# **State Street Emerging Markets SRI Enhanced Equity Fund**

## SFDR Article 8 – Additional Information

---

## Description of environmental or social characteristics

The investment policy of the Fund is to outperform the MSCI Emerging Markets Index over the medium and long term while screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anti-corruption, tobacco and controversial weapons.

---

## Portfolio Exclusions - Scope

The below outlines the methodology used to produce the ESG Stock Exclusion List (the "Exclusion List") utilised by the Fund as part of the portfolio construction process.

---

## Exclusions Categories

The Exclusion List includes the following screens:

- 1 Controversial Weapons
- 2 UN Global Compact Violations
- 3 Thermal Coal
- 4 Tobacco
- 5 Swedish Ethical Council exclusions
- 6 Norwegian Government Pension Fund Global exclusions

---

## Methodology

**Controversial Weapons** SSGA receives universe-level data from two ESG screening data providers: Sustainalytics and MSCI. A screen is then applied to the data to generate lists from each data provider of excluded securities for this category. SSGA determines the parameters that define the screen which are then approved by the firm's Investment Committee. Companies are excluded if they appear on either or both of the lists from the two data providers.

**UN Global Compact Violations** Data is sourced from Sustainalytics. A screen is then applied to the data to generate a list of excluded securities for this category. SSGA determines the parameters that define the screen which are then approved by the firm's Investment Committee. **Swedish Ethical Council:** The exclusion list of the Swedish Ethical Council is determined by the Swedish Ethical Council and provided by Sustainalytics to SSGA.

**Thermal Coal** Data is sourced from Sustainalytics. A screen is then applied to the data to generate a list of excluded securities for this category. SSGA determines the parameters that define the screen which are then approved by the firm's Investment Committee.

**Tobacco** SSGA receives universe-level data from two ESG screening data providers: Sustainalytics and MSCI. A screen is then applied to the data to generate lists from each data provider of excluded securities for this category. SSGA determines the parameters that define the screen which are then approved by the firm's Investment Committee. Companies are excluded if they appear on either or both of the lists from the two data providers

**Swedish Ethical Council** The exclusion list of the Swedish Ethical Council is determined by the Swedish Ethical Council and provided by Sustainalytics to SSGA.

**Norwegian Government Pension Fund Global** The exclusion list of the Norwegian Government Pension Fund Global is determined by Norges Bank Executive Board or by Norges Bank Investment Management and provided by Sustainalytics to SSGA.

Companies with focused involvement in the following controversial weapons are excluded.

**Landmines** Landmines are explosives that are designed to detonate at the presence, proximity or contact of a person or vehicle. After being planted, antipersonnel mines can remain undetonated for years, posing a serious risk to civilians after a conflict has ended.

**Biological and chemical weapons** Biological or chemical weapons are munitions that utilize pathogens such as viruses, bacteria, and disease-causing biological agents, toxins, or chemical substances that have toxic properties, to inflict death or harm. Either type can be dispersed in gas, liquid, or solid forms. As these munitions are based on organisms or chemicals, civilians are often unintended victims since the impact zone is constrained only by how far the particles can disperse. For biological weapons, person-to-person transmission of the illness can further exacerbate the civilian impact.

**Cluster weapons** Cluster weapons are air-dropped explosives: bombs, missiles, rockets, or shells that carry sub munitions and disperse them over an area. The sub munitions have a wide impact zone, and often remain undetonated on the ground. These munitions can remain dangerous for years after the conflict has ended, posing a serious risk to civilians.

**Depleted Uranium** Depleted Uranium (DU) munitions are projectiles (bullets, rockets, etc.) that have been equipped with the radioactive chemical substance DU, a byproduct of the uranium enrichment process used to make nuclear weapons and nuclear-reactor fuel. Because of its high density, DU is often used as a penetrator in ammunition to help pierce armor. However, areas where depleted uranium munitions have been used are exposed to its radioactive qualities, causing people living in the area to be more prone to cancers, congenital birth defects, and other illnesses.

**Nuclear Weapons** A nuclear weapon is a device that is capable of releasing nuclear energy in an uncontrolled manner, due to fusion and/or fission reactions, making it a highly destructive explosive. The indiscriminate and disproportionate impact on civilians makes nuclear weapons a controversial weapon.

**White Phosphorus** White phosphorus (WP) is an allotrope of the chemical element phosphorus, which burns fiercely when exposed to oxygen. A WP munition is any projectile (eg flares, grenades, or mortars) that is equipped with WP, in order to act as a smoke-producing agent, or as tracer, illumination, or incendiary munition.

---

## 2 UN Global Compact Principles

Companies directly complicit in violations of core international norms and conventions, as described in the United Nations Global Compact Principles, are excluded.

The UN Global Compact is the world's largest corporate sustainability initiative with 13,000 participants from 170 countries. It consists of a set of internationally recognized principles that encompass important issues, such as human rights, labour, the environment, and anti-corruption practices. The 10 principles are as follows:

### Human Rights

- Principle 1*                      Businesses should support and respect the protection of internationally proclaimed human rights; and  
*Principle 2*                      make sure that they are not complicit in human rights abuses.

### Labour

- Principle 3*                      Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;  
*Principle 4*                      the elimination of all forms of forced and compulsory labour;  
*Principle 5*                      the effective abolition of child labour; and  
*Principle 6*                      the elimination of discrimination in respect of employment and occupation.

### Environment

- Principle 7*                      Businesses should support a precautionary approach to environmental challenges;  
*Principle 8*                      undertake initiatives to promote greater environmental responsibility; and  
*Principle 9*                      encourage the development and diffusion of environmentally friendly technologies.

### Anti-Corruption

- Principle 10*                      Businesses should work against corruption in all its forms, including extortion and bribery.

---

## 3 Thermal Coal

Companies involved in the extraction or power generation of thermal coal are excluded.

---

## 4 Tobacco

Companies with direct involvement in the production / manufacturing of tobacco are excluded. Tobacco is considered controversial because of the negative health consequences (cancer) of long-term use of tobacco products, also leading to substantial medical costs for society. Tobacco companies are exposed to significant financial and reputational risks as a result of legal cases and class actions brought against them.

---

## 5 Swedish Ethical Council

All companies on the recommended exclusion list by the Council on Ethics, Swedish National Pension Funds, are excluded.

The Ethical Council is a body operated jointly by four Swedish national pension funds – AP1, AP2, AP3 and AP4 (known as the AP funds). The Council seeks to drive positive change in foreign companies implicated in violating international environmental and human rights conventions, including the Universal Declaration of Human Rights, United Nations treaties and the International Labour Organization's Core Conventions. Excluded companies from their investment universe are directly involved in the production or marketing of anti-personnel landmines and cluster munitions. Companies can also be divested if they violate the UN Global Compact and the OECD Guidelines for Multinational Enterprises and where dialogue with the companies has not led to improvements.

---

## 6 Norwegian Government Pension Fund Global

All companies on the recommended exclusion list by Norges Bank Investment Management in relation to the Norwegian Government Pension Fund Global are excluded.

The Norwegian Ministry of Finance has established ethically motivated guidelines for observation and exclusion of companies. The guidelines contain criteria for exclusion based either on the companies' products or on their conduct. Companies that produce certain types of weapons, base its operations on coal, or produce tobacco are excluded as are companies that through their conduct contribute to violations of fundamental ethical norms. The Norwegian Ministry of Finance has established an independent Council on Ethics to make ethical assessments of companies. The Council on Ethics sends its recommendations to Norges Bank's Executive Board, which then makes the final decision on exclusion, observation or active ownership.

Finally, the Norwegian Government Pension Fund Global itself may divest from companies that impose substantial costs on other companies and society as a whole and so are not long-term sustainable. Examples of activities that are unsustainable are business models that do not conform to prevailing technological, regulatory or environmental trends.

---

## Update Frequency

The Exclusion List is updated once per quarter, no later than the 15th business day of the first month of the quarter. Changes will be reflected in the Fund during that quarter.

---

## Governance

The Exclusion List methodology (with the exception of the Swedish Ethical Council and Norwegian Government Pension Fund Global lists which, as described above, are generated by the Council on Ethics, Swedish National Pension Funds and Norges Bank Investment Management respectively) and screening criteria are approved by SSGA's Investment Committee and EMEA Product Committee respectively. A description of both the Swedish Ethical Council and Norwegian Government Pension Fund Global list can be found in the Methodology section above.
