is a cost to the Fund.

GST may apply to other fees charged directly to Investors. Investors should obtain their own advice as to whether an input tax credit or reduced input tax credit is available for any GST, as it will depend on their personal circumstances.

7. Other important information

Find out more about SPDR Australian Sector, Yield and ESG ETFs, including their Constitutions and governance, ASX market requirements, and the processes for Stockbrokers making applications and redemptions.

Fund Constitutions

Each Fund is governed by its Constitution. Together with the Corporations Act and the general law, the Funds' Constitutions set out:

- provisions about the way the Funds operate, and
- the rights, responsibilities and duties of the Responsible Entity and the Funds' Unitholders.

What does each Fund's Constitution cover?

Each Fund's Constitution includes provisions dealing with:

- How the assets of the Fund must be held. The Responsible Entity holds the assets of each Fund on trust for Unitholders, but may appoint a suitable custodian.
- The nature of Units and their rights. A Unit grants an investor undivided interest in the Funds' assets, subject to its liabilities — but not in a particular asset.
- Transferring Units. The Responsible Entity can refuse a transfer, subject to the ASX Rules.
- How amounts payable on issue and redemption are calculated.
- Application and redemption procedures, and provisions for suspending applications and rejecting or delaying redemption requests.
- For SPDR ESG, the right to compulsorily redeem Units where the Unitholder is not a Qualifying Investor.
- Valuation of the Funds' assets and rules for calculating its net asset value.
- Unitholders' rights to share in any Fund income, and rules allocating Fund income to redeeming Unitholders.
- The Responsible Entity's powers and how and when it can exercise them. The Responsible Entity's powers are very broad. For example, it can borrow and raise money, grant security, incur obligations and liabilities to make investments, and appoint delegates and agents.
- When the Responsible Entity may or must retire. The Responsible Entity may retire as permitted by law, and must retire when required by law.
- Unitholder meetings.
- Limitations on the Responsible Entity's liability and right of indemnity from the Fund.
- Limitations on Unitholders' liability.
- The maximum fees that the Responsible Entity can charge and the expenses that may be paid from the Fund.
- The termination of the Fund and Unitholders' rights to participate in the distribution of assets on termination.
- Compliance with the ASX Rules while the Fund is quoted on ASX.
- The right of Compliance Committee members to be indemnified from the Fund's assets.
- Handling complaints in connection with of the Fund.

(02) 9240 7600

www.ssga.com/au

Changes to the Constitutions

A Fund's Constitution binds the Responsible Entity, present and future Unitholders, and anyone who claims through them. The Responsible Entity can amend the Constitution if it reasonably believes that the amendment will not adversely affect Unitholders' rights. Otherwise, the Corporations Act requires any changes to be approved by a special resolution at a Unitholders meeting.

ASIC relief

ASIC has granted the following relief from Corporations Act requirements for the Funds, either specifically or under an instrument which can apply generally to ETFs (ASIC Class Order [CO 13/721]).

Equal treatment relief

The relief from the equal treatment requirement in section 601FC(1)(d) of the Corporations Act allows the Responsible Entity to restrict a Unitholder other than a Stockbroker from applying to redeem Units except in the exceptional circumstances of suspension as described on page **Error! Bookmark not defined.**. The relief also allows the Responsible Entity to provide information about the Index Parcel to Stockbrokers before it is made available to other investors in certain circumstances.

Redemption Facility – Relevant Interest in Fund Assets

ASIC has also granted relief in relation to each Fund under sections 655A and 673(1) of the Corporations Act by modifying section 609 of the Corporations Act to ensure that the ability to lodge a redemption request under the redemption facility offered by each Fund does not by itself give investors a relevant interest in the securities held by the Fund. The instrument clarifies that those relevant interests do not need to be taken into account by investors in relation to their obligations under the takeover and substantial holder notices regimes in the Corporations Act. The relief will not apply once the relevant Units are redeemed. For the purposes of the relief, the Responsible Entity notes that at the date of the first PDS for SPDR Financials, SPDR Resources, SPDR Small Ordinaries and SPDR Yield, because of the nature of index-based investing, those Funds' strategies were considered unlikely to result in more than 10% of any of those Funds being invested in securities of a single company or trust that is listed or otherwise subject to takeover laws. For SPDR ESG, the Fund's filtering strategy means that the proportion of the Fund invested in a single company or trust may exceed 10%, so this limb of the relief will not apply.

Ongoing Disclosure Requirements

ASIC has also granted the Responsible Entity relief in relation to each Fund under section 1020F(1)(a) of the Corporations Act from ongoing disclosure requirements in section 1017B on the condition that the Responsible Entity complies with the provisions of the Corporations Act that apply to unlisted disclosing entities as if each Fund were an unlisted disclosing entity.

No cooling off rights

Because each Fund's Units must be quoted for trading on the ASX and all applicants are wholesale clients, investors do not have any cooling off rights for an investment in the Funds.

AQUA Rules vs Listing Rules

As noted above, permission has been granted, or an application has been made to ASX for Units in each Fund to be quoted for trading on the AQUA platform of the ASX. The AQUA Rules have been designed to offer greater flexibility and are specifically designed for managed funds, ETFs and structured products.

There are some differences between quotation under the AQUA Rules and ordinary listing under the ASX Listing Rules. For example, in contrast to a listed registered managed investment scheme, for AQUA quoted units, the takeover and substantial holder provisions of the Corporations Act will not apply and the Responsible Entity may only be removed as responsible entity of a Fund by a resolution passed by at least 50% of the total votes that may be cast by members of the Fund entitled to vote on the resolution. Some of the other differences between schemes listed under the ASX Listing Rules and units quoted under the AQUA Rules are set out in the following table.

ASX Listing Rules	ASX AQUA Rules
Continuous Disclosure	
Issuers are subject to continuous disclosure requirements under ASX Listing Rule 3.1 and section 674 of the Corporations Act.	<p>Issuers of AQUA quoted products are not subject to the continuous disclosure requirements under Listing Rule 3.1 or section 674 of the Corporations Act. However, the Responsible Entity intends to comply with section 675 of the Corporations Act as if the Fund was a disclosing entity.</p> <p>AQUA product issuers are required to disclose any information the non-disclosure of which may lead to the establishment of a false market for the products. AQUA ETF issuers must also disclose to the ASX information including:</p> <ol style="list-style-type: none"> the net asset value of the ETF; distributions paid in relation to the ETF; any other information which is required to be disclosed to ASIC under section 675 of the Corporations Act.
Periodic Disclosure	
Issuers are required to disclose half-yearly and annual financial information and reports.	Issuers are not required to disclose half-yearly and annual financial information or reports. However, the Responsible Entity will be required to lodge financial reports with ASIC under the Corporations Act.
Corporate Control	
Requirements under the Corporations Act and the ASX Listing Rules relating to takeovers, share buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings apply to listed companies and schemes.	Certain requirements in the Corporations Act and the ASX Listing Rules relating to takeovers, buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings do not apply to AQUA quoted units. The Responsible Entity is subject to general Corporations Act requirements in respect of some of these matters.
Related Party Transactions	

ASX Listing Rules**ASX AQUA Rules****Continuous Disclosure**

Chapter 10 of the ASX Listing Rules relates to transactions between an entity and persons in a position to influence the entity and sets out controls over related party transactions.

Chapter 10 of the ASX Listing Rules does not apply to AQUA quoted products. Related party transactions for AQUA quoted schemes will be subject to the requirements in the Corporations Act.

Auditor Rotation Obligations

Part 2M.4 of the Corporations Act imposes specific rotation obligations on auditors of listed companies and registered schemes.

Issuers of AQUA Products are not subject to the rotation requirements in Chapter 2M.4 of the Corporations Act. The Responsible Entity must ensure that an auditor is appointed to audit compliance with the scheme's compliance plan. The auditor of the scheme's compliance plan must not be the same person who audits the scheme's financial statements, although they may be employed by the same firm.

The Market Maker

Under the AQUA Rules we have a requirement to ensure that a reasonable bid and volume is maintained in the market and provide sufficient liquidity for each of the Funds. We achieve this by appointing a market maker who acts as a buyer and seller of Units in the Funds in the market throughout the day. We have chosen a Market Maker for the Funds that we believe:

- Has experience in making markets both in Australia and globally.
- Has the financial capacity and competence to carry out their obligations under the ASX Rules.

Nonetheless, there is no guarantee that the Market Maker will fulfil obligations or continue in that position. If the Market Maker defaults on its obligations, we may replace it. Our arrangements with the Market Maker may limit or exclude its liability

As Responsible Entity, we may appoint extra Market Makers or replace a Market Maker from time to time. The agreement between the Responsible Entity and each Market Maker also allows for market-making obligations to be suspended in some circumstances, such as:

- operational disruptions
- market disruptions or unusual conditions (including those which make the Market Maker's ability to perform the market making function impossible, impracticable or unduly onerous such as a fast market)
- other events explained in the ASX Operating Rules
- applications for Units or redemption requests being rejected or suspended, or
- the Market Maker not having ASIC relief to short sell Units.

Fund governance and operation

Compliance plans

The Responsible Entity has a formal compliance plan for each Fund, outlining how the Responsible Entity will operate to ensure compliance with the Fund's Constitution and the Corporations Act.

Compliance committee

As required by the Corporations Act, each Fund has a three-member Compliance Committee, which includes two members independent of the State Street Group. The committee's primary role is to:

- check that the Responsible Entity complies with each Fund's compliance plan
- ensure that each compliance plan is adequate, and
- report certain breaches of the Corporations Act and a Fund's Constitution to the Responsible Entity or ASIC.

Continuous disclosure

We will meet reporting and disclosure obligations as if each Fund were an unlisted disclosing entity under the Corporations Act.

If a continuous disclosure notice for a Fund is required, it will be posted online at ssga.com/au, as well as being lodged with the ASX. See 1. **Track your investment** on page 30.

You can contact the Responsible Entity for copies of:

- the annual report most recently lodged with ASIC by a Fund
- any of the Funds half-year financial reports lodged with ASIC after the most recent annual report and before the date of this PDS, and
- any continuous disclosure notices for the Fund produced after the most recent annual report and before the date of this PDS.

The Responsible Entity will send a free printed or electronic copy of any of these documents within five business days of receiving a Unitholder's request. Unitholders can also view copies of any documents lodged with ASIC for the Fund at an ASIC office, or view material information about the Fund online at ssga.com/au.

Applications and redemptions

Applications

Eligible Stockbrokers can apply for new Units or redeem existing Units in each Fund, normally on each ASX Business Day.

Stockbrokers may apply for Units in multiples of the minimum Units listed on page 5. As part of this process SSAL may be appointed on behalf of the applicant as a nominee to buy Units. See 10 Applicant Nominee – Terms of Appointment

Redemptions

Unitholders can generally only redeem a Fund's Units if they are:

- a Stockbroker, and
- a Qualifying Australian Resident.

Redemptions may only be made in whole multiples of the minimum Units listed on page 6-7.

When an application for redemption of Units in a Fund is made, the redeeming Unitholder will need to pay a Transaction Fee: see **Transaction Fees** (Stockbrokers only) on page 37.

Redemptions will not be available if:

- the Fund is being wound up
- the Fund isn't a liquid scheme (as defined in section 601KA(4) of the Corporations Act), or
- the Responsible Entity suspends redemptions in the circumstances permitted under the Funds' Constitutions.

The Responsible Entity does not expect any Fund's Units to be suspended from trading on ASX. However, if a Fund's Units are suspended from trading on the ASX for more than five consecutive trading days, all Unitholders (including personal investors) will be able to request cash redemptions. If this happens:

- Units will be redeemed off-market
- the Responsible Entity will reduce the minimum redemption parcel to 500 Units or the Unitholder's balance (if it is less than 500 Units) , and
- redemption requests must be made using a form available from the Registrar, by fax or email before 1.00pm on an ASX Business Day, or they will be held over until the next ASX Business Day. See the Responsible Entity's fax and email details in the "Contact us" section at the back of this PDS.

The Registrar will generally pay the proceeds within 10 ASX Business Days of receiving the redemption request.

Even if Units in a Fund are suspended from trading on ASX for more than five consecutive trading days, redemptions will not be available if:

- the Fund is being wound up
- the Fund isn't a liquid scheme (as defined in section 601KA(4) of the Corporations Act), or
- the Responsible Entity suspends redemptions in the circumstances permitted under the Funds' Constitutions.

Calculating Unit prices

Units for the Funds are issued at an issue price calculated as follows:

$$\frac{\text{Net Asset Value}}{\text{Number of Units in issue}}$$

The Net Asset Value for a Fund is calculated by deducting its accrued fees and other costs, liabilities and provisions from the total value of the Fund's assets.

Units are redeemed at a Redemption Price calculated as the Withdrawal Amount of the Unit (which is determined in the same way as the Issue Price) minus the "Withdrawal Unit Income Entitlement" of the Unit. See Section 8.6 for more information.

To calculate the Unit prices, the Administrator will calculate the market value of each Fund's assets, using valuations in accordance with methodologies approved by the Responsible Entity. The Funds' assets are normally valued using the relevant security's closing price for the day on its relevant market.

We will exercise any discretion we have under the Constitution for the relevant Fund in relation to unit pricing in accordance with our Unit Pricing Discretionary Policy, a free copy of which is available from the Responsible Entity on request.

Holding units through CHESS

The Responsible Entity participates in the Clearing House Electronic Sub-register System (CHESS), following the ASX Rules. The Registrar maintains an electronic CHESS sub-register on behalf of each Fund.

Investors can choose to hold Units in a Fund either:

- on the CHESS sub-register for the Fund, sponsored by a broker or non-broker participant of ASX, or
- on the issuer-sponsored sub-registers for the Fund, operated by the Responsible Entity.

The CHESS sub-registers and the issuer-sponsored sub-registers for a Fund make up the Fund's registers of Units.

For Unitholders who choose to hold their Units in a Fund on the CHESS sub-register, the Registrar issues an advice setting out the number of Units that they are allocated. The Responsible Entity doesn't issue certificates to investors. Instead, at the end of each month in which a transaction has occurred for a particular holding, the ASX Settlement Corporation gives each Unitholder a holding statement (similar to a bank account statement) confirming the number of Units allotted or transferred to them. A statement is only issued where there has been a transaction during the month.

The statements also set out each Unitholder's unique Holder Identification Number (for those who hold Units through a CHESS sub-register) or Security Holder Reference Number (for those holding on the issuer-sponsored sub-register).

Unitholders may also be able to transfer Units in a Fund off market by informing the Registrar of the transfer in a form approved by the Responsible Entity. The Responsible Entity (or the Registrar) enters the details in the Unitholders' register to transfer them.

Subject to ASX Rules and AQUA Rules, the Responsible Entity may decline to register a transfer of an officially quoted Unit.

If a Fund's Unitholder dies or becomes subject to a legal disability, the Responsible Entity may only recognise the survivor (for joint holders) or their legal personal representative as able to claim the Units registered in the Unitholder's name.

Complaints

If you have a complaint, we'd like to hear from you. Please contact the Responsible Entity through the Registrar at:

Link Market Services Limited

1a Homebush Bay Dr

RHODES NSW 2138

Tel: 1300 665 385

Email: complaints@linkmarketservices.com.au

If an issue has not been resolved to your satisfaction, you can lodge a complaint with the Australian Financial Complaints Authority, or AFCA. AFCA provides fair and independent financial services complaint resolution that is free to consumers and you can contact them at:

Website: www.afca.org.au

Email: info@afca.org.au

Privacy and Anti-Money laundering

Each of the Responsible Entity, SSGA and Registrar (together, the “Entities”) may collect, hold and use personal information about investors in accordance with SSGA’s Privacy Notice available at <https://www.ssgafunds.com/general/privacy/>. Permitted purposes include to process applications for a Fund, administer Unitholders’ investments and provide Unitholders with services related to their investment. They may each also use that information to provide information about other products and services offered by the State Street Group, and for any other lawful purposes included in our Privacy Notice as amended from time to time. In certain circumstances, the Entities may be required by the Anti-Money Laundering and Counter-Terrorism Financing Act (Cth), the Financial Sector (Collection of Data) Act (Cth), the Corporations Act, the Taxation Administration Act (Cth), the Income Tax Assessment Act (Cth) and other taxation laws to collect certain personal information about investors. Each of the Entities may also collect, use and disclose an investor’s personal information to the extent required or permitted by the FATCA intergovernmental agreement entered into between the US and Australian governments dated 28 April 2014 and for other purposes as listed in the Responsible Entity and SSGA’s Privacy Policy. If an investor provides incomplete or inaccurate information, the investor’s application for a Fund may not be able to be processed and the Entities may not be able to administer the Unitholder’s investment or provide other services and assistance related to their investment. Each of the Entities may disclose investors’ personal information to companies in the State Street Group, related entities, agents, contractors or third party service providers to whom services may be outsourced such as mailing functions, distribution services, fraud monitoring systems, registry and accounting services on the basis that they deal with such information in accordance with the Responsible Entity and SSGA’s Privacy Policy. Some of these recipients may be located in other countries, including without limitation the United States, China, India and the Philippines.

A copy of SSGA’s Privacy Policy is available at www.ssga.com/au. The Privacy Policy states how personal information is managed and includes information about how a request to access and seek correction of personal information in connection with investors in the Fund can be made. The Registrar’s Privacy Policy is available at <https://www.linkmarketservices.com.au/corporate/home.html>.

An investor can seek correction of their personal information by logging in to the Registrar’s website www.linkmarketservices.com.au or by contacting the Registrar on 1300 665 385. An investor can request access to their personal information or make a complaint by contacting Link using the contact details set out above.

You can access your personal information held by us by either:

- logging on to the registry website at <http://www.linkmarketservices.com.au>; or
- sending a request to the Responsible Entity or SSGA.

If you believe your records are out of date, particularly your address, email address or adviser details, please contact SSGA or update your details by logging in to www.linkmarketservices.com.au

Anti-money laundering

The Autonomous Sanctions Act 2011, the Charter of the United Nations Act 1945, the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 and the regulations made under those Acts may restrict or prohibit payments, transactions or other dealings with assets or persons having a connection with certain countries or identified with terrorism. Dealings with any person acting on behalf of or at the direction of a person that is subject to sanctions or an entity owned or controlled by a person that is subject to sanctions under these Acts may also be prohibited.

The Entities will not make any payments, and may delay or refuse any request or transaction, if the relevant entity believes that the payment, request or transaction may be in breach of any laws or cause it to commit or participate in an offence under any law. The Entities may take any action that it reasonably believes is necessary to comply with any laws, including but not limited to disclosing any information that it holds about the investor to service providers or to any relevant regulator.

Consents and disclaimers

These entities have consented to being named in this PDS in the form and context in which they are included:

- State Street Global Advisors, Australia, Limited as Investment Manager and distributor of each Fund, in connection with the statements said in this PDS to be attributed to it, and
- S&P as a provider of Indices for several of the Funds
- MSCI as provider of the index for the SPDR MSCI Australia Select High Dividend Yield Fund.

Each party referred to in this Section does not make any statement in this PDS other than the statements referred to above. They don't accept any liability or take responsibility for any other part of this PDS.

Apart from the statements and parties referred to above, each party mentioned elsewhere in this PDS (other than the Responsible Entity) does not make any statement in this PDS or accept any liability or responsibility for any other part of this PDS.

S&P makes no representation, condition or warranty, express or implied, to the owners of the fund or any member of the public regarding the advisability of investing in securities generally or in the fund particularly or the ability of the S&P/ASX Small Ordinaries Index, S&P/ASX 200 Resources Index, S&P/ASX 200 Financials EX A-REIT Index, S&P/ASX 200 ESG Index (collectively, the "Indices") to track market performance and/or to achieve its stated objective and/or to form the basis of a successful investment strategy, as applicable. S&P licenses to the Responsible Entity and the Investment Manager ("State Street") certain trademarks and trade names as well as the Indices which are determined, composed and calculated by S&P without regard to State Street or the Funds. S&P has no obligation to take the needs of State Street or the owners of or investors in the Funds into consideration in determining, composing or calculating the Indices or any data included therein or used to calculate the Indices. S&P is not an advisor to the Funds and is not responsible for and has not participated in the determination of the prices and amount of the Funds or the timing of the issuance or sale of the Funds or in the determination or calculation of the equation by which the Funds' shares are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the Funds.

S&P does not guarantee the accuracy and/or the completeness of the Indices or any data included therein or used to calculate the Indices and S&P shall have no liability for any errors, omissions, or interruptions therein. S&P makes no representation, warranty or condition, express or implied, as to results to be obtained by State Street, owners of or investors in the Funds, or any other person or entity from the use of the Indices or any data included therein or used to calculate the Indices. S&P makes no express or implied representations, warranties or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the Indices or any data included therein. Without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including, but not limited to, lost profits) resulting from the use of the Indices or any data included therein, even if notified of the possibility of such damages.

MSCI Disclaimer

SPDR MSCI Australia Select High Dividend Yield Fund is not sponsored, endorsed, sold or promoted by MSCI Inc. (“**MSCI**”), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the “**MSCI parties**”). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by State Street. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of this financial product or any other person or entity regarding the advisability of investing in financial products generally or in this financial product particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to this financial product or the issuer or owners of this financial product or any other person or entity. None of the MSCI parties has any obligation to take the needs of the issuer or owners of this financial product or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this financial product to be issued or in the determination or calculation of the equation by or the consideration into which this financial product is redeemable. Further, none of the MSCI parties has any obligation or liability to the issuer or owners of this financial product or any other person or entity in connection with the administration, marketing or offering of this financial product. Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the financial product, owners of the financial product, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this financial product, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this financial product without first contacting MSCI to determine whether MSCI’s permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

Information for Stockbrokers

The following information up until section 12 (Glossary) is specifically for Stockbrokers applying for or redeeming units. It is not relevant for investors who acquire their Units through trading on the AQUA market.

8. The Application and Redemption Facilities

(Stockbrokers only)

Each Fund provides an in-specie application and redemption facility.

Eligible applicants and eligible Unitholders may submit application and redemption requests for a Fund, other than on the restricted dates as set out below.

The application and redemption facilities are designed to reduce the likelihood that Units in a Fund will trade on a securities exchange at a significant premium or discount to the relevant net asset value per Unit. Through the facility, eligible Stockbrokers are able to effectively take advantage of arbitrage opportunities where a premium or discount applies.

Only Stockbrokers acting as principal may submit application requests for Units in a Fund. Only Unitholders who are Qualifying Australian Residents and Stockbrokers, may submit redemption requests in relation to Units in a Fund.

Applications and redemptions

The consideration for an application for, or a redemption of, Units in a Fund is a prescribed parcel of securities which the Investment Manager will specify prior to receipt of the application for the issue or redemption of Units (an “**Index Parcel**”).

Selection and publication of parcel composition

The Index Parcel for any given application or redemption will generally correspond to the composition of the relevant Index. For further detail refer to sections 8.3 The Index Parcel to 8.6 Distributions on Redemption - Withdrawal Unit Income Entitlement below.

Information about the components of the parcel will generally be published on the website at www.ssga.com/au and via the market announcement platform of the ASX before the market opens on each ASX Business Day.

Timing

Applications for Units will settle at the Settlement Time on the second ASX Business Day after we receive the application (T+2). Redemptions for Units will settle at the Settlement Time on the second ASX Business day after we receive the redemption application. Transfers of the Index Parcel in respect of applications and redemptions may settle at different times. If the ASX standard settlement cycle changes to a shorter time, each Fund’s Constitution allows for times specified as T+2 to be shortened.

Application and redemption requests received before the Cut-off Time on an ASX Business Day are treated as being received on the day they are received. Application and redemption requests received after the Cut-off Time on an ASX Business Day, or on a day that is not an ASX Business Day, are treated as being received on the next ASX Business Day after the day they are received.

Summary of the application and redemption facilities for a Fund for Stockbrokers (acting as principal)

Who can apply for Units in a Fund?	Stockbrokers acting as principal can apply for Units in a Fund.
-------------------------------------------	-----------------------------------------------------------------

How can a Stockbroker apply for Units?	Applicants for Units must complete an Application Form, provide required information and have successfully completed the Client On-boarding process which is described in section 11 (“Completing the Application Form”).										
Who can redeem Units in a Fund?	A Stockbroker acting as principal who is a “Qualifying Australian Resident” can redeem Units in a Fund (except in the exceptional circumstances described in section 8.7 Liquidity and suspension of redemptions).										
How can a Stockbroker redeem Units?	Complete a Redemption Form.										
Applications and redemptions	<p>Applications and redemptions must be for multiples of the minimum number of Units listed below:</p> <table border="1" data-bbox="536 674 1267 936"> <tr> <td>SPDR Financials</td> <td>50,000</td> </tr> <tr> <td>SPDR Resources</td> <td>50,000</td> </tr> <tr> <td>SPDR Small Ordinaries</td> <td>100,000</td> </tr> <tr> <td>SPDR Yield</td> <td>50,000</td> </tr> <tr> <td>SPDR ESG</td> <td>25,000</td> </tr> </table> <p>An in specie application or redemption for a Fund includes two offsetting transactions: a cash transaction for Units and a cash transaction for the Index Parcel. For each multiple of the minimum number of Units in a Fund to be:</p> <ul style="list-style-type: none"> acquired, in addition to payment of the Issue Price and Transaction Fee in cash you must sell to the Responsible Entity the specified Index Parcel; and redeemed, in addition to receiving the Withdrawal Amount minus the Transaction Fee in cash, you must buy from the Responsible Entity the specified Index Parcel. <p>Settlement of issues and redemptions in relation to Units in a Fund must be effected through CHESS in accordance with the ASX Settlement Operating Rules.</p>	SPDR Financials	50,000	SPDR Resources	50,000	SPDR Small Ordinaries	100,000	SPDR Yield	50,000	SPDR ESG	25,000
SPDR Financials	50,000										
SPDR Resources	50,000										
SPDR Small Ordinaries	100,000										
SPDR Yield	50,000										
SPDR ESG	25,000										
Issue Price calculation	<p>Application Forms and Redemption Forms received before the Cut-off Time on an ASX Business Day are processed at the Issue Price or Withdrawal Amount (as applicable) for a Fund calculated as at the Valuation Time for that day.</p> <p>Application Forms and Redemption Forms received after the Cut-off Time on an ASX Business Day or on a non-ASX Business Day are processed at the Issue Price or Withdrawal Amount (as applicable) for a Fund calculated as at the Valuation Time for the next ASX Business Day.</p> <p>The Cut-off Time for applications and redemptions is 4.00pm Sydney time.</p>										
	The Redemption Price for a Fund equals the relevant Withdrawal Amount for that Fund less the Withdrawal Unit Income Entitlement for that Fund (see section 8.6). A										

Redemption Price and Withdrawal Amount calculation	Transaction Fee is payable. See below for explanations of the concepts referred to in this table.
Transaction fees	<p>As at the date of this PDS, the following Transaction Fees apply to each application for and redemption of Units in a Fund:</p> <ul style="list-style-type: none"> • SPDR Financials: \$400 • SPDR Resources: \$540 • SPDR Small Ordinaries: \$2,830 • SPDR Yield: \$560 • SPDR ESG: \$1,600 <p>For further information, see page 37 (Transaction Fees).</p>

8.1 ASX Trading and Settlement Procedures

Stockbrokers should ensure that they are familiar with the ASX's ETF procedures before applying for, or redeeming Units in a Fund. Settlement of Unit issues and redemptions must be effected through CHES in accordance with the ASX procedures.

8.2 Restricted dates

Until further notice the Responsible Entity will treat as invalid and reject Application Forms and Redemption Forms received in respect of a Fund during the period where the T+2 settlement date for those applications and redemptions would otherwise occur in the next financial year after the Application Form or Redemption Form was received.

The Responsible Entity may treat as invalid and reject Application Forms and Redemption Forms received in respect of a Fund during the period commencing at the Cut-off Time on the ASX Business Day before the date at which Units in a Fund are officially quoted on an ex-entitlement basis to the Cut-off Time on the last ASX Business Day of the relevant distribution period.

Generally, the price of Units in a Fund on the market can be expected to trade close to the underlying net asset value per Unit for a Fund. However, around the restricted dates (among other times), the price and value may move further apart because Stockbrokers are not able to engage in arbitrage through the Unit issue and redemption process.

8.3 The Index Parcel

An Index Parcel is a parcel of securities which generally corresponds to the composition of the Index applicable to the Fund ("**Index Parcel**"). The Index Parcel is determined in respect of the minimum application and redemption amount of Units (see '**Applications and redemptions**' set out in the above table). The Index Parcel is determined prior to the opening of trading for each ASX Business Day and will be made available on our website at www.ssga.com/au.

The cash component for a Fund (which can be a negative figure) is the difference between (**Cash Component**):

- the aggregate Issue Price or Withdrawal Amount (as applicable) for the minimum application and redemption amount of Units; and
- the value of the prevailing Index Parcel, as determined by the Administrator as at the Close of Trading for which the Issue Price or Withdrawal Amount is being calculated.

In simple terms, the Cash Component for a minimum application or redemption of Units is the difference between the value of the Index Parcel and the aggregate of the Net Asset Value per Unit for the minimum Units available for application. It is therefore a balancing amount that ensures there is not a negative or positive effect on existing Unitholders arising out of an application or redemption.

The Cash Component is calculated at close of business on the Trade Date.

8.4 Issue Price Calculation

The issue price for a Fund (Issue Price) is calculated as at the Valuation Time on an ASX Business Day, as follows:

$$\frac{\text{Net Asset Value of the Fund}}{\text{Number of Units in the Fund in issue}}$$

The Net Asset Value is calculated by deducting from the aggregate value of the assets of the Fund all accrued fees and other costs, liabilities and provisions relating to the Fund. Fees and other costs for a Fund, including the Responsible Entity's fees, are accrued daily. Fees and other costs for each Fund are detailed on page 35 of this PDS.

For the purposes of calculating the Issue Price for Units in a Fund, the number of Units in a Fund in issue as at the Valuation Time for an ASX Business Day includes Units which are to be issued and excludes Units which are to be redeemed under valid completed Application Forms and valid completed Redemption Forms received in respect of the Fund by the Administrator before the Cut-off Time on the previous ASX Business Day.

The aggregate Issue Price due for an application may not be paid wholly in cash. Consideration must be in the form of the relevant multiple of the prevailing Index Parcel, plus or minus the relevant multiple of the Cash Component plus the Transaction Fee for the Fund.

8.5 Redemption Price, Withdrawal Amount Calculation and Withdrawal Unit Distribution Entitlement

The Withdrawal Amount for a Fund is determined at the time of redemption. It is calculated based on the Net Asset Value of a Fund in accordance with the formula set out below.

The components of the Withdrawal Amount are the aggregate of the Redemption Price for the Fund and the Withdrawal Unit Income Entitlement for the Fund.

The split between the components of the Withdrawal Amount for a Fund are not known until after the financial year end because each of the Withdrawal Unit Income Entitlement and the Withdrawal Unit Distribution Entitlement represents a distribution of the taxable income of the Fund based on the capital gains and other taxable gains which have been realised by the Fund as a result of transferring Index Parcels to redeeming Unitholders during the financial year.

The Withdrawal Unit Income Entitlement are explained further below. The entitlement of a redeeming Unitholder to the Withdrawal Unit Income Entitlement (if any), the Withdrawal Unit Distribution Entitlement (if any) and the Redemption Price in respect of a redeemed Unit in that Fund is satisfied by the transfer from the Fund and the payment from or to the Fund of assets and cash with a net value equal to the Withdrawal Amount for a Unit in the Fund.

The Withdrawal Amount in respect of a redemption depends on the time of receipt of the Redemption Form by the Administrator. Completed Redemption Forms for a Fund that are received before the Cut-off Time on an ASX Business Day are processed at the Withdrawal Amount for the Fund calculated as at the Close of Trading on that day. Completed Redemption Forms for a Fund that are received on or after the Cut-off Time on an ASX Business Day, or on a non-ASX Business Day, are processed at the Withdrawal Amount for the Fund calculated as at the Close of Trading on the next ASX Business Day.

The Withdrawal Amount for a Fund as at the Valuation Time for an ASX Business Day is calculated as follows:

$$\frac{\text{Net Asset Value of the Fund}}{\text{Number of Units in the Fund in issue}}$$

The Net Asset Value for a Fund is calculated by deducting from the aggregate value of the assets of the Fund all accrued Fees and other costs, liabilities and provisions relating to the Fund. Fees and other costs for each Fund, including the Responsible Entity's fees, are accrued daily. Fees and other costs for each Fund are detailed in the 'Fees and other costs' section of this PDS.

For the purposes of calculating the Withdrawal Amount for a Fund, the number of Units in the Fund in issue as at the Close of Trading on an ASX Business Day includes Units in the Fund which are to be issued and excludes Units in the Fund which are to be redeemed under valid completed Application Forms and valid completed Redemption Forms received by the Administrator before the Cut-off Time on the previous ASX Business Day.

The Issue Price and Withdrawal Amount for a Fund is calculated in the same manner and therefore, in respect of a Fund, have the same value at any particular time.

The aggregate Withdrawal Amount for each Fund due in respect of a redemption may not be paid wholly in cash. Consideration will be in the form of the relevant multiple of the prevailing Index Parcel for the relevant Fund, plus or minus the relevant multiple of the Cash Component for the Fund minus the Transaction Fee for the Fund.

8.6 Distributions on Redemption - Withdrawal Unit Income Entitlement

Each Fund's Constitution contains complex provisions regarding the distribution of income on redemption. For a detailed understanding of each Fund's Constitution, potential investors in a Fund should consult a copy of a Fund's Constitution, which is available free of charge from the Investment Manager. Potential investors in a Fund should also obtain professional advice in relation to the taxation consequences of redemptions in a Fund, which may be different to the taxation consequences of selling Units in a Fund on a securities exchange.

Each Fund's Constitution contains provisions which, in broad terms, seek to allocate to redeeming Unitholders gains arising from a Fund as a result of the Index Parcels transferred to the redeeming Unitholders or the disposal of assets to pay the Withdrawal Amounts. This amount is referred to as the Withdrawal Unit Income Entitlement.

On redemption of a Unit in a Fund, the Unitholder is entitled to receive the Withdrawal Unit Income Entitlement for a Fund (if any) as well as the Redemption Price for a Fund.

The Withdrawal Unit Income Entitlement for a Fund represents a distribution of the taxable income of the relevant Fund based on the capital gains (or other gains) realised by the Fund as a result of redemptions of Units in the Fund. Such gains can arise because the in-specie transfer of securities by the relevant Fund to redeeming Unitholders will constitute a disposal of the securities by the Fund for tax purposes.

The aggregate of the Redemption Price for a Fund and Withdrawal Unit Income Entitlement for a Fund in respect of a Unit is referred to as the Withdrawal Amount for a Unit in a Fund.

The entitlement of a redeeming Unitholder in a Fund to the Withdrawal Unit Income Entitlement for a Fund (if any) and Redemption Price for a Fund in respect of a redeemed Unit in a Fund is satisfied by the payment of the Withdrawal Amount for that Unit, through the transfer of the Index Parcel and a cash balancing component.

Whilst the aggregate of the Withdrawal Unit Income Entitlement and Redemption Price for a Fund (i.e. the Withdrawal Amount) is determinable at the time of redemption, the split between the components will be advised to the Unitholder after 30 June, once the final tax calculations for a Fund for that year have been completed. This is because these components are dependent on a share of the net capital gains [and other taxable gains] derived by a Fund during the whole of the income year, hence can only be determined after financial year end.

Special attribution accounts are maintained by the Responsible Entity in respect of each redeeming Unitholder in a Fund for each financial year to determine the extent of the capital gains and losses arising for a Fund as a result of each Unitholder's redemption activities.

8.7 Liquidity and suspension of redemptions

The redemption procedures described in this Section 8 apply while a Fund is "liquid" within the meaning of the Corporations Act. Based on the investment strategies of each Fund, the Responsible Entity believes that each Fund is likely to remain liquid. If a Fund becomes non-liquid, in accordance with the Corporations Act redemptions for that Fund will only be possible by pro-rata withdrawal offer.

In addition, each Fund's Constitution allows the Responsible Entity to suspend the redemption of Units in a Fund for various reasons including where trading in relevant markets is restricted or suspended, there are settlement difficulties or other circumstances as set out in the Funds' Constitutions apply.

In satisfying a redemption request the Responsible Entity is not obliged to pay any part of the Redemption Price out of its own funds or transfer its own assets.

8.8 Dissemination of the Index Parcel, Issue Price, Withdrawal Amount, Cash Component and Number of Units

The Issue Price, Withdrawal Amount and Cash Component calculated for a Fund for an ASX Business Day are generally issued by the Administrator prior to the opening of trading on the next ASX Business Day. The Index Parcel for each Fund for an ASX Business Day is issued prior to the opening of trading on that ASX Business Day,

The Investment Manager publishes for each ASX Business Day the net asset value per Unit for each Fund (used for determining the Issue Price and Withdrawal Amount for each Fund), Cash Component and Index Parcel for each Fund at www.ssga.com/au. If considered appropriate, where a pecuniary benefit or right exists in relation to a security included in the Index Parcel for a Fund, for example an announced rights issue, the basis of valuing the security (i.e. whether or not on an ex-entitlement basis) and the basis of transferring the security (whether or not on an ex-entitlement basis) are specified in the published Index Parcel for the particular Fund.

Each Fund's portfolio will be publicly available on the website at www.ssga.com/au on a daily basis.

These daily processes could be delayed in extraordinary circumstances.

8.9 Execution Procedures - Issue of Units

Applicants for Units must complete an Application Form, provide required information and have successfully completed the Client On-boarding process. See "Completing the Application Form" in section 12 for further information.

The Administrator issues an Acknowledgement of Receipt by telephone or e-mail to all applicants for Units in a Fund that lodge valid Application Forms, except on the restricted dates noted above. If a completed Application Form for Units in a Fund is received before the Cut-off Time on an ASX Business Day, the Administrator issues the Acknowledgement of Receipt on the ASX Business Day on which the completed Application Form is received by the Administrator. If the completed Application Form for Units in a Fund is received at or after the Cut-off Time or on a non-ASX Business Day, the Acknowledgement of Receipt will be issued on the next ASX Business Day.

On receipt of an Acknowledgement of Receipt, Stockbroker applicants for Units in a Fund are deemed to have entered into an ETF Special Trade in accordance with the ASX Operating Rules, and must consequently comply with reporting obligations under the ASX Operating Rules. The date of receipt of an Acknowledgement of Receipt is therefore the "Trade Date" for ASX Operating Rule and ASX Settlement Rule purposes.

ETF Special Trades must be reported in accordance with the ASX Operating Rules and Procedures.

8.10 Execution Procedures - Redemption of Units

Redemption requests for a Fund may only be made by completing a Redemption Form. The same execution and acknowledgement procedures relating to a Fund apply for redemptions as for applications.

The Responsible Entity may reject a redemption request in relation to a Fund in certain circumstances - see the sections above dealing with restricted dates and liquidity.

Rejection of a redemption request is notified to the relevant Unitholder and an acknowledgement of receipt is not issued. On receipt of an Acknowledgement of Receipt, redeeming Stockbrokers are deemed to have entered into an ETF Special Trade in accordance with the ASX Operating Rules, and must consequently comply with reporting obligations under the ASX Operating Rules. The date of receipt of an Acknowledgement of Receipt is therefore the "Trade Date" for ASX Operating Rule and ASX Settlement Rule purposes.

ETF Special Trades must be reported in accordance with the ASX Operating Rules and Procedures.

8.11 Settlement Procedures - Issue of Units

An applicant for Units in a Fund must appoint State Street Australia Ltd ("**SSAL**") as its nominee ("**Applicant Nominee**") to facilitate the issue of Units to the applicant. The terms and conditions on which the Applicant Nominee is appointed are set out in Section 10. The Applicant Nominee has delegated certain aspects of its functions to State Street Bank and Trust Company ("**SSBT**"), which in turn has delegated such functions to HSBC (acting as sub custodian), including holding Units as part of the settlement procedures.

All Unit issues will settle on T+2, in accordance with the ASX Settlement Operating Rules. On T+2 the transfer of Units from HSBC (as sub custodian) to the applicant, and the transfer of the relevant Index Parcel from the applicant to HSBC (as sub custodian) must take place through CHESS on a DvP basis.

CHESS settlement messages must be entered in accordance with the ASX Operating Rules and the ASX Settlement Operating Rules.

Payments of the Cash Component and Transaction Fee for each Fund are effected in CHESS through a net CHESS payment obligation arising from the opposing payment obligations in relation to the transfer of Units and Index Parcels.

Settlement messages for the transfer of Units in each Fund must be for a settlement amount of the aggregate Issue Price plus the Transaction Fee for the Fund. Settlement messages for the corresponding Index Parcels must be for a settlement amount in accordance with the relevant ETF Special Trade.

8.12 Settlement Procedures - Redemption of Units

Redemptions settle at the Settlement Time on T+2. On T+2 HSBC (as sub custodian) pays the redemption consideration to the redeeming Unitholder. The Units are redeemed at this time by way of transfer of the Units from the redeeming Unitholder to HSBC (as sub custodian) through CHESS (on a DvP basis). Upon transfer of the Units to HSBC, the Units are cancelled.

CHESS settlement messages in respect of a Fund must be entered in accordance with the ASX Operating Rules and the ASX Settlement Operating Rules.

Payment of the Cash Component and Transaction Fee for each Fund is effected in CHESS through a net CHESS payment obligation arising from the opposing payment obligations in relation to the transfer of Units and Index Parcels.

Settlement messages for the transfer of Units in a Fund must be for a settlement amount of the aggregate Withdrawal Amount less the Transaction Fee for the Fund. Settlement messages for the corresponding Index Parcels relating to the relevant Fund must be for a settlement amount in accordance with the relevant ETF Special Trade.

8.13 Changes to Procedures

The Responsible Entity may vary the application and redemption procedures in relation to a Fund which are set out in this section by providing prior notice to Stockbroker Unitholders in the relevant Fund.

8.14 Stockbrokers Dealing in Units Subject to an Application

The ASIC Market Integrity Rules contain a provision which, subject to certain conditions and other relevant rules (such as the short selling rules), allows a Stockbroker to deal in Units in a Fund where the Units are the subject of an application but have not yet been delivered to the Stockbroker. The provision is an exception to the general prohibition in the ASIC Market Integrity Rules on dealing in unquoted securities.

The exception contains a number of conditions, and it is the responsibility of Stockbrokers to ensure that those conditions and other relevant rules are satisfied. The Responsible Entity, however, confirms to Unitholders in each Fund the following for the purposes of the exception:

- a Fund is an “ETF” within the meaning of the ASX Operating Rules and a Unit in a Fund is an “ETF Security”;
- except where the Responsible Entity has suspended the issue of Units in a particular Fund, an application for Units in a Fund is irrevocable and subject only to transfer of the subscription money and/or property from the subscriber to the Responsible Entity or its agent.
- the number of quoted Units in issue in a Fund is regularly reported to the ASX on the basis required by the ASX.

The Responsible Entity may withdraw this confirmation in respect of a Fund by notification to the ASX. If this occurs, the Investment Manager will notify Unitholders in the Fund.

8.15 Application and Redemption Facility - Settlement Failure

Applications

If a Stockbroker applying for Units in a Fund does not comply with its settlement obligations to deliver the Index Parcel in accordance with the application and redemption procedures set out above, the following will apply:

- (i) The Responsible Entity may determine at any time that all or part of the applicant's obligation to transfer the Index Parcels may be satisfied by the payment of the relevant portion of the aggregate Issue Price in a manner acceptable to the Responsible Entity (in practice, the Responsible Entity is likely to accept cash settlement).

Alternatively, the Responsible Entity may determine that the relevant Units are not to be issued or transferred to the applicant.

If the Responsible Entity notifies the applicant that it is exercising the above power, the applicant must promptly take all necessary action to give effect to that exercise of power, as directed by the Responsible Entity, including entering messages on CHESS to cancel the transfer of some or all of the securities within the Index Parcels.

- (ii) The applicant must unconditionally and irrevocably indemnify the Responsible Entity against all liability or loss incurred by the Responsible Entity or the relevant Fund arising from, and any costs, charges or expenses incurred in connection with, the breach of the settlement obligations. For example, if the Responsible Entity makes a determination under paragraph (i) above, the applicant must indemnify the Responsible Entity for the difference between:
 - (a) the amount paid by the Responsible Entity for the purchase of securities to replace those that were included in the Index Parcels for a Fund and the subject of the determination; and
 - (b) the value of the securities included in the Index Parcels for the Fund, and the subject of the determination, at the time at which the applicable Issue Price for the Fund was calculated.

It is not necessary for the Responsible Entity to incur expense or make payment before enforcing this right of indemnity.

Redemptions

If a redeeming Unitholder does not comply with its settlement obligations to deliver the relevant multiple of Units in the Fund on T+2 in accordance with the ASX Settlement Rules, the following will apply:

- (i) The Responsible Entity may determine at any time that all or part of the Unitholder's obligation to transfer the Units may be satisfied by the payment of the relevant aggregate Withdrawal Amount for the Fund in a manner acceptable to the Responsible Entity. (In practice, the Responsible Entity is likely to accept a cash settlement through CHESS.)

If the Responsible Entity notifies the Unitholder that it is exercising the above power, the Unitholder must promptly take all necessary action to give effect to that exercise of power, as directed by the Responsible Entity. For example, the Responsible Entity may direct the Stockbroker to enter messages to cancel certain transactions.

- (ii) The Unitholder must unconditionally and irrevocably indemnify the Responsible Entity against all liability or loss incurred by the Responsible Entity or the relevant Fund arising from, and any costs, charges or expenses incurred in connection with, the breach of the settlement obligation. For example, if the Responsible Entity makes a determination under paragraph (i) above, the Unitholder must indemnify the Responsible Entity for the difference between:
- a) the amount paid by the Responsible Entity for the purchase of securities to replace those that were included in the Index Parcel transferred to the Unitholder; and
 - b) the value of the securities included in the Index Parcel, at the time at which the applicable Withdrawal Amount was calculated.

It is not necessary for the Responsible Entity to incur expense or make payment before enforcing this right of indemnity.

9 Taxation

(Stockbrokers only)

The taxation information provided below supplements the information about the tax consequences of an investment in a Fund set out on page 40. It is intended only to provide general information about any significant taxation implications of the application and redemption facility for a Fund for Australian resident Stockbrokers.

As applications and redemptions of units are generally restricted to Stockbrokers acting as principal, it is assumed that the units constitute trading stock of the Unitholder.

The taxation of a unit trust investment such as a Fund can be complex and may change over time. Unitholders in a Fund are recommended to seek professional tax advice in relation to their own position.

In-Specie Applications

On acquiring units in a Fund by way of an in-specie contribution of a specific portfolio of equity securities (the Index Parcel for a Fund), the Stockbroker will be deemed to have disposed of those securities for tax purposes for an amount equal to the value of the units received plus (or minus) any negative (or positive) Cash Component for the Fund. On the basis that such Unitholders would hold their securities as trading stock in the course of their securities trading business, any profit will effectively be taxed as ordinary income and any loss will effectively be deductible.

The units acquired will generally be treated as trading stock having a cost equal to the value of the securities contributed plus (or minus) any positive (or negative) Cash Component plus the Transaction Fee.

Redemptions

Where a redemption of units in a Fund is made by a Unitholder, the redeeming Unitholder may be entitled to a Withdrawal Unit Income Entitlement in respect of those units as well as receipt of the Redemption Price in respect of those units on redemption. Together these components comprise the Withdrawal Amount in respect of those units.

The Withdrawal Unit Income Entitlement essentially represents a distribution of the net capital gains (or other gains) realised by a Fund as a result of redemptions of Units in a Fund. Such capital gains can arise because a Fund may be required to dispose of its assets to pay Withdrawal Amounts and, in the case of in specie redemptions, the in-specie transfer of securities by a Fund to redeeming Unitholders will constitute a disposal of the securities by a Fund for tax purposes.

The Redemption Price received for a Fund will be dependent upon the extent to which that redeeming Unitholder has a Withdrawal Unit Income Entitlement, i.e. the Redemption Price is equal to the Withdrawal Amount less any Withdrawal Unit Income Entitlement.

Notification of the extent to which the Withdrawal Amount for a Fund consists of a Withdrawal Unit Income Entitlement will only take place after the end of the income year (i.e. 30 June), in the annual tax statement, once the final tax calculations for a Fund for that year have been completed.

Redeeming Unitholders Holding Units as Trading Stock

In calculating a Unitholder's profit or loss on disposal of Units in a Fund for tax purposes, the proceeds on disposal of the Units will be the Redemption Price in respect of those Units. On the basis that the Units are held as trading stock, a taxable profit or deductible loss will effectively arise equal to the Redemption Price less the cost (or opening tax value) of the Units.

On the basis that the Units constitute trading stock, any Withdrawal Unit Income Entitlement in respect of those Units should be treated as a normal receipt of income in the hands of the Unitholder. Note that whilst these components may include a distribution of discounted capital gains of a Fund, no CGT discount concession will be available to the Unitholder.

The Transaction Fee paid in respect of the redemption will be allowable as a deduction and will be included in the cost for tax purposes of the in-specie securities acquired from a Fund.

Redeeming Unitholders not Holding Units as Trading Stock

Where the redeeming Unitholder holds Units on revenue account other than as trading stock (i.e. not as part of a securities trading business), the Redemption Price component of the relevant Withdrawal Amount should be used in calculating the realised gain or loss on the disposal of the Units in a Fund. Any Withdrawal Unit Income Entitlement will be treated as a normal distribution of a Fund's income or capital gains in the hands of the Unitholder.

Unitholders holding Units on revenue account other than as trading stock should seek independent professional taxation advice prior to investing in a Fund.

10 Applicant Nominee – Terms of Appointment

(Stockbrokers only)

Appointment of Applicant Nominee

Set out below are the terms on which SSAL (“**Applicant Nominee**”) acts as nominee for applicants for Units in each Fund. Please note that the Applicant Nominee has delegated certain of its functions as nominee to SSBT which in turn has delegated such functions to HSBC (as sub custodian).

Action	Condition
Appointment	<p>By executing the Application Form, the Applicant:</p> <p>(a) represents and warrants to the Applicant Nominee that it is a Wholesale Client in respect of any financial service (within the meaning of the Corporations Act) provided to it by the Applicant Nominee under these terms and is executing the Application Form as principal and not in its capacity as agent for any disclosed or undisclosed principal; and</p> <p>(b) appoints the Applicant Nominee as its nominee to hold Units and to perform the other tasks set out in these terms, in order to facilitate the issue of Units to the Applicant. Subject to completion of the Client On-boarding process (see below), the Applicant Nominee is taken to accept that appointment on receipt of a valid Application Form by the Administrator.</p>
Client On-boarding process	<p>The Applicant must provide to the Applicant Nominee and/or the Administrator such information as the Applicant Nominee and/or the Administrator may request from time to time:</p> <ul style="list-style-type: none"> • in order for the Applicant Nominee to satisfy its obligations under the AML/CTF Act; • to ensure compliance with FATCA and CRS and related implementing rules; • to confirm the status of the Applicant as a Wholesale Client; and • (unless the Applicant is already approved under the on-boarding policy) in order to meet relevant requirements of the Authorised Participant on-boarding policy of the Responsible Entity, as applicable from time to time. <p>An Application Form may be treated as invalid if these requirements are not met or the Applicant is not approved under the Authorised Participant on-boarding policy (an approval may be revoked by the Responsible Entity at any time).</p>
Delegation	<p>The Applicant Nominee may authorise any person (including a General Settlement Participant) to act as its agent or delegate to hold Units in a Fund and to perform any act or exercise any discretion within the Applicant Nominee’s power, including the power to in turn appoint its own agent or delegate.</p>

Action	Condition
Security Interest	The Applicant Nominee will hold the Units for the Applicant subject to the Security Interest.
Holding Units on a pooled basis	The Applicant Nominee may hold the Units on a pooled basis with property held for other persons.
Similar services for others	The Applicant acknowledges that the Applicant Nominee may perform similar services for other applicants for units in a Fund and that the Applicant Nominee will not be in breach of its obligations to the Applicant by doing so.
Consideration	The Applicant Nominee accepts its appointment as nominee under these terms in consideration of the receipt of valuable consideration, including applicable fees payable to the Applicant Nominee by the Responsible Entity.
Issue procedures	<p>The Applicant Nominee and the Applicant acknowledge that where Units in a Fund are to be issued in accordance with a valid Application Form, the following procedures will apply:</p> <ul style="list-style-type: none"> (a) Units in a Fund will be issued by the Responsible Entity to the Applicant Nominee on the first ASX Business Day after receipt of the application to which the Units relate; (b) Units in a Fund will be transferred from the Applicant Nominee to the Applicant on the Settlement Time on the second ASX Business Day after receipt of the application to which the Units relate; (c) each transfer of Units under (b) will be effected in CHESS in accordance with the ASX Rules; and (d) such other procedures as prescribed by the Responsible Entity for the issue of Units in a Fund from time to time.
Appropriate action	The Applicant Nominee may take any action it considers appropriate to ensure that Units are issued in accordance with the issue procedures set out above.
Receipt of applications	<p>Unless the Responsible Entity directs the Applicant Nominee otherwise, for the purposes of the issue procedures set out above:</p> <ul style="list-style-type: none"> (a) an application for Units in a Fund is taken to be received on the ASX Business Day of receipt if received before the Cut-off Time on that day; and (b) if an application for Units in a Fund is received on or after the Cut-off Time on an ASX Business Day or on a non-ASX Business Day, the application is taken to be received at the commencement of business on the next ASX Business Day.

Action	Condition
Direction by Responsible Entity	<p>The Applicant acknowledges that if the Applicant does not comply with its obligations in connection with transfer of the consideration due in respect of the Units in a Fund:</p> <ul style="list-style-type: none"> (a) the Responsible Entity may direct the Applicant Nominee that Units in a Fund are not to be transferred in accordance with the issue procedures set out above; (b) the Applicant Nominee must comply with any such direction; (c) on receipt of any such direction the Units will be taken to be held by the Applicant Nominee solely for the Responsible Entity, and the Responsible Entity is entitled to retain any distributions in respect of the Units and deal with them as if they were money paid by the Applicant to the Responsible Entity; and (d) the Responsible Entity may take any other action specified in any procedures prescribed by the Responsible Entity for the issue of Units in a Fund from time to time.

Calling for Title

The Applicant may not call for title to the Units held by the Applicant Nominee or require title to the Units to be transferred from the Applicant Nominee or otherwise dealt with except as contemplated by these terms.

Liability of Applicant Nominee

The Applicant Nominee is not liable to the Applicant for any act or omission of the Applicant Nominee in connection with Units or these terms unless the liability arises out of the fraud, negligence or wilful default of the Applicant Nominee. Without limiting this, in no circumstances is the Applicant Nominee liable for any Loss arising in connection with:

- the operation of CHESSE or the ASX Rules; or
- any agent or delegate of the Applicant Nominee becoming insolvent or having a controller appointed (each as defined in the Corporations Act) or entering into receivership, receivership and management, liquidation, provisional liquidation, becoming under administration, being wound up, becoming subject to any arrangement, assignment or composition, becoming protected from any creditors under statute, being dissolved or otherwise being unable to pay its debts when they fall due.

Indemnity

Without limiting any indemnity to which the Applicant Nominee is otherwise entitled, the Applicant unconditionally and irrevocably indemnifies the Applicant Nominee against all liabilities incurred by the Applicant Nominee in its capacity as nominee for the Applicant and the Applicant must pay or reimburse the Applicant Nominee on demand for all expenses, liabilities and Taxes payable or paid in connection with Units or these terms. The Applicant Nominee need not incur expense or make payment before enforcing this right of indemnity. This right of indemnity is a continuing obligation of the Applicant.

GST

- (a) Terms which have a defined meaning in the *A New Tax System (Goods and Services Tax) Act 1999* (Cth) have that meaning in paragraphs (b) and (c) below.
- (b) All consideration for any supply by one party (“**Supplier**”) to the other (“**Recipient**”) under these terms is inclusive of any GST imposed on the supply. If a taxable supply is made under these terms, the Supplier must provide a tax invoice to the Recipient at the time the supply is made.
- (c) If a party is entitled to be reimbursed or indemnified under this deed, the amount to be reimbursed or indemnified does not include any amount for GST for which the party is entitled to an input tax credit.

Governing Law

These terms of appointment are governed by the law in force in New South Wales.

11 Steps to Completing and Lodging Application Forms (Stockbrokers only)

Completing the Application Form

Please complete all relevant sections of the Application Form using BLOCK LETTERS. These instructions are cross-referenced to each section of the Application Form.

Details	Applications may only be made by Stockbrokers acting as principal. CHESS participants should complete their name and address in the same format as that presently registered in the CHESS system. The name of your authorised persons in relation to the investment, and their specimen signatures, should be inserted where indicated.
Number of Units applied for	Insert the number of Units in a Fund you wish to apply for. Applications must be in whole multiples of the minimum Units listed on page 7 and 8.
Participant ID	Insert your Participant ID.
Client On-boarding process	<p>Applicants must provide such information as may be requested from time to time:</p> <ul style="list-style-type: none"> • in order for the Responsible Entity and Applicant Nominee to satisfy their obligations under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth); • to ensure compliance with FATCA and CRS and related implementing rules; • to confirm the status of the Applicant as a Wholesale Client under the Corporations Act 2001 (Cth); and • (unless the Applicant is approved under the Authorised Participant on-boarding policy) in order to meet relevant requirements of the Authorised Participant on-boarding policy of the Responsible Entity, as applicable from time to time. <p>An Application Form may be treated as invalid if these requirements are not met or the Applicant is not approved under the Authorised Participant on-boarding policy (an approval may be revoked by the Responsible Entity at any time)."</p>
Signature by applicant	<p>Applicant companies must execute the Application Form by one of the following methods:</p> <ul style="list-style-type: none"> • by signature of 2 directors or 1 director and the company secretary, with or without the company common seal; • for sole director proprietary companies where the sole director is also the sole company secretary, by signature of the sole

	<p>director; or</p> <ul style="list-style-type: none"> by power of attorney (a certified copy of the power of attorney must be attached together with a specimen signature of the attorney) <p>Application Forms must be dated.</p>
Lodging Application Forms	<p>Completed Application Forms must be faxed or emailed to:</p> <p>The Administrator State Street Australia Ltd 420 George Street Sydney NSW 2000 Fax: (02) 9323 6071 Email: etf-ssalorders@statestreet.com</p> <p>The Administrator will subsequently issue an Acknowledgement of Receipt by telephone call or e-mail to the number or address set out in the Application Form.</p>

Redemptions

Units in a Fund may generally only be redeemed by “Qualifying Australian Residents” – broadly Australian residents for tax purposes for the relevant financial year that are Stockbrokers acting as principal.

Redemption may only be made by completing and lodging a Redemption Form. The Form is available from www.ssga.com/au or by contacting the Administrator. The Redemption Form sets out instructions for completing the form.

This PDS contains important information about investing in Units in a Fund. You should read this PDS in full before applying for Units in a Fund. A person who gives another person access to this Application Form must at the same time and by the same means give the other person access to this PDS and any supplementary document.

While this PDS is current, the Investment Manager will send you a paper copy of the PDS, including the Application Form, and any supplementary document, free of charge on request.

Privacy Disclosure Statement

By completing this Application Form, you may be providing personal information for the primary purpose of the Responsible Entity and SSGA providing this product to you. Each of the Entities may use the personal information contained in your Application Form for related purposes such as administration and providing services to you in relation to the product. Administration includes monitoring, auditing, evaluating, modelling data, dealing with complaints, answering queries and providing services in relation to this product. Your personal information may also be used for providing information about other products and services offered by or through the State Street Group, and for any other purposes listed in the Responsible Entity and SSGA’s Privacy Policy.

If you do not provide the information requested in the Application Form, your application may not be capable of acceptance or processing and we may not be able to administer your investment in a Fund or provide you with services in relation to the product or such other assistance as you seek.

Each of the Entities may disclose your personal information for permitted related purposes including with outsourced service providers in accordance with the Responsible Entity and SSGA's Privacy Policy. Some of these people and circumstances include:

- State Street Australia Limited and other members of the State Street Group;
- Your financial institution or employer for any direct debits or crediting of withdrawals if you have provided your financial institution account or payroll details;
- Companies for the purpose of issuing statements and handling mail;
- Other companies where services may be more efficiently provided by outsourcing;
- Legal and accounting firms, auditors, consultants and other advisers for the purpose of administering your investment in a Fund; and
- Government authorities when required by law.

In addition, some of these people may be located in other countries, including without limitation the United States, China, India and the Philippines.

You can obtain a copy of the Privacy Policy that states how Responsible Entity and SSGA manage personal information at www.ssga.com/au. The Privacy Policy states how personal information is managed and includes information about how a request to access and seek correction of personal information in connection with investors in the Fund can be made. The Privacy Policy also contains information about how an investor can complain about a breach of the *Privacy Act* (Cth) and how such a complaint will be dealt with. To the extent that the Registrar collects or manages personal information on the Responsible Entity or SSGA's behalf, similar information may be found in the Registrar's Privacy Policy available at <https://www.linkmarketservices.com.au/corporate/home.html>

You can access your personal information held by us by either:

- logging on to the registry website at linkmarketservices.com.au, or
- sending a request to SSGA ASL or SSGA.

If you believe your records are out of date, particularly your address, email address or adviser details, please contact SSGA or update your details by logging in to linkmarketservices.com.au

SPDR Australian Sector, Yield and ESG ETFs- Application Form

SPDR® S&P®/ASX 200 Financials Ex A-REIT Fund (ARSN 149 870 020)

SPDR S&P/ASX 200 ESG Fund (ASX code: E200) (Minimum 25,000 Units)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

C. ACKNOWLEDGEMENTS

The Applicant acknowledges and confirms for the benefit of the Responsible Entity and the Applicant Nominee that by signing this Application Form:

- The Applicant has read and understood the PDS and agrees to be bound by the Constitution, as amended from time to time, governing the Fund in respect of which it is applying for Units.
- The Applicant agrees to provide the indemnities in relation to breach of settlement set out in section 8.15.
- The Applicant warrants that all of the information in this Application Form is correct and complete.
- The Applicant agrees: (a) to provide such additional information as may be required by the Responsible Entity and Applicant Nominee to satisfy their obligations in relation to FATCA and CRS (including in relation to any change in circumstances of the Applicant Nominee), under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth), to confirm the status of the Applicant as a Wholesale Client under the Corporations Act 2001 (Cth), and (unless the Applicant is currently approved under the Stockbroker on-boarding policy) in order to meet relevant requirements of the Stockbroker on-boarding policy of the Responsible Entity, as applicable from time to time; and (b) that the Responsible Entity may delay or refuse the processing of any application if the required information is not provided, the Applicant is not approved under the Stockbroker on-boarding policy as applicable from time to time (an approval may be revoked by the Responsible Entity at any time), or in other circumstances as permitted under the Constitution.
- The Applicant agrees to the Applicant Nominee holding Units on its behalf pending settlement of this application in accordance with the Applicant Nominee - Terms of Appointment set out in Section 10.
- In making a decision to invest the only information and representations provided by the Investment Manager, the Responsible Entity, or any other member of the State Street Group are those contained in the PDS to which this Application Form relates.
- An investment in the Funds does not represent a deposit with or other liability of any company in the State Street Group, including SSBT, and is subject to investment risk including possible delays in payment and loss of income and principal invested.
- No company in the State Street Group, including SSBT, the Responsible Entity, the Applicant Nominee and the Investment Manager, guarantees the performance of any Fund or the repayment of capital or any particular rate of return of any Fund.
- If signed under a Power of Attorney, the attorney verifies that no revocation of that power has been received.

Interpretation

Unless the contrary intention appears, a reference to:

- (variations or replacement) a statute, ordinance, code or other law or to the ASX Rules means that statute, ordinance, code or other law or the ASX Rules as applies from time to time, and includes regulations and other instruments under it and consolidations, amendments, re-enactments or replacements;
- (singular includes plural) the singular includes the plural and vice versa;
- (person) a “person” includes an individual, a firm, a body corporate, a partnership, joint venture, an unincorporated body or association, or any government agency;
- (executors, administrators, successors) a particular person includes a reference to the person’s executors, administrators and successors;
- (meaning not limited) the words “include”, “including”, “for example” or “such as” are not used as, nor are they to be interpreted as, words of limitation, and, when introducing an example, do not limit the meaning of the words to which the example relates to that example or examples of a similar kind.
