

# State Street® DoubleLine® Total Return Tactical ETF

Highlights  
Q1 2026

- Managed by DoubleLine, TOTL seeks to maximize total return over a full market cycle by actively investing across fixed income sectors with a focus on mortgages and securitized assets
- As a result of DoubleLine’s active risk management and bottom-up security selection, TOTL has had a lower correlation to equities and lesser drawdowns during equity sell-offs compared to peers
- DoubleLine’s focus on risk management has also allowed TOTL to not only historically defend against equity volatility but also interest rate volatility, as the strategy seeks to deliver better risk-adjusted returns relative to the index and peers

## Fund information

AUM	\$4,188 Million
Gross Expense Ratio	0.55%
Average Bid Ask Spread	0.03%
Average Dollar Volume	\$18.68 Million
Strategy Type	Active

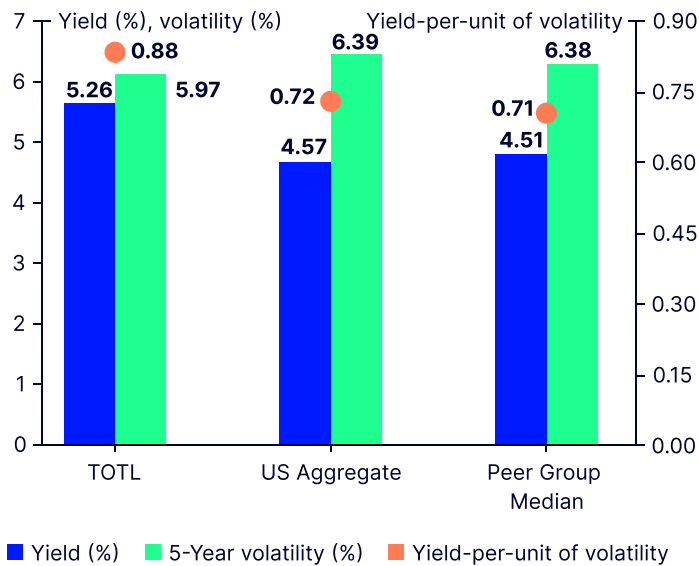

Source: Bloomberg Finance L.P., as of March 31, 2026. Average 30-day bid/ask spread and average 30-day notional dollar trading volume. The gross expense ratio is the fund’s total annual operating expenses ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund’s most recent prospectus.

## A defensive core bond portfolio

Managed by DoubleLine, TOTL seeks to maximize total return by exploiting inefficiencies within the global fixed income market, while maintaining active risk constraints and tactically managing an embedded mortgage bias — a bond subsector with historical advantages, such as a lower volatility and higher yield-per-unit of risk, relative to most other investment grade interest rate sensitive sectors.<sup>1</sup>

Relative to category peers, its 5-year volatility ranks in the bottom quintile, and its yield currently ranks in the top decile.<sup>2</sup> When compared to the Bloomberg U.S. Aggregate Bond Index, TOTL has outperformed by 49 bps (annualized) with less volatility over the past 5 years and currently provides a pickup in yield of 45 bps (5.02% vs. 4.57%).<sup>3</sup>

## TOTL yield-per-unit of volatility

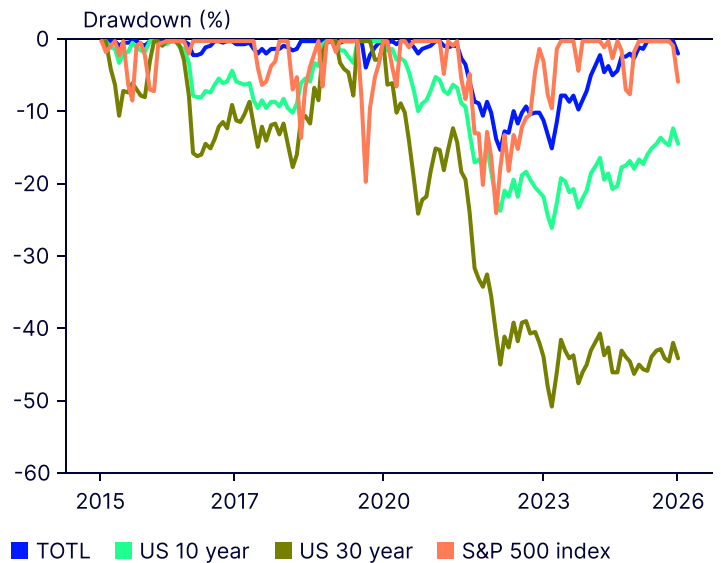

Source: Morningstar, Bloomberg Finance L.P., as of March 31, 2026. **The performance data quoted represents past performance. Past performance does not guarantee future results.** US Agg = Bloomberg US Aggregate Bond Index. Peer group defined as US-listed ETFs and US domiciled mutual funds (oldest share class) in the Intermediate Core-Plus Bond Morningstar Category. TOTL and Peer Group Median Yield = 12 Month Yield. Index Yield = Yield-to-Maturity. Volatility = Trailing 5-year standard deviation of returns (annualized) ending 03/31/2026. TOTL's 30-Day SEC Yield (Standardized) as of 03/31/2026 was 5.15%. An annualized yield that is calculated by dividing the investment income earned by the fund less expenses over the most recent 30-day period by the current maximum offering price. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income as applicable.

By combining traditional interest rate-sensitive sectors with non-traditional credit-sensitive sectors, TOTL can deliver both income and diversification benefits, supporting the tactical positioning along the yield and credit curve that seeks relative value mispricings and alpha opportunities.

Active strategies' potential to enhance yield and manage rate risk, while pursuing opportunities amid a broader universe, is a compelling feature in today's macro environment. As a result of DoubleLine's skilled active management, TOTL has exhibited attractive risk-adjusted performance as shown in the yield-per-unit of volatility chart above.

## TOTL drawdown versus rates and equities

Source: Morningstar, March 1, 2015 to March 31, 2026. US 30 Year represented by the Bloomberg U.S. Treasury Bellwethers (30Y) Index. US 10 Year represented by the Bloomberg U.S. Treasury Bellwethers (10Y) Index. **The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit [ssga.com](http://ssga.com) for most recent month-end performance. Performance is shown net of fees. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income as applicable.**

DoubleLine's focus on active risk management while balancing credit and interest rate sensitive sectors has allowed TOTL to successfully protect against the downside by mitigating equity and credit volatility as well as interest rate risk better than peers. TOTL has had lesser drawdowns than its peer group median in 74% of rolling six month periods analyzed since inception.<sup>4</sup> Similarly, in 80% of those rolling six month periods TOTL has had lower correlation to equities than its peer group median, evidence of persistence in being able to mitigate equity volatility.<sup>5</sup>

### Important Risk Information

Investing involves risk including the risk of loss of principal.

The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent.

This communication is not intended to be an investment recommendation or investment advice and should not be relied upon as such.

The Fund is actively managed. The Sub-Adviser's judgments about the attractiveness, relative value, or potential appreciation of a particular sector, security, commodity or investment strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Sub-Adviser's investment techniques and decisions will produce the desired results.

**Actively managed funds** do not seek to replicate the performance of a specified index. An actively managed fund may underperform its benchmark. An investment in the fund is not appropriate for all investors and is not intended to be a complete investment program. Investing in the fund involves risks, including the risk that investors may receive little or no return on the investment or that investors may lose part or even all of the investment.

Investments in **asset backed and mortgage backed securities** are subject to prepayment risk which can limit the potential for gain during a declining interest rate environment and increases the potential for loss in a rising interest rate environment.

The values of **debt securities** may decrease as a result of many factors, including, by way of example, general market fluctuations; increases in interest rates; actual or perceived inability or unwillingness of issuers, guarantors or liquidity providers to make scheduled principal or interest payments; illiquidity in debt securities markets; and prepayments of principal, which often must be reinvested in obligations paying interest at lower rates.

**Foreign (non-US) Securities** may be subject to greater political, economic, environmental, credit and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets.

While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs' net asset value. Brokerage commissions and ETF expenses will reduce returns.

All information is from SSGA unless otherwise noted and has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such.

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer

to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.

In general, ETFs can be expected to move up or down in value with the value of the applicable index. Although ETF shares may be bought and sold on the exchange through any brokerage account, ETF shares are not individually redeemable from the Fund. Investors may acquire ETFs and tender them for redemption through the Fund in Creation Unit Aggregations only. Please see the prospectus for more details.
