Investment Objective and Policy

Investment Objective:

The investment objective of the Fund is to seek to provide investors with a total return, taking into account both capital and income returns, which generally reflects the return of the Bloomberg Barclays US Treasury Bills 1-3 Month Index.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the public obligations of the U.S. Treasury with a maturity of between one and up to (but not including) three months. Certain special issues, such as state and local government series bonds (SLGs), TIPS and STRIPS are excluded. Securities must be fixed rate and rated investment grade, as defined by the Index methodology. Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index.

Hedged Share Classes are made available to reduce the impact of exchange rate fluctuations between the currency of the Class and the currency in which the underlying assets are denominated. Investors should note that the hedged Share Classes (designated as such in this Supplement) will be hedged back to the currency of the relevant Class. Consequently the hedged Share Classes should more closely track the corresponding currency hedged versions of the Index ("Currency Hedged Index").

The Investment Manager, on behalf of the Fund, will invest using the stratified sampling strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The bond securities in which the Fund invests will be primarily listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations. Details of the Fund's portfolio and the indicative net asset value per Share for the Fund are available on the Website daily.

Currency Hedging: The Fund will use financial derivative instruments ("FDIs"), including forward foreign exchange contracts, to hedge some or all of the foreign exchange risk for

hedged Share Classes. Currency hedging transactions in respect of a hedged Share Class will be clearly attributable to that Class and any costs shall be for the account of that Class only. All such costs and related liabilities and/or benefits will be reflected in the net asset value per Share of the Class. Over-hedged or under-hedged positions may arise unintentionally due to factors outside the control of the Investment Manager but will be monitored and adjusted on a regular basis.

Important note: The Fund is not a money market fund and is therefore not subject to the requirements of the Central Bank on money market funds or Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 (including maturity and credit quality constraints) designed to enable money market funds to maintain a stable net asset value. The Fund does not seek to maintain a stable net asset value per share of USD 1 per Share.

Permitted Investments

Bonds: The securities in which the Fund invests may include government and government-related bonds.

Other Funds / Liquid Assets: The Fund may invest up to 10% of its net assets in other regulated open-ended funds (including Money Market Funds) where the objectives of such funds are consistent with the objective of the Fund and where such funds are authorised in member states of the EEA, United Kingdom, USA, Jersey, Guernsey or the Isle of Man and where such funds comply in all material respects with the provisions of the UCITS Regulations. The Fund may hold ancillary liquid assets such as deposits in accordance with the UCITS Regulations.

Derivatives: The Fund may use FDIs for currency hedging and efficient portfolio management purposes. Any use of FDIs by the Fund shall be limited to futures and forward foreign exchange contracts (including non-deliverable forwards). Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund; or the minimisation of tracking error, i.e. the risk that the Fund return varies from the Index return. FDIs are described in the "Investment Objectives and Policies – Use of Financial Derivative Instruments" section of the Prospectus.

Securities Lending, Repurchase Agreements & Reverse Repurchase Agreements

The Fund does not currently participate in a securities lending programme, though it is entitled to do so. The Fund also does not intend to engage in repurchase agreements and reverse repurchase agreements. Should the Directors elect to change this policy in the future, due notification will

SPDR Bloomberg Barclays 1-3 Month T-Bill UCITS ETF

be given to Shareholders and this Supplement will be updated accordingly.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. In addition, the following risks are particularly relevant for the Fund.

Index Tracking Risk: The Fund’s return may not match the return of the Index. It is currently anticipated that the Fund will track the Index with a potential variation of up to 1% annually under normal market conditions. The Fund’s ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund’s return and that of the Index

Concentration Risk: When the Fund focuses its investments in a particular currency, the financial, economic, business, and other developments affecting issuers in that currency will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect the currency in which the Fund focuses its investments.

Derivatives Risk: The Fund may use FDIs for currency hedging and efficient portfolio management purposes as described in the Permitted Investments section. The Fund’s use of FDIs involves risks different from, and possibly greater than, the risks associated with investing directly in securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors who want to take

short, medium or long term exposure to the performance of the short-dated U.S. Treasury Bill market and are prepared to accept the risks associated with an investment of this type and the expected low to medium volatility of the Fund.

Subscriptions, Redemptions & Conversions

Investors may subscribe for or redeem Shares in the Fund on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges and in accordance with the provisions in the “**Purchase and Sale Information**” section of the Prospectus.

For subscriptions, consideration, in the form of cash or cleared in kind securities, must be received by the Settlement Deadline. For redemptions, a written redemption request signed by the Shareholder is required to be received by the Administrator by the Dealing Deadline on the relevant Dealing Day.

Shareholders should refer to the terms of the “**Purchase and Sale Information**” section of the Prospectus for information on Share conversions.

Initial Offer Period
