Source: FactSet, as of 03/31/21 **Past performance is not a guarantee of future results.** Sector is represented by the corresponding S&P 500 sector index.

\*Minimum Volatility, Value, Quality, Size, Dividend Yield and Momentum are represented by the MSCI USA Minimum Volatility Index, MSCI USA Value Index, MSCI USA Quality Index, MSCI USA Small Cap Index, MSCI USA High Dividend Yield Index and MSCI USA Momentum Index. Correlation is calculated using weekly excess returns over the S&P 500 Index. Characteristics are as of the date indicated, are subject to change and should not be relied upon as current thereafter.

# Important Disclosures

## Glossary

**NTM Price-to-Earnings Ratio (NTM P/E)** The ratio of the price of a stock and the firms earnings per share over the next 12 months. A lower NTM P/E indicates cheaper valuation.

**Price-to-Book Ratio (P/B)** A financial ratio used to compare a company's current market price to its book value which is the carrying value of an asset according to its balance sheet account balance. A lower P/B indicates cheaper valuation.

**Price-to-Earnings Ratio (P/E)** The ratio of the price of a stock and the firms earnings per share. A lower P/E indicates cheaper valuation.

**Price-to-Sales Ratio (P/S)** The ratio of the price of a stock and the firms sales per share. A lower P/S indicates cheaper valuation.

**Z-score** measures how many standard deviations an element is above or below their historical mean. A z-score can be calculated from the following formula.  $z = (X - \mu) / \sigma$  where z is the z-score, X is the sector current valuations and  $\sigma$  and  $\mu$  is the standard deviation and average of monthly valuations over the past 15 years

## Important Risk Information

**State Street Global Advisors and its affiliates (“SSGA”) have not taken into consideration the circumstances of any particular investor in producing this material and are not making an investment recommendation or acting in fiduciary capacity in connection with the provision of the information contained herein.**

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.

The views expressed in this material are the views of SPDR Research Team through the period ended February 28, 2021 and are subject to change based on market and other conditions and do not necessarily represent the views of State Street Global Advisors or any of its affiliates. This document contains certain statements that may be deemed forward-looking statements. Please note that any such statements are not guarantees of any future performance and actual results or developments may differ materially from those projected. The information provided does not constitute investment advice and it should not be relied on as such.

Investing involves risk, including the risk of loss of principal.

Because of their narrow focus, sector funds tend to be more volatile than funds that diversify across many sectors and companies. Select Sector SPDR Funds bear higher level of risk than more broadly diversified funds.

All ETFs are subject to risk, including possible loss of principal. Sector ETF products are also subject to sector risk and non-diversification risk, which generally result in greater price fluctuations than the overall market.
