The returns on a portfolio of securities which exclude companies that do not meet the portfolio's sustainable strategy criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's sustainable strategy criteria may result in the portfolio investing in industry sectors or securities which underperform the market as a whole.

R-Factor scoring is designed by State Street to reflect certain sustainability factors and does not represent investment performance. Results generated out of the scoring model are based on sustainability dimensions of a scored entity.
