The Cumulative Effect of Costs on Return

USD Example portfolio amount \$1m

Description of the illustration of the cumulative effect of costs on return

The below example is based on an investment of \$1m. The total charges deducted for each fund will have an impact on the investment return you might get. While performance cannot be guaranteed, the illustration shows the effects charges have when comparing returns before and after fees. Past performance is not a guide to future performance. The value of investments cannot be guaranteed and an investor may receive back less than their original investment.

In year 1, without fees the performance the fund could have achieved would be 5.16%, after fees the performance achieved is 5%. This equates to a reduction in profit of \$1,600. For subsequent years, without fees the performance the fund could have achieved would be 5.16%, after fees the performance achieved is 5%. This equates to a reduction in profit of \$1,600.

Assumes \$1,000,000 investment with 5% growth (zero entry and exit charges and no further investment)

Investment Period	1 Year (year 0-1)		Subsequent Years	
	\$	%	\$	%
What you might return with no charges at all	1,051,600	5.16%	1,051,600	5.16%
What you might return after charges	1,050,000	5.00%	1,050,000	5.00%
Cumulative effect of costs and charges on return	1,600	0.16%	1,600	0.16%

The ex-ante costs provided herein are forward looking costs. These forward looking cost figures are estimates based on historic data where available and relevant, or are based upon the MIFID II guidelines for producing reasonable estimated forward looking cost figures when historic data is not available. Actual cost figures, which will be reported annually, may vary from estimates given herein. The numbers shown above are the average cost and charges that SSGA anticipates that you may incur. This is based, where possible, on actual cost and charges, and when such data is not available SSGA has made reasonable estimations on a best effort basis. SSGA reserves the right to review and amend the figures shown above. All information has been obtained from sources believed to be reliable as at date indicated unless otherwise noted, but its accuracy is not guaranteed.

There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such. SSGA accepts no liability to you for any implication that the cost and charges expected in respect of: (i) a similar transaction executed at or around the same time; or (ii) the same transaction executed in future, will be the same as or similar to those shown in this document.

Definitions and methodology

<i>Transaction Costs (General)</i>	The 2019 transaction cost amounts have been calculated in consistency with the PRIIPS methodology (Packaged Retail Investment and Insurance Products). Transaction Costs include explicit costs (commissions, taxes, exchange fees), as well as implicit costs. Implicit costs have been calculated using asset class specific methodologies, as detailed below.
<i>Implicit Transaction Costs (Equity)</i>	Implicit transaction costs for equity securities have been calculated by reference to the order arrival price methodology. That is : the price at the time the order is transmitted to a broker for execution.
<i>Implicit Transaction Costs (Foreign Exchange)</i>	Implicit transaction costs for foreign exchange securities have been calculated by reference to the order arrival price methodology. That is : the price at the time the order is transmitted to a broker for execution. With the exception of orders sent using market on close trading instructions and position roll overs, where the standard SSGA Trading Cost Analysis methodology was used. TCA calculates implicit costs by reference to the close price at the predefined order dealing target time (eg. London 4pm FIX rate).
<i>Implicit Transaction Costs (Futures)</i>	Implicit transaction costs for futures securities have been calculated by reference to the order arrival price methodology. That is : the price at the time the order is transmitted to the internal SSGA dealing desk. With the exception of orders sent using market on close trading instructions and position roll overs, where the standard SSGA Trading Cost Analysis methodology was used. TCA calculates implicit costs by reference to the close price one minute after the predefined order dealing target time.
<i>Implicit Transaction Costs (Fixed Income)</i>	Implicit transaction costs for fixed income securities have been calculated using the spread methodology. That is: the difference between the price for buying (offer price) and the price for selling (bid price) a stock or security
<i>Implicit Transaction Costs (Money Markets Instruments)</i>	Implicit transaction costs for short-term fixed income securities have been calculated using the spread methodology. That is: the difference between the price for buying (offer price) and the price for selling (bid price) a stock or security
<i>Anti Dilution Levies (ADL)</i>	Have been backed out from the transaction costs calculations, for the below Fund ranges : Authorised Unit Trusts, Managed Pension Funds Limited, SSGA Liquidity Plc, SSGA Luxembourg SICAV, SSGA Qualified Trust, State Street Authorised Contractual Scheme, State Street Global Advisors Gross Roll Up Unit Trust, State Street ICAV, State Street Ireland Unit Trust, State Street Spectrum Unit Trust, WindWise Property Unit Trust, WindWise Qualified Funds Plc. Eg : reported transaction costs = Explicit Costs + Implicit Costs – ADL
<i>SPDRs Primary Market Transactions</i>	The impact of transactions in the primary market has been adjusted for, as below. For Fixed Income Funds the Anti Dilution Levies have been backed out (please see ADL section). For Equity Funds : Primary Market trades have been excluded from transaction costs calculations.
<i>3rd Party Payments Received</i>	Third Party payments received by investment firms in connection with the investment service provided
<i>Total Service Cost</i>	Costs related to the provision of an investment service
