

# SPDR S&P Euro Dividend Aristocrats ESG UCITS ETF

## Informations publiées sur le site Internet pour un fonds visé à l'Article 8

### A. Résumé

Le Compartiment SPDR S&P Euro Dividend Aristocrats ESG UCITS ETF (« **Compartiment** ») est un fonds indiciel qui réplique la performance de l'indice S&P Euro ESG High Yield Dividend Aristocrats Index. L'Indice a été conçu aux fins de reproduire les caractéristiques environnementales et sociales promues par le Compartiment. Les caractéristiques environnementales et sociales promues par le Compartiment correspondent à celles de l'Indice désigné par le Compartiment et, plus précisément, elles sont obtenues en excluant certaines actions selon leurs caractéristiques ESG, en s'appuyant sur leur notation ESG et leur implication dans certaines activités commerciales controversées, précisées dans la méthodologie de l'Indice.

Le Compartiment promeut des caractéristiques environnementales ou sociales, mais n'a pas l'investissement durable pour objectif.

Les caractéristiques environnementales et sociales promues par le Compartiment correspondent à celles de l'Indice désigné par le Compartiment et, plus précisément, elles sont obtenues en excluant certaines actions selon leurs caractéristiques ESG, en s'appuyant sur leur notation ESG et leur implication dans certaines activités commerciales controversées. Par conséquent, la réalisation des caractéristiques environnementales et sociales associées est mesurée via les exclusions des sociétés qui sont liées aux armes controversées, au charbon thermique, aux produits du tabac, aux sables bitumineux, aux armes légères et à la passation de marchés militaires, ainsi que des sociétés qui ne respectent pas les principes du PMNU.

Le Gestionnaire d'investissement et/ou le Gestionnaire d'investissement par délégation investiront pour le compte du Compartiment, selon la stratégie de réplification décrite plus en détail sous la section « Objectifs et politiques d'investissement – Fonds indiciels » du Prospectus, essentiellement dans des titres de l'Indice, toujours conformément aux Restrictions d'investissement stipulées dans le Prospectus.

Le Gestionnaire d'investissement emploie une méthodologie ESG contraignante qui vise à construire un portefeuille pour lequel au minimum 90 % des actifs du Compartiment sont investis dans des titres alignés sur les caractéristiques environnementales et sociales qu'il promeut. La partie restante (<10 %) du portefeuille, composée de trésorerie ainsi que d'équivalents de trésorerie existants détenus à la discrétion du Gestionnaire d'investissement, ne sera pas alignée sur les caractéristiques environnementales et sociales promues. Si tant est que le Compartiment recoure à des instruments financiers dérivés, ceux-ci ne sauraient être utilisés pour atteindre les caractéristiques environnementales ou sociales qu'il promeut. Le Compartiment ne s'engage pas à réaliser des investissements durables au sens du SFDR ou du Règlement Taxinomie.

La part du portefeuille du Compartiment investie dans des titres composant l'Indice constituera l'indicateur de durabilité utilisé pour mesurer le respect de chacune des caractéristiques

environnementales ou sociales promues par le Compartiment.

Le lien pour la Méthodologie indicielle qui appréhende les caractéristiques environnementales ou sociales promues par le Compartiment est disponible dans le Supplément correspondant et inclus ci-après.

Les sources de données utilisées pour atteindre les caractéristiques environnementales ou sociales pertinentes sont détaillées dans la Méthodologie indicielle.

Il existe un risque que le fournisseur d'indice puisse faire des erreurs, telles que l'évaluation incorrecte des critères de présélection décrits dans la Politique d'investissement et/ou l'inclusion/l'exclusion des bons composants dans le processus de filtrage. Les données ESG peuvent être basées sur certaines hypothèses, prévisions, projections, perspectives et opinions, lesquelles s'appuient le cas échéant sur les tendances actuelles du marché ou sur les événements futurs anticipés. Étant donné la nature évolutive et innovante des modèles de données, des méthodologies et des hypothèses, ainsi que l'incertitude inhérente à la prédiction d'événements prospectifs, il ne peut être garanti que les données ESG sont toujours exactes ou correctes ni que les données ESG répondront aux objectifs ou aux exigences de quelque client ou investisseur donné que ce soit. De plus, il se peut que certaines données ne puissent être obtenues en raison du manque de disponibilité des sources de données.

SSGA supervise les prestataires externes, en ce compris les fournisseurs d'indices, conformément à son programme de gestion des risques associés aux tierces parties. SSGA s'engage régulièrement auprès des fournisseurs d'indices pour réexaminer le niveau de service assuré, et procède également aux révisions ciblées des processus, systèmes et contrôles de systèmes, des données, des contrôles de qualité et de la sécurité informatique desdits fournisseurs d'indices.

Les politiques d'engagement de SSGA ne sont pas directement intégrées dans la stratégie d'investissement du Compartiment. Cependant, le Programme d'intendance des actifs de SSGA consolide l'ensemble des activités actionnariales de vote et d'engagement, toutes classes d'actifs confondues, indépendamment de la stratégie d'investissement ou de la région géographique, y compris pour le Compartiment.

Le Compartiment a désigné l'Indice aux fins de réaliser les caractéristiques environnementales et sociales qu'il promet. La méthodologie de l'Indice prévoit une révision constante ainsi que des rééquilibrages le troisième vendredi de juin.

## **B. No sustainable investment objective**

The Fund promotes environmental or social characteristics, but does not have as its objective a sustainable investment.

## **C. Environmental or social characteristics of the financial product**

The SPDR S&P Euro Dividend Aristocrats ESG UCITS ETF is an index fund tracking the performance of the S&P Euro ESG High Yield Dividend Aristocrats Index (the "Index"). The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index represents the performance of certain high dividend-yielding equity securities issued by companies from within the Eurozone while excluding certain stocks based on their ESG characteristics considering both their ESG rating, and their involvement in certain controversial business activities as outlined in the Index methodology.

## D. Investment Strategy

The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of high dividend-yielding stocks from the Eurozone equity market that meet the eligibility criteria defined in the S&P Euro High Yield Dividend Aristocrats Index, "the Standard Index". In addition, the Index aims to exclude certain stocks based on their ESG characteristics considering both their ESG rating, and their involvement in certain controversial business activities as outlined in the index methodology. The remaining securities are then weighted according to the size of their dividend.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the replication strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus.

Companies deemed not in violation by the Index provider of the UNGC principles are considered to exhibit good governance. For information on the methodologies used in the construction of the Index and further information on the exclusion criteria and data sources, please refer to S&P's index methodology description which can be found at the following link:

<https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-esg-divarist-indices.pdf>

## E. Proportion of investments

At least 90% of the Fund's assets are invested in securities that are constituents of the Index and aligned with environmental and / or social characteristics, while the Index provider applies ESG ratings on all the Index constituents. The Fund does not commit to making sustainable investments within the meaning of the SFDR or the Taxonomy Regulation. The Fund may hold 10% of its assets in cash or cash equivalents and derivatives used for currency hedging and efficient portfolio management purposes, at the Investment Manager's discretion. Such assets will not be aligned with environmental and social characteristics, nor will there be any environmental or social safeguards in place.

## F. Monitoring of environmental or social characteristics

The Index represents the performance of certain high dividend-yielding equity securities issued by companies from within the Eurozone while excluding certain stocks based on their ESG characteristics considering both their ESG rating, and their involvement in certain controversial business activities. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, thermal coal, tobacco products, oil sands, small arms and military contracting and the companies that fail to comply with the UNGC principles.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

The Fund rebalances on an annual basis, in line with the Index rebalancing frequency.

## G. Methodologies

The index methodology which captures the environmental or social characteristics promoted by the financial product is made available in the fund supplement.

## H. Data sources and processing

The data sources used to attain the relevant environmental or social characteristics are detailed in the index methodology.

## I. Limitations to methodologies and data

There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria described in the Investment Policy and/or include incorrect/exclude correct constituents in the screening process. ESG scoring and screening is subject to inherent methodological limits. Any assessment of ESG criteria by an Index is based on the data provided by third parties. Such assessments are dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause incorrect assessment of an issuer's ESG performance. In particular there may be potential inconsistencies, inaccuracy or a lack of availability of required ESG data, particularly where this is issued by external data providers. These limitations may include but are not limited to issues relating to: - Missing or incomplete data from companies (for example, relating to their capacity to manage their Sustainability Risks) which have been used as input for any scoring model; - The quantity and quality of ESG data to be processed; and - The identification of relevant factors for the ESG analysis.

ESG data may be based on certain assumptions, forecasts, projections, views and opinions which may be based on current market trends or anticipated future events. To assess company involvement in different activities and to estimate revenue shares as accurately as possible, data providers strive to obtain information directly from companies and issuers. Sources of data include annual reports, regulatory filings, sustainability reports, press releases, investor presentations, company websites, and other company disclosures. Given the developing and innovative nature of data models, methodologies and assumptions and the inherent uncertainty in predicting forward-looking events, it cannot be guaranteed that the ESG data is always accurate or correct or that the ESG data will satisfy the aims or requirements of any specific client or investor. Furthermore, there may be data that cannot be sourced due to the lack of availability of data sources.

## J. Due diligence

SSGA oversees external vendors, including index providers, in line with its third party risk management programme. SSGA engages with index providers regularly for service level reviews and also undertakes targeted reviews of index providers' processes, systems & systems controls, data, quality controls & IT security.

## K. Engagement policies

**Is engagement part of the environmental or social investment strategy?**

- Yes  
 No

While SSGA engagement policies are not directly embedded into the Fund's investment strategy, for SSGA the informed exercise of voting rights coupled with targeted and value-driven engagement is the most effective mechanism of creating value and managing Sustainability Risk for the investors. SSGA's Asset Stewardship programme consolidates all voting and engagement activities across asset classes, irrespective of investment strategy or geographic region. The engagement strategy is built on SSGA's ability to prioritise and allocate resources to companies and issues that have the greatest potential impact. SSGA's Asset Stewardship programme is underpinned by 3 separate pillars, that is, (i) providing information and guidance to investee companies on the development of ESG practices across key issues, (ii) engaging with portfolio companies to encourage transparent, accountable, high performing boards and companies, and (iii) by exercising voting rights in a manner that reflects long term investment objectives for the purpose of influencing the activity or behaviour of the issuers. To support this process, SSGA has developed proprietary in-house tools to help identify companies for active engagement based on various financial and ESG indicators.

## L. Reference benchmark

**Has a reference benchmark been designated for the purpose of attaining these characteristics promoted by the Fund?**

Yes

No

The Fund is an index fund tracking the performance of the S&P ESG High Yield Dividend Aristocrats Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index applies an ESG scoring and screening methodology via the adoption of screens to exclude securities related to certain sectors, companies or practices, based on specific ESG criteria .

The Index methodology provides for ongoing review and rebalances on the last business day of January.
