

Target Market Determination — Funds Management

Legal disclaimer

This Target Market Determination (TMD) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). It sets out the class of consumers for whom the product, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. In addition, the TMD outlines the triggers to review the target market and certain other information. It forms part of **State Street Global Advisors, Australia Services Limited's** design and distribution arrangements for the product.

This document is **not** a product disclosure statement and is **not** a summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the Product Disclosure Statement (**PDS**) for the State Street Global Equity Fund before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions which supplements this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by visiting our website ssga.com.

Target Market Summary

This product is likely to be appropriate for a consumer seeking capital growth over the long term and lower volatility than the broad equity market to be used as a core or satellite allocation within a portfolio where the consumer has a medium to long term investment timeframe, high risk/return profile and needs daily access to capital.

Fund and Issuer identifiers

Issuer	State Street Global Advisors, Australia Services Limited
Issuer ABN	16 108 671 441
Issuer AFSL	274900
Fund	State Street Global Equity Fund
ARSN	162 547 784
APIR Code	SST0050AU
ISIN Code	AU60SST00506
Date TMD approved	30 September 2022
TMD Version	2
TMD Status	Current

Description of Target Market

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	Potentially in target market	Not considered in target market
------------------	------------------------------	---------------------------------

Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

Generally, a consumer is unlikely to be in the target market for the product if:

- **one or more** of their Consumer Attributes correspond to a **red** rating, or
- **three or more** of their Consumer Attributes correspond to an **amber** rating.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (typically with an intended product use of *satellite/small allocation or core component*). In such circumstances, the product should be assessed against the consumer’s attributes for the relevant portion of the portfolio, rather than the consumer’s portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product with a *High or Very High* risk/return profile is consistent with the consumer’s objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is *Low or Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

Consumer Attributes	TMD Indicator	Product description including key attributes
Consumer’s investment objective		
Capital Growth		The Fund seeks to outperform the MSCI World Ex Australia Index over a full market cycle of approximately 5 - 7 years, with lower volatility than the Benchmark. It also seeks to mitigate currency risk associated with the Benchmark. The Fund is suitable for investors seeking capital growth over the long term and lower volatility than the broad equity market. The Fund generally distributes income annually.
Capital Preservation		
Capital Guaranteed		
Income Distribution		
Consumer’s intended product use (% of Investable Assets)		
Solution/Standalone (75–100%)		The Fund invests in listed global equity securities selected from the MSCI World-ex Australia Index and excludes companies, subject to materiality thresholds identified by MSCI, involved in tobacco and controversial weapons.. The Fund aims to deliver strong total returns with lower total variability of returns than the market index. The Fund looks for high quality companies that are reasonably valued and have an improving growth outlook and positive investor sentiment. We manage currency risk using our Dynamic Strategic Hedging programme.
Core Component (25–75%)		
Satellite/small allocation (<25%)		
Consumer’s investment timeframe		
Short (≤ 2 years)		The minimum suggested timeframe for holding investments in the Fund is 5 years
Medium (> 2 years)		
Long (> 8 years)		

Consumer Attributes	TMD Indicator	Product description including key attributes
Consumer's Risk (ability to bear loss) and Return profile		
Low	Red	The Fund has a very high risk profile and seeks to outperform the Benchmark over a full market cycle of approximately 5 - 7 years, with lower volatility than the Benchmark.
Medium		
High	Green	
Very high		
Consumer's need to withdraw money		
Daily	Green	Under normal circumstances, unit holders can withdraw/redeem from the Fund daily by providing a redemption request to the Registry by 2:00 pm (Sydney time) on a Business Day to be processed for that Business Day.
Weekly		
Monthly		Payment of the redemption proceeds is generally made two Business Days after the redemption is processed.
Quarterly		
Annually or longer		

Appropriateness

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described above, as the features of this product in Column 3 of the table above are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Distribution conditions/restrictions

Distribution Condition	Distribution Condition Rationale	<i>applicable</i>
There are no distribution conditions		<input checked="" type="checkbox"/>

Review triggers

Material change to key attributes, fund investment objective and/or fees.

Material deviation from benchmark / objective over sustained period.

Key attributes have not performed as disclosed by a material degree and for a material period.

Determination by the issuer of an ASIC reportable Significant Dealing.

Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.

The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory review periods

Review period	Maximum period for review
Initial review	1 year and 3 months
Subsequent review	3 years and 3 months

Distributor reporting requirements

Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints (as defined in section 994A(1) of the Act) relating to the product design, product availability and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	Within 10 business days following end of calendar quarter	All distributors
Significant dealing outside of target market, under s994F(6) of the Act. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors
To the extent a distributor is aware, dealings outside the target market, including reason why acquisition is outside of target market, and whether acquisition occurred under personal advice.	Within 10 business days following end of calendar quarter.	All distributors

If practicable, distributors should adopt the FSC data standards for reports to the issuer. Distributors must report to State Street Global Advisors, Australia Services Limited using the email address: ddo@ssga.com.

TMD Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed to generate capital return. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product to reduce volatility and minimise loss in a market down-turn. The consumer prefers exposure to defensive assets (such as cash or fixed income securities) that are generally lower in risk and less volatile than growth investments.
Capital Guaranteed	The consumer seeks a guarantee or protection against capital loss whilst still seeking the potential for capital growth (typically gained through a derivative arrangement). The consumer would likely understand the complexities, conditions and risks that are associated with such products.
Income Distribution	The consumer seeks to invest in a product designed to distribute, regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (typically, high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (75–100%)	The consumer intends to hold the investment as either a part or the majority (up to 100%) of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least High portfolio diversification (see definitions below).
Core Component (25–75%)	The consumer intends to hold the investment as a major component, up to 75%, of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least Medium portfolio diversification (see definitions below).
Satellite (<25%)	The consumer intends to hold the investment as a smaller part of their total portfolio, as an indication it would be suitable for up to 25% of the total <i>investable assets</i> (see definition below). The consumer is likely to be comfortable with exposure to a product with Low portfolio diversification (see definitions below).
Investable Assets	Those assets that the investor has available for investment, excluding the family home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)	
Low	Single asset class, single country, low or moderate holdings of securities, e.g. high conviction Australian equities.
Medium	1–2 asset classes, single country, broad exposure within asset class, e.g. Australian equities "All Ords".
High	Highly diversified across either asset classes, countries or investment managers, e.g. Australian multi-manager balanced fund or global multi-asset product (or global equities).
Consumer's intended investment timeframe	
Short (≤ 2 years)	The consumer has a short investment timeframe and may wish to redeem within two years.
Medium (> 2 years)	The consumer has a medium investment timeframe and is unlikely to redeem within two years.
Long (> 8 years)	The consumer has a long investment timeframe and is unlikely to redeem within eight years.
Consumer's Risk (ability to bear loss) and Return profile	
<p>Issuers should undertake a comprehensive risk assessment for each product. The FSC recommends adoption of the Standard Risk Measure (SRM) to calculate the likely number of negative annual returns over a 20 year period, using the guidance and methodology outlined in the Standard Risk Measure Guidance Paper For Trustees. SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. Issuers may wish to supplement the SRM methodology by also considering other risk factors. For example, some products may use leverage, derivatives or short selling, may have liquidity or withdrawal limitations, or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.</p> <p>A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.</p>	

Term	Definition
Low	<p>The consumer is conservative or low risk in nature, seeks to minimise potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)) and is comfortable with a low target return profile.</p> <p>Consumer typically prefers defensive assets such as cash and fixed income.</p>
Medium	<p>The consumer is moderate or medium risk in nature, seeking to minimise potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)) and comfortable with a moderate target return profile.</p> <p>Consumer typically prefers a balance of growth assets such as shares, property and alternative assets and defensive assets such as cash and fixed income.</p>
High	<p>The consumer is higher risk in nature and can accept higher potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 6)) in order to target a higher target return profile.</p> <p>Consumer typically prefers predominantly growth assets such as shares, property and alternative assets with only a smaller or moderate holding in defensive assets such as cash and fixed income.</p>
Very high	<p>The consumer has a more aggressive or very high risk appetite, seeks to maximise returns and can accept higher potential losses (e.g. has the ability to bear 6 or more negative returns over a 20 year period (SRM 7) and possibly other risk factors, such as leverage).</p> <p>Consumer typically prefers growth assets such as shares, property and alternative assets.</p>

Consumer's need to withdraw money

Issuers should consider in the first instance the redemption request frequency under ordinary circumstances. However, the redemption request frequency is not the only consideration when determining the ability to meet the investor's requirement to access capital. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in completing this section.

Daily/Weekly/Monthly/Quarterly/ Annually or longer	The consumer seeks to invest in a product which permits redemption requests at this frequency under ordinary circumstances and the issuer is typically able to meet that request within a reasonable period.
---	--

Distributor Reporting

Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p> <ul style="list-style-type: none"> • it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the reporting period, • the consumer's intended product use is <i>Solution/Standalone</i>, or • the consumer's intended product use is Core component and the consumer's risk (ability to bear loss) and return profile is <i>Low</i>.
