

# SPDR S&P Kensho New Economy ETFs

Strategies seeking to capture the disruptive & innovative firms reshaping our society

## Innovations Re-shaping Our Society

**Hyper-connectivity:** The number of connected devices per US household is expected to rise to 20 by 2025 – up from 10 today<sup>1</sup>

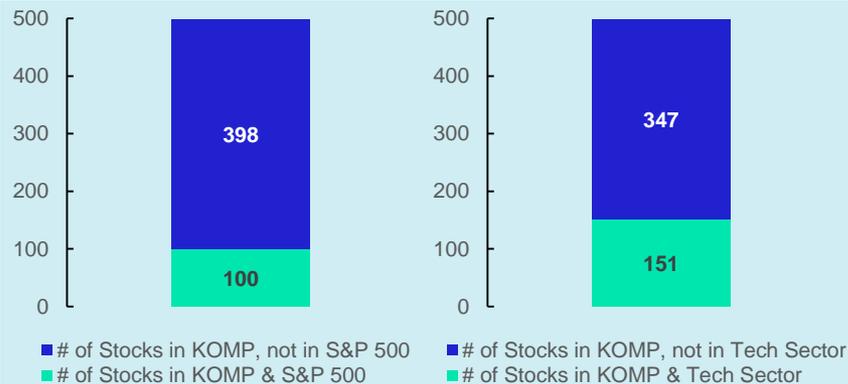

**Robotics & automation:** A record 2.7 million industrial robots operate in global factories today – a 12% rise from last year<sup>2</sup>

**Enterprise collaboration:** Enterprise software spending in 2021 and 2022 is expected to grow faster (+10%) than any other tech segment<sup>3</sup>

**Renewable consumption:** Renewables are expected to overtake coal to become the largest source of electricity generation globally by 2025<sup>4</sup>

**Democratized banking:** 58% of consumers used two or more digital payment methods in 2020 – up from 25% in 2019<sup>5</sup>

## Harnessing Disruption Beyond the Traditional<sup>10</sup>

## The Impact of a New Economy

Global GDP expected to increase by **\$15 trillion** due to Artificial Intelligence by 2030<sup>6</sup>

**30% of jobs** are at risk of being supplanted by automation by the mid-2030's<sup>7</sup>

Biological innovations (biomolecules/biosystems) could have a direct economic impact between **\$2 to \$4 trillion per year** by 2035<sup>8</sup>

**25% of all cars** sold by 2025 are expected to have electric engines and by 2022 some autonomous vehicles will be available<sup>9</sup>

## The Potential of Firms at the Forefront of Innovation<sup>11</sup>

1. "US households will have an average of 20 connected devices by 2025", Parks Associates June 15, 2020. 2. International Federation of Robots, September 24, 2020. 3. Gartner, January 25, 2021. 4. IEA November, 2020. 5. McKinsey's annual digital payment consumer survey, 2020. 6. PriceWaterhouseCoopers, October 2020 "How will automation impact jobs?" 7. PriceWaterhouseCoopers, October 2020 "How will automation impact jobs?" 8. McKinsey Global Institute The Bio Revolution: Innovations transforming economies, societies, and our lives, May 2020. 9. Goldman Sachs: Cars 2025, 2021. 10. Data as of 06/30/2021 per Bloomberg Finance L.P. and characteristics are as of the date indicated. 11. Data as of 06/30/2021. per Bloomberg Finance L.P. **Past performance is not indicative of future returns.** Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income as applicable.

Source: ssga.com/etfs, as of 06/30/2021. **Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold.** Current performance may be higher or lower than that quoted. Visit ssga.com for most recent month-end performance. The market price used to calculate the Market Value return is the midpoint between the highest bid and the lowest offer on the exchange on which the shares of the Fund are listed for trading, as of the time that the Fund's NAV is calculated. If you trade your shares at another time, your return may differ.

The views expressed in this material are the views of the SPDR Americas Research through the period ended 06/30/2021 and are subject to change based on market and other conditions. This document contains certain statements that may be deemed forward-looking statements. Any such statements are not guarantees of any future performance and actual results or developments may differ materially from those projected. Investing involves risk including the risk of loss of principal. The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent.

**Concentrated investments** in a particular sector or industry (technology sector and industrials sector) tend to be more volatile than the overall market and increases risk that events negatively affecting such sectors or industries could reduce returns, potentially causing the value of the Fund's shares to decrease. **Non-diversified funds** that focus on a relatively small number of securities tend to be more volatile than diversified funds and the market as a whole. **Technology companies**, including cyber security companies, can be significantly affected by obsolescence of existing technology, limited product lines, competition for financial resources, qualified personnel, new market entrants or impairment of patent and intellectual property rights that can adversely affect profit margins. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. Equity securities may fluctuate in value in response to activities of individual companies and general market and economic conditions. Index-based funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.
