
State Street Climate ESG International Equity Fund

Fund Profile

**Environmental, Social
& Governance (ESG)**

October 2022

We believe climate change is one of the biggest risks in investment portfolios today. This risk impacts almost all segments and industries — not just the obvious polluters. However, with climate risk comes tremendous opportunity with the increasing attractiveness of the emerging “green” economy.

Our approach offers global equity exposure, while targeting reductions in carbon emissions and reallocating capital towards companies benefiting from low-carbon and green technologies and companies demonstrating resilience to the risks posed by climate change. At the same time, the Fund seeks increased exposure to companies that score well on our ‘Responsibility Factor’ (R-Factor™), and screens out companies with material ESG risk and reputational issues.

Fund Objective

The State Street Climate ESG International Equity Fund (“the Fund”) seeks to achieve capital growth and income in line with the MSCI World ex-Australia Index, subject to delivering climate and ESG objectives.

Fund Approach

The Fund is designed for investors that are seeking to prepare their portfolios for the transition to a low-carbon economy. The Fund allows investors to deploy capital across multiple ESG and Climate dimensions via:

- **Climate Mitigation** — aims to reduce exposure to the flow of heat-trapping greenhouse gases into the atmosphere and increase exposure to the “green” economy.
- **Climate Adaptation** — increases exposure to companies that are better prepared for the possible physical, economic and regulatory impacts of climate change, including green house gas (GHG) reduction targets and transition plans.
- **Sustainable & Transparent ESG** — increases exposure to companies that score well on financially material sustainability issues relative to their industry peers, as well as performance against market specific corporate governance codes.
- **Screening** — screens out companies with material involvement in controversial business activities including tobacco, controversial (including nuclear) weapons, thermal coal, alcohol, gambling and adult entertainment.

Investment Process

Figure 1 Investment Process Summary

The Fund follows a disciplined and systematic investment process to achieve pre-defined climate objectives while aiming to deliver long-term returns broadly in line with the MSCI World ex-Australia Index.

- 1 Source the Best Data** Our research team has sought to identify the most appropriate metrics and data sources for each aspect of the Fund's approach to climate risk and built R-Factor™ to rank companies based on financially material ESG factors.
- 2 Build the Right Universe** Starting with the broad index, the investment process incorporates a set of screens that are aligned with ESG risk and reputational management objectives. Securities that fail these screens, are removed from the investment opportunity set.

3 Design For Maximum Impact

The fund is designed to:

- Reduce carbon intensity, embedded fossil fuel emissions from proven reserves and exposure to brown revenues.
- Increase exposure to companies that generate higher green revenues, are better prepared for the impact of climate change and have a higher R-Factor™ score.

Optimisation tools are used to construct the portfolio and efficiently balance competing objectives such as climate targets, R-Factor™ improvement, tracking error and diversification.

Careful calibration of portfolio construction parameters positions the fund to capture the sustainable climate and ESG themes, without introducing unintended consequences such as country, sector or stock biases, or excessive active risk relative to the broad index.

- 4 Implement & Monitor Portfolio** Portfolio Managers review the portfolio trade list and, in conjunction with our Traders, decide on a trading strategy to cost-efficiently implement the portfolio. The fund is normally rebalanced on a quarterly basis to ensure it is positioned to capture the evolving climate and ESG data landscape.

While the portfolio is normally only rebalanced quarterly, we continually monitor the portfolio, testing it against the risk/return profile of the parent benchmark, climate objectives and investability constraints. Our ESG and Climate reporting quantifies the Funds' exposure to core controversies, climate and R-Factor™ profiles, and stewardship engagement statistics.

Figure 2 Targeted Climate and ESG Objectives

	Climate Mitigation				Climate Adaptation	ESG
Objective	Reduce Carbon Emission Intensity	Reduce Fossil Fuel Reserves	Reduce Brown Revenues	Increase Green Revenues	Score Adaptation Efforts	Increase ESG Exposure
	Direct and indirect greenhouse gas emissions	Greenhouse gas emissions resulting from a company's fossil fuel reserves	Revenues related to drilling, mining and other extractive activities	Revenues from low-carbon technology and the "green" economy	Steps to protect a business from the physical, economic and regulatory impacts of climate change	ESG characteristics leveraging the SASB financial materiality map and multiple ESG data sources
Metric	Metric tons CO ₂ emissions/\$M revenues	Embedded metric tons CO ₂ emissions	% revenues from fossil fuel related activities	% revenues from low carbon technology and the "green" economy	Score on Climate Change Preparedness	R-Factor™
Data Provider	S&P Trucost	S&P Trucost	S&P Trucost	FTSE Russell	ISS ESG	Multiple
Targeted Climate and ESG Profile ¹	-70%	-90%	-90%	+300%	+0.25 exposure units*	+0.25 exposure units*

* Active exposure is a statistic that is measured in standard deviation units. Standard deviation is used to measure the distributional spread of data. A positive exposure indicates exposure above the universe (or parent index) average, which is typically set to 0.00. A negative exposure indicates exposure is below the universe average. Source: State Street Global Advisors.

¹ As compared to the MSCI World ex-Australia Index. The above targets are as of 30 September 2022 and are subject to change as both the science and the data behind climate investing evolves.

Reasons to Invest

- **ESG Integration and Risk Management**

Climate Focus — builds climate change thematically into portfolio construction.

Improved ESG Profile — provides increased exposure to sustainable companies that are highly rated by our ESG scoring system (R-Factor™).

Negative Screening — exclusions seek to avoid companies with material ESG risk and reputational issues.

- **Diversification** — low-cost exposure to equities in developed countries.
- **Influence** — as one of the world's largest asset managers, our clients benefit from our asset stewardship programme. As active owners, we engage with our portfolio companies on issues that impact long-term value creation. This engagement is a common feature of all portfolios we manage and we don't engage or vote differently for this Fund.

Investment Philosophy

The investment philosophy is based on the following beliefs, which guide everything we do on behalf of our clients:

Providing cost-efficient market exposure helps our clients achieve their long-term investment objectives. Index or index-like solutions are a core part of investors' portfolios. They help to ensure consistency in exposures and allow investors to focus time and budgets on asset allocation decisions, which are core to investors' success.

A culture that promotes teamwork, accountability and stability is key to meeting our clients' performance objectives. Our global and inclusive approach allows us to leverage the collective knowledge and diverse perspectives of our team and ensure effective implementation on behalf of all our clients around the world, independent of their size or chosen investment vehicle.

A globally consistent investment process and portfolio management system enables us to invest efficiently and minimise risks for our clients. We designed our proprietary global portfolio management system around our clients' need for advanced and innovative equity index solutions. This customised system allows us to nimbly evolve to changing market conditions and client requirements.

To deliver the best possible solutions for our clients, we innovate through research. Research is a core focus for State Street and our Global Equity Beta Solutions team. We have experienced researchers specialising in areas such as factor and ESG investing to help ensure that we are positioned to retain an edge and consistently deliver on client expectations.

As long-term stewards of capital, we engage with portfolio companies and encourage responsible investing to ensure that shareholders' interests are preserved. Our asset stewardship programme focuses on thematic issues identified as central to our clients' long-term interests. Our stewardship centers on engagement, impact and transparency to benefit our investors.

About State Street Global Advisors

Our clients are the world's governments, institutions and financial advisors. To help them achieve their financial goals we live our guiding principles each and every day:

- Start with rigor
- Build from breadth
- Invest as stewards
- Invent the future

For four decades, these principles have helped us be the quiet power in a tumultuous investing world. Helping millions of people secure their financial futures. This takes each of our employees in 30 offices around the world, and a firm-wide conviction that we can always do it better. As a result, we are the world's fourth-largest asset manager* with US \$3.48 trillion† under our care.

* Pensions & Investments Research Center, as of December 31, 2021.

† This figure is presented as June 30, 2022 and includes approximately \$66.43 billion of assets with respect to SPDR products for which State Street Global Advisors Funds Distributors, LLC (SSGA FD) acts solely as the marketing agent. SSGA FD and State Street Global Advisors are affiliated.
