

MiFID II Cost and Charges: Clear, Transparent, and Simple

At State Street Global Advisors, we believe in providing transparent and understandable information about the costs associated with the products we offer. As part of our commitment to your financial well-being and in compliance with the MiFID II regulations, we are pleased to explain the costs and charges you may incur when investing with us.

What are Costs and Charges?

When you invest, there are costs associated with managing and trading your investments. These costs are necessary to deliver our services and can affect the overall performance of your investment. Under MiFID II, we are required to clearly disclose all costs and charges so you can make informed decisions.

Types of Costs

Here's a breakdown of the most common types of costs you may encounter when investing with us:

Fund Ongoing Costs Ex ante Total estimated costs for running the fund (incl. mgmt. fee unless invoiced to client).

One-Off costs All costs and charges estimated to be paid at the beginning or at the end of the investment in the fund. This document discloses the maximum charge that can be applied, however, State Street currently does not charge these costs. You should also check with the person or distributor who sold you this fund.

Transaction Costs Ex ante Ex-ante transaction costs include both explicit and implicit transaction costs and are based on the previous 36 months of ex-post costs at an average level of assets under management.

Incidental Costs Ex ante The incidental costs would reflect any performance fee charged by a fund, however State Street does not charge this fee type for any of the Funds disclosed in this report.

Total Estimated Product Cost (Ex ante) This is the total estimate of the ongoing costs, one off costs, transaction costs and incidental costs of investing in the fund.

Fund Ongoing Costs Ex post Total actual costs for running the fund (incl. mgmt. fee unless invoiced to client).

Transaction Costs Ex post Ex-post transaction costs include both explicit and implicit transaction costs and are based on the previous 12 months of ex-post costs at an average level of assets under management.

Incidental Costs Ex Post The incidental costs would reflect any performance fee charged by a fund, however State Street does not charge this fee type for any of the Funds disclosed in this report.

Total Actual Fund Cost Ex Post This is the total of the ongoing costs, one off costs, transaction costs and incidental costs of investing in the fund.

Portfolio Turnover Rate The turnover rates measures yearly trading activity within a Fund. Funds aged less than a year are not considered. The portfolio turnover ratio has been calculated by dividing the lesser of amounts of purchases or sales of portfolio securities by the average net asset value of the portfolio for the period. Derivatives as well as called securities, maturities and redemptions were excluded from the buys and sells totals. The account pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs affect the Fund’s performance.

Why is this Important?

Understanding the costs of your investments is crucial for making informed decisions. By knowing how much you’re paying for the services you receive, you can assess whether those costs are justified by the value provided and make better decisions for your financial goals.

How do I use the information contained in the table?

Using the following example- you can see how Costs and Charges impact the performance of your investment and also how to calculate the monetary impact of costs on your investment:

The Cumulative Effect of Costs on Return

EUR Example portfolio amount EUR1m

Description of the illustration of the cumulative effect of costs on return. The below example is based on an investment of EUR1m. The total charges deducted for each fund will have an impact on the investment return you might get. While performance cannot be guaranteed,

the illustration shows the effects charges have when comparing returns before and after fees. Past performance is not a guide to future performance. The value of investments cannot be guaranteed and an investor may receive back less than their original investment.

In year 1, without fees the performance the fund could have achieved would be 7.22%, after fees the performance achieved is 5%. This equates to a reduction in profit of EUR22,200. For subsequent years, without fees the performance the fund could have achieved would be 7.22%, after fees the performance achieved is 7%. This equates to a reduction in profit of EUR2,200 p.a.

Assumes EUR1,000,000 investment with 5% growth (zero entry and exit charges (after year 1) and no further investment)

All data is sourced by State Street Global Advisors. The ex-post costs and charges provided herein are unaudited. These actual cost and charges figures are annualized. The ex-ante costs provided herein are forward looking costs. These forward looking cost figures are estimates based on historical data where available and relevant, or are based upon the MIFID II guidelines for producing reasonable estimated forward looking cost figures when historical data is not available. Actual cost

figures, which will be reported annually, may vary from estimates given herein. The numbers shown above are the average cost and charges that SSGA anticipates that you may incur. This is based, where possible, on actual cost and charges, and when such data is not available SSGA has made reasonable estimations on a best effort basis.
