

State Street SRI Euro Corporate Bond Index Fund

Informations publiées sur le site Internet pour un fonds visé à l'Article 8

A. Résumé

Le Compartiment State Street SRI Euro Corporate Bond Index Fund (le « **Compartiment** ») est un fonds indiciel qui réplique la performance de l'indice Markit iBoxx Euro Sustainable Corporate Bond Custom Index (l'« **Indice** »). Les caractéristiques environnementales et sociales promues par le Compartiment correspondent à celles de l'Indice désigné par le Compartiment et plus spécifiquement, à l'approche d'optimisation (*Overlay*) de l'Investissement durable et responsable (« **ISR** ») qui est utilisée dans la construction de l'Indice.

Les caractéristiques environnementales et sociales promues par le Compartiment correspondent à celles de l'Indice désigné par le Compartiment.

La politique d'investissement du Compartiment consiste à répliquer le plus fidèlement possible la performance de l'Indice au moyen de la Stratégie d'échantillonnage stratifié décrite plus en détail sous la section « Stratégies d'investissement » du Prospectus, en tâchant de minimiser autant que possible l'écart de performance entre le Compartiment et l'Indice. L'évaluation des pratiques de bonne gouvernance s'effectue au travers l'overlay d'ISR appliqué par l'Indice.

Le Gestionnaire financier emploie une méthodologie ESG contraignante qui vise à construire un portefeuille pour lequel au minimum 90 % des actifs du Compartiment sont investis dans des titres alignés sur les caractéristiques environnementales et sociales qu'il promeut. La partie restante (<10 %) du portefeuille, composée de trésorerie ainsi que d'équivalents de trésorerie existants détenus à la discrétion du Gestionnaire financier, ne sera pas alignée sur les caractéristiques environnementales et sociales promues. Si tant est que le Compartiment recoure à des instruments financiers dérivés, ceux-ci ne sauraient être utilisés pour atteindre les caractéristiques environnementales ou sociales qu'il promeut.

Le Compartiment ne s'engage pas à réaliser des investissements durables au sens du SFDR ou du Règlement Taxinomie.

La part du portefeuille du Compartiment investie dans des titres composant l'Indice constituera l'indicateur de durabilité utilisé pour mesurer le respect de chacune des caractéristiques environnementales ou sociales promues par le Compartiment.

Le lien pour la Méthodologie indicielle qui appréhende les caractéristiques environnementales ou sociales promues par le Compartiment est disponible dans le Supplément correspondant et inclus ci-après.

Les sources de données utilisées pour atteindre les caractéristiques environnementales ou sociales pertinentes sont détaillées dans la Méthodologie indicielle.

Il existe un risque que le fournisseur d'indice puisse faire des erreurs, telles que l'évaluation incorrecte des critères de présélection décrits dans la Politique d'investissement et/ou l'inclusion/l'exclusion des bons composants dans le processus de filtrage. Les données ESG peuvent être basées sur certaines hypothèses, prévisions, projections, perspectives et opinions, lesquelles s'appuient le cas échéant sur les tendances actuelles du marché ou sur les événements futurs

anticipés. Étant donné la nature évolutive et innovante des modèles de données, des méthodologies et des hypothèses, ainsi que l'incertitude inhérente à la prédiction d'événements prospectifs, il ne peut être garanti que les données ESG sont toujours exactes ou correctes ni que les données ESG répondront aux objectifs ou aux exigences de quelque client ou investisseur donné que ce soit. De plus, il se peut que certaines données ne puissent être obtenues en raison du manque de disponibilité des sources de données.

SSGA supervise les prestataires externes, en ce compris les fournisseurs d'indices, conformément à son programme de gestion des risques associés aux tierces parties. SSGA s'engage régulièrement auprès des fournisseurs d'indices pour réexaminer le niveau de service assuré, et procède également aux révisions ciblées des processus, systèmes et contrôles de systèmes, des données, des contrôles de qualité et de la sécurité informatique desdits fournisseurs d'indices.

Les politiques d'engagement de SSGA ne sont pas directement intégrées dans la stratégie d'investissement du Compartiment. Cependant, le programme d'intendance des actifs de SSGA consolide l'ensemble des activités actionnariales de vote et d'engagement, toutes classes d'actifs confondues, indépendamment de la stratégie d'investissement ou de la région géographique, y compris pour le Compartiment.

Le Compartiment a désigné l'Indice aux fins de réaliser les caractéristiques environnementales et sociales qu'il promet.

L'Indice est révisé et rééquilibré tous les mois, le dernier jour ouvrable de chaque mois.

L'Overlay ISR est réexaminé tous les semestres, lors des rééquilibrages de fin de mois, en mars et septembre.

Veillez vous référer au descriptif concernant la méthodologie indicielle de Markit iBoxx qui peut être consulté sur le lien suivant :

Pour plus d'informations détaillées, veuillez vous référer aux sections pertinentes ci-dessous, au Prospectus et au Supplément correspondant.

B. No sustainable investment objective

The Fund promotes environmental or social characteristics, but does not have as its objective a sustainable investment.

C. Environmental or social characteristics of the financial product

The State Street SRI Euro Corporate Bond Index Fund is an index fund tracking the performance of the Markit iBoxx Euro Sustainable Corporate Bond Custom Index ("Index"). The environmental and social characteristics promoted by the Fund is the Index designated by the Fund and more specifically the Sustainable and Responsible Investment (SRI) overlay which is used in the index construction.

D. Investment Strategy

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Stratified Sampling Strategy as further described in the “Investment Strategies” section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund’s performance and that of the Index. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Securities in the Fund are selected primarily from the constituents of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Index measures the performance of the Euro corporate bond market, screened based on sustainability criteria. The Index applies an SRI overlay to construct the Index and screen out issuers based on global standards, controversies, product involvement and ESG Risk Ratings.

The assessment of good governance practices is implemented through the SRI overlay utilised by the Index. Companies deemed by the Index provider to not violate UNGC principles are considered to exhibit good governance.

E. Proportion of investments

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund’s assets are invested in securities which are aligned with environmental and social characteristics promoted by the Fund. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager’s discretion, will not be aligned with the promoted environmental and social characteristics.

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

The Fund does not commit to making sustainable investments within the meaning of the SFDR or the Taxonomy Regulation.

F. Monitoring of environmental or social characteristics

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund is the SRI overlay produced by the Index provider and incorporated into the index construction methodology. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

The Fund rebalances on a monthly basis, in line with the Index rebalancing frequency. The Index is reviewed and rebalanced on a monthly basis on the last business day of the month while the SRI overlay is reviewed semi-annually in March and September month end rebalancing.

G. Methodologies

The link to the Index methodology which captures the environmental or social characteristics promoted by the Fund is made available in the Relevant Supplement and in Section L below.

H. Data sources and processing

The data sources used to attain the relevant environmental or social characteristics are detailed in the Index methodology.

I. Limitations to methodologies and data

There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria described in the Investment Policy and/or include incorrect/exclude correct constituents in the screening process. ESG scoring and screening is subject to inherent methodological limits. Any assessment of ESG criteria by an Index is based on the data provided by third parties. Such assessments are dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause incorrect assessment of an issuer's ESG performance. In particular there may be potential inconsistencies, inaccuracy or a lack of availability of required ESG data, particularly where this is issued by external data providers. These limitations may include but are not limited to issues relating to:

missing or incomplete data from companies (for example, relating to their capacity to manage their Sustainability Risks) which have been used as input for any scoring model;
the identification of relevant factors for the ESG analysis; and
the quantity and quality of ESG data to be processed.

ESG data may be based on certain assumptions, forecasts, projections, views and opinions which

may be based on current market trends or anticipated future events. To assess company involvement in different activities and to estimate revenue shares as accurately as possible, data providers strive to obtain information directly from companies and issuers. Sources of data include annual reports, regulatory filings, sustainability reports, press releases, investor presentations, company websites, and other company disclosures. Given the developing and innovative nature of data models, methodologies and assumptions and the inherent uncertainty in predicting forward-looking events, it cannot be guaranteed that the ESG data is always accurate or correct or that the ESG data will satisfy the aims or requirements of any specific client or investor. Furthermore, there may be data that cannot be sourced due to the lack of availability of data sources.

J. Due diligence

SSGA oversees external vendors, including index providers, in line with its third party risk management programme. SSGA engages with index providers regularly for service level reviews and also undertakes targeted reviews of index providers’ processes, systems & systems controls, data, quality controls & IT security.

K. Engagement policies

Is engagement part of the environmental or social investment strategy?

- Yes
- No

While SSGA engagement policies are not directly embedded into the Fund’s investment strategy, for SSGA the informed exercise of voting rights coupled with targeted and value-driven engagement is the most effective mechanism of creating value and managing Sustainability Risk for the investors. SSGA’s Asset Stewardship programme consolidates all voting and engagement activities across asset classes, irrespective of investment strategy or geographic region. The engagement strategy is built on SSGA’s ability to prioritise and allocate resources to companies and issues that have the greatest potential impact. SSGA’s Asset Stewardship programme is underpinned by 3 separate pillars, that is, (i) providing information and guidance to investee companies on the development of ESG practices across key issues, (ii) engaging with portfolio companies to encourage transparent, accountable, high performing boards and companies, and (iii) by exercising voting rights in a manner that reflects long term investment objectives for the purpose of influencing the activity or behaviour of the issuers. To support this process, SSGA has developed proprietary in-house tools to help identify companies for active engagement based on various financial and ESG indicators.

L. Reference benchmark

Has a reference benchmark been designated for the purpose of attaining these characteristics promoted by the Fund?

- Yes
 No

The Fund is an index fund tracking the performance of the Markit iBoxx Euro Sustainable Corporate Bond Custom Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index uses an SRI overlay to construct the Index and screen out issuers based on global standards, controversies, product involvement and ESG Risk Ratings.

The Index is reviewed and rebalanced on a monthly basis on the last business day of the month. The SRI overlay is reviewed semi-annually in March and September month end rebalancing.
